Re: KBCP LLC and KBC Farms LLC

Dear Mr. Cefalo:

KBCP LLC and KBC Farms LLC desires to move the POD that was approved to be drilled from Transfer 78268 to a new location. The well for 35-14308 was never drilled.

Based on the current infrastructure and management of the farm, it is proposed to drill a new well (Well #11) on the farm in T08S R29E Section 26 SWNW. Due to fluctuating agricultural market values and irrigation water volume reductions, KBCP LLC and KBC Farms LLC are requesting a 5 year period to drill the well.

It is further requested that the individual well volume limits that IDWR set in Transfer 77467 be adjusted to reflect the actual pumping conditions on the farm. Exhibit A provides the legal description of each well, current annual volume limits and proposed volume limits. The proposed volume limits are based on installed sprinkler pivot packages rate of applications and total number of acres irrigated under each pivot.

An ESPA Model analysis was performed because the POD approved in Transfer 78268 is located in cell 9390 and the new POD will be located in cell 9589. No mitigation will be required with this transfer.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S., Engineer
