PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 65-23447

Dear Permit Holder(s):

The Department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the Department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the Department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any Department office or at the Department's website at www.idwr.idaho.gov.

If you have any questions concerning the field examination, please contact the Western Region Office of the Department located in Boise at (208) 334-2190.

Sincerely,

Darla Block

MEMORANDUM

TO: Water Right Permit File 65-23447

FROM: Daniel A. Nelson

DATE: September 7, 2016

SUBJECT: An on-sight field exam should be done for this permit

The permit holder for this permit submitted proof of beneficial use claiming that 2 small stockwater ponds were developed. An in-house field examination was attempted, but the aerial photography available to the Department and in Google Maps only show one pond has held water over the past few years. There could be a second pond, but I am not convinced that the second pond to the north gets any water from the wastewater source. There is no evidence in the aerial photos that the north pond has held water.

The owner also states in the application for permit that he fills the ponds from his well, but the aerial photos suggest that he uses the wastewater exclusively. There are enough questions involved with this permit, that I feel a field visit is necessary to verify the existence of two ponds and the use of well water in the ponds to properly license this permit.
