To: Water Right File 31-12377
From: Cass Jones
Re: Field Report Narrative

In office field exam performed on 10/12/2016. There are technically three Points of Diversion. The two at the beginning are on separate streams that are right next to each other and run parallel to each other, and then converge into one stream. The third Point of Diversion is at the end of the main stream where they go into the sinks.
