STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

AUG 19 2016

DEPARTMENT OF
WATER RESOURCES

1. Name of applicant(s) LAMAR COCKRELL & SONS LLC Phone 208-303-0332
Name connector (check one): ☐ and ☐ or ☐ and/or
Mailing address 237 LEMHI RD, SALMON ID 83467 Email _____
2. Name of representative, if any ORIE COCKRELL Phone 208-303-0332
Mailing address SAME Email O.cockrell@hotmail.com
- a. ☒ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☒ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant.
3. Source of water supply WASTE WATER which is a tributary of LEMHI RIVER
4. Location of point(s) of diversion:

TwP	Rge	Sec	Govt Lot	¼	¼	¼	County	Source	Local name or tag #
21N	23E	19		NE	SE	SW	LEMHI	WASTE WATER	

5. Water will be used for the following purposes:
- Amount 1.0 for IRRIGATION purposes from 3/15 to 11/15 (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) 1.0 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).
7. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. waste water flows into the L-9 ditch and is conveyed to property. irrigation using a combination of flood and sprinkler from the L-9 on maximum of 50 acres
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate [Application for Construction or Enlargement of a New or Existing Dam](#). Application required? ☐ Yes ☐ No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ No
- e. If well is already drilled, when? _____; drilling firm _____;
well was drilled for (well owner) _____; Drilling Permit No. _____.

For Department Use

Received by _____ Date _____ Time _____ Preliminary check by _____
Fee \$ 250 Received by AO Receipt No. C102391 Date 8-19-16

8. Description of proposed uses (if irrigation only, go to item 9):

- Hydropower; show total feet of head and proposed capacity in kW. _____
- Stockwatering; list number and kind of livestock. _____
- Municipal; must complete and attach the [Municipal Water Right Application Checklist](#).
- Domestic; show number of households _____
- Other; describe fully. _____

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
21N	22E	2										20	11						31

		10	29	40	12	7.8	33	31											152.8
		11						4.7											4.7
																			406.8

Total number of acres to be irrigated: 50

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? 74-2047L, 74-1835 (Lemhi R), 74-169B (Kirtley Ck), 74-7095, 74-15985, 74-16101 (springs)

- Who owns the property at the point of diversion? Tonsmeire Family Trust
- Who owns the land to be irrigated or place of use? applicant
- If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: permission of landowner

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. at certain times of the year when Lemhi River rights are curtailed, waste water continues to flow into the ditch and may be conveyed to our property. This water may be utilized as supplemental irrigation water for up to 50 acres which are irrigated under Lemhi or Kirtley Ck rights. 74-16101 is also conveyed in L-9.

13. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Application For Permit No. 74-16057

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 10/20/2016 and 10/27/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Jean Hersley
Technical Records Specialist

RE: Legal Ad for your paper

Dear LEGAL NOTICE DEPARTMENT:

Enclosed you will find a legal notice which we wish to have published in your newspaper on the dates indicated (once a week for two consecutive weekly issues). **If you cannot publish the notice on the proposed dates, please contact us immediately.**

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office, PO Box 83720, Boise, Idaho, 83720-0098 before November 6, 2016. Your cooperation is appreciated.

This application proposes the diversion and use of water from a tributary of the Salmon Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because the diversion rate and acres will be applied to the subordination amounts specified in the decree for the Wild & Scenic River listed above.

RE: Application for Permit: 74-16057

Dear Watermaster:

The Department of Water Resources is seeking written comment and/or recommendations from you regarding the above referenced water right application for permit. You can find copies of the application at: <http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>. Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Jean Hersley
Technical Records Specialist

RE: Application to Appropriate Water in the Upper Salmon River Basin 74-16057

Dear Water Right Applicant:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund
- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

Letter to Upper Salmon River Basin Water Right Applicants

Page 2

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the draft Comprehensive State Water Plan under revision by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery. Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at 208-287-4951, or email me at pam.skaggs@idwr.idaho.gov.

Sincerely,

Pamela Skaggs
Water Rights Supervisor

Enclosure: Copy of Application

MEMORANDUM

Date: October 4, 2016
To: Water Right 74-16057
From: Michele Edl
Re: Application Review

Applicant

According to available Lemhi County taxlot information, the proposed POU will be within property owned by the applicant, Lamar Cockrell & Sons, LLC. Lamar Cockrell & Sons, LLC is listed as #W109198 with IDSOS. Orie Cockrell is listed as a manager and he signed the application.

On August 29, 2016, I spoke with Mr. Orie Cockrell over the phone about his application.

Source & POD

The application appears to propose a POD from an unnamed stream channel. In my phone conversation with the applicant, he explained that the proposed POD was actually where the wastewater enters the L9 ditch. The channel carries wastewater from several Geertson Creek water rights and discharges into the L-9 ditch.

The source of water is indirectly tributary to the Lemhi River which in a Wild and Scenic area and so the application is subject to those processing steps. The applicant responded to the LPI letter via email on October 1, 2016.

The proposed POD is located on property owned by the Tonsmeire Revocable Trust. Both the applicant and the application stated that Lamar Cockrell & Sons, LLC have permission from the land owner to construct a diversion.

The L-9 ditch terminates in one of the Lamar Cockrell & Sons, LLC fields (located in sec 3, Twp 21N, Rge 22E). No water returns to the Lemhi River. A map of the conveyance ditch was found in the file of Permit #74-16010 and copied for this file.

Water Use & Quantity

The application requested water for irrigation use on 50.0 acres of the property. The application POU grid and map show the entire 400+ acre farm. The applicant confirmed that he wished to irrigate within the existing POU.

The permitted use will benefit from the subordination provisions of the Wild & Scenic Agreement.

POU

The property containing the POU is abutted on the north side by BLM property. I copied the POU shape from the application layer to the permit layer.

POU/POD overlap analysis

The application lists WR 74-16101 as an overlapping right but that right does not exist. It's likely that 74-16101 is a typo of 74-16010 which does exist as an active permit and which could overlap the POU for this permit.

No other water rights divert from this new POD. However, numerous rights appear to divert from the L-9

ditch below the confluence of Geertson Creek with the L-9.

Watermaster comments

On 8/30, 2016, I phoned the WD 74 watermaster, Rick Sager and briefly discussed this application. Although he was unaware of this application, Mr. Sager was aware of the wastewater and had had at least one conversation with the manager of the Tonsmeire property about recycling it. According to Mr. Sager, the unnamed stream doesn't carry natural water. Instead, wastewater from Geertson Creek water rights is piped along the channel and terminates in the 'Tonsmeire bubbler'. The watermaster also confirmed that although Cockrell & Sons have claim to 90% of the water in the L-9, there are other users. There is an informal lateral association of the water users from the L-9 and Mr. Orie Cockrell is the association's ditch rider.

Conditions

The proposed use is currently within a Water District. The permit will have conditions related to watermaster control and watermaster comments will be requested.

Regional IDF&G and BLM personnel will also be contacted for comment.

Subject: Re: application for permit 74-16057

To whom it may concern,

The water that we are hoping to obtain a water right to already runs into our L-9 ditch and always has. There is no way for this waste water to be released out of our ditch and enter the Lemhi River. We would just like to have a legal water right on water we already receive.

Thank you for your time,

LaMar Cockrell and Sons

Mr. Cockrell,

I have completed the initial review of your application for permit 74-16057 and have discussed it briefly with my supervisor, and with the watermaster of Water District 74, Rick Sager.

As I stated in our the phone conversation yesterday, the next step is to offer you the opportunity to provide additional information about your project. That additional information will be in the form of your response to the local public interest or 'LPI' letter. I have attached an early-bird copy of that letter and a copy of your application for permit (for reference) to this email.

The hardcopy of the LPI letter and attachment will be mailed from this office either later today or early tomorrow. You have 30 days to respond. But if you are willing or able to respond before October 1, 2016, I can proceed to the next step in the processing of your application. That step is advertising you application it in the local paper.

If you have any questions, please email me or call me at 208-287-4946.

Sincerely,
Michele Edl
