Department of Water Resources
Eastern Region

MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Eight Mile Ranch, LLC

Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

Yes N/A * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).**
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☒ ☐ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☒ ☐ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☐ ☒ #10 Other. Please describe: _____

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 1 Continued

B. DESCRIPTION OF RIGHTS AFTER THE REQUESTED CHANGES. IF THE RIGHTS ARE BEING SPLIT, DESCRIBE PORTIONS TO BE CHANGED AS THEY WOULD APPEAR AFTER THE REQUESTED CHANGES.

1.	Right Number	Amount (cfs/ac-ft)	Nature of Use	Period of Use	Source & Tributary
All or Part ☒ ☐	11-7474	11.5	Irrigation	4/20 to 10/01	Bear River
☒ ☐	11-7475	12.5	Irrigation	4/20 to 10/01	Bear River
☒ ☐	11-256	2.5	Irrigation	4/20 to 9/30	Bear River
☒ ☐	11-7657	2	Irrigation	4/20 to 10/01	Bear River
☒ ☐	11-321	6	Irrigation	4/20 to 9/30	Pearl Creek
☒ ☐	11-322	2.9	Irrigation	4/20 to 9/30	Trail Creek
☒ ☐	11-323	4.4	Irrigation	4/20 to 9/30	Springs
☒ ☐	11-7691	.31	Irrigation	4/15 to 10/31	Unnamed Stream
☒ ☐	11/7692	.32	Irrigation	4/15 to 10/31	Unnamed Stream

Total authorized under rights 42.43 cfs and/or _____ acre-feet.

2. Total amount of water proposed to be transferred or changed 42.43 cubic feet per second and/or _____ acre-feet per year.

3. Point(s) of Diversion:

- ☐ No changes to point(s) of diversion are proposed - the following chart is therefore not completed. (Proceed to #4.)
- ☐ Attach Eastern Snake Plain Aquifer analysis if this transfer proposes to change a point of diversion affecting the ESPA. Label it Attachment #5.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

SEE ATTACHED NARRATIVE.

- b. Who owns the property at the point(s) of diversion? Applicant

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it Attachment #6. List the name of the entity and type of lien: _____

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
None. The land now irrigated will continue to be irrigated.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

Purpose of Transfer - Part 1A.2.

The purpose of the transfer is two-fold. First, to change the point of diversion and place of use of water right no. 11-7475 from the point of diversion and place of use of Lessee, Last Chance Canal Company back to the points of diversion and places of use of Applicant, Eight Mile Ranch, LLC. Second, to combine the points of diversion and places of use of the nine (9) identified water rights of Applicant in the Bear River, Pearl Creek and Trail Creek to provide for practical and flexible irrigation of the combined 1,825.8 acres place of use as depicted on the attached map.

The 1,825.8 acre place of use is not expanded and the same number of acres available under the decreed water rights. The original decrees generally describe a large place of use. The map accurately depicts the current place of use.

In 2001 Eight Mile Ranch, LLC leased to Last Chance Canal Company water right 11-7475. Transfer No. 69264 was approved on November 29, 2002 changing the point of diversion and place of use for this right from Eight Mile Ranch, LLC to the existing points of diversion and places of use of Last Chance Canal Company. The lease to Last Chance Canal Company was terminated effective on the beginning of the 2015 irrigation season. Accordingly, the points of diversion and places of use are being transferred back to Eight Mile Ranch, LLC. Part of this right will be used to irrigate three pivots in the identified place of use east of the Bear River in Section 7 and 18, T10S, R43E and Sections 12 and 13 of T10S, R42E.

The second purpose of the Transfer Application is to combine the points of diversion and places of use under all of the subject water rights as identified on the attached map, with the Bear River points of diversion identified by red dots, the Pearl Creek points of diversion identified by yellow dots and the Trail Creek point of diversion identified by a green dot. The two Bear River points of diversion located in the NE1/4SE1/4 Section 12 and in the NW1/4NE1/4 of Section 13, T10S, R42E are two pump stations on the Bear River which irrigate all lands east of the Bear River via three center pivots, wheel lines and hand lines. The Bear River point of diversion at the south end of the Ranch in the NW1/4NW1/4 of Section 29, T10S, R42E can be diverted into a canal which runs in a northerly direction along the west side of the Bear River and railroad tracts, the full length of the property which then discharges to the Bear River in the SE1/4SE1/4 of Section 2, T10S, R42E. The canal provides irrigation water to the identified property west of the Bear River for flood and sprinkler irrigation.

The three yellow dots depict the points of diversion from Pearl Creek. The west most point of diversion higher on the creek located in the SW1/4SE1/4 Section 25 diverts into a steel buried mainline which runs in a northeasterly direction and is used to irrigate the property as depicted in the E1/2 of the SE1/4 Section 24, NE1/4NE1/4 of Section 25, NE1/4 Section 30 and SE1/4 Section 29. Part of this property can also be irrigated by diversion from Pearl Creek at the point of diversion located in the

NW1/4NE1/4 Section 30. The Pearl Creek point of diversion located in the NW1/4SE1/4 Section 19 can be used to divert Pearl Creek water into the canal west of the River or be allowed to run into the Bear River.

Total Acres: 67200

Conditions of Approval:

1. T20 Approval of this transfer does not confirm the validity of this water right.
2. T18 Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works for all authorized points of diversion. The means of measurement and controlling works must be suitable for control of the diversions and acceptable to the watermaster.
3. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 11.
4. R63 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
5. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
6. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
7. WB4 The total instantaneous diversion of water from all points of diversion under Right 11-7475 shall not exceed 12.5 cfs, nor total combined annual volume of 1756.0 af.
8. X27 This right is limited to the irrigation of 501.7 acres within the place of use described above in a single irrigation season.

APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (**GIS**) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**.

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it Attachment #8b.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

IDAHO FALLS, IDAHO 83402-1718

RE: EIGHT MILE RANCH, LLC – APPLICATION FOR TRANSFER

Dear Blake,

Western AgCredit, FLCA has a security lien interest in the following water rights owned by Eight Mile Ranch, LLC.

- 11-7474
- 11-7475
- 11-256
- 11-7657
- 11-321
- 11-322
- 11-323
- 11-7691
- 11-7692

Western AgCredit, FLCA is aware of the application for transfer and consents to the proposed changes identified in the application being submitted.

Sincerely,

Casey M. Beck
Assistant Vice President
Branch Manager
Western AgCredit

STATE OF IDAHO)

County of Bannock)

WADE HARRIS, being first duly sworn on oath, deposes and states that the following facts are true and correct to the best of my knowledge, information and belief:

1. I am of full age and competent to testify to the information in this Affidavit. This affidavit is submitted to support the Application for Transfer of Water Rights (“Transfer Application”) filed with the Idaho Department of Water Resources by Eight Mile Ranch, LLC. I am the manager of Eight Mile Ranch, LLC which is owned by me, my brothers and my parents, McGee and Janet Harris.

2. Eight Mile Ranch, LLC is the owner of all of the water rights and the real property which they are appurtenant described in the Transfer Application. The property was commonly known as the Budge Ranch as it was owned and operated by Budge Land & Livestock Company from 1908 until 1962. I have reviewed the Transfer Application and the facts stated therein are true and correct to the best of my knowledge. The purpose of the Transfer Application is to combine the water right points of diversion and places of use to provide for practical, efficient and flexible irrigation practices and to accurately identify the places of use.

3. I have specific, first-hand knowledge regarding the beneficial use of water for irrigation purposes under the statutory claims for water rights nos. 11-7691 and 11-7692 from the time my family purchased an interest in the Budge Ranch in 1971 until the present, and I also have knowledge of how these rights were used prior to this time.

4. The Budge Ranch was sold in about 1962 to Pine Forest Land & Livestock

Company owned by Frank and Jo Bidart. On May 20, 1971, my parents and two other families acquired the ranch from Pine Forest Land & Stock Company, each owning and undivided one-third interest. A few years later my parents later acquired sole ownership of the portion of the ranch property west of the Bear River, which contains the land associated with the statutory claims for water rights nos. 11-7691 and 11-7692.

5. In 2001, my parents deeded the property west of the Bear River to Eight Mile Ranch, LLC. Over the next several years Eight Mile Ranch, LLC bought out the other owners and became the sole owner of all of the land and water rights associated with the original Budge Ranch

6. In 1971, I was present with my father when the prior owners Frank and Jo Bidart explained the operations of the ranch, including how the water rights were used for irrigation purposes. Bidarts indicated that the irrigation practices from Pole Creek and Clove creek as described in claim nos. 11-7691 and 11-7692 were followed during their ownership from approximately 1962 until 1971 and were the same as the by the Budge Ranch previously.

7. I was raised on the ranch and have spend most of my life operating it with my parents and brothers and as such I am familiar with all of the irrigation practices from 1971 to the present time. Beginning in 1971, I have helped with and continue to manage regular flood irrigation on the land associated with the statutory claims for water rights nos. 11-7691 and 11-7692 in the manner that Frank and Joe Bidart explained to my father, which is how I understood that they and their Budge predecessors used these rights.

8. Water right no. 11-7691 has as its current and historic source Clove Creek.

9. Water right no. 11-7691 has as its current and historic source Pole Creek.

10. The statutory claim for water right no. 11-7691 uses as a point of diversion a

culvert with a metal headgate and canvas dam. It is located on the east edge of Nounan Road, as depicted in **Exhibit A**.

11. The statutory claim for water right no. 11-7692 uses as a point of diversion a separate culvert with a metal headgate and canvas dam. This point of diversion is also located on the east edge of Nounan Road, as depicted in **Exhibit B**.

12. I have personally identified the place of use for flood irrigation under water rights nos. 11-7691 (Clove Creek) and 11-7692 (Pole Creek) in **Exhibit A** and **Exhibit B** respectively. These places of use existed when my parents acquired an interest in the Budge Ranch, and it is my understanding that these are the same places of use that existed when the Budge family owned the land. These places of use are accurately described, although in less detail, in the statutory claims for water rights nos. 11-7691 (Clove Creek) and 11-7692 (Pole Creek).

13. Flood irrigation is accomplished using canvas dams in the ditches. Excess water from flood irrigation water under water rights nos. 11-7691 (Clove Creek) and 11-7692 (Pole Creek) flows into the canal and it used to irrigate other land on our property as shown in the Transfer Application.

14. The statutory claim for water right no. 11-7691 (Clove Creek), which claims to irrigate 10.3 acres of land (1.5 acres in the NWSW and 8.8 acres in the SWNW of Section 19 of Township 10S, Range 43, E.B.M), accurately reflects the acreage that my family has irrigated since 1971 and that was irrigated prior to our purchasing the property.

15. The statutory claim for water right no. 11-7692 (Pole Creek), which claims to irrigate 10.6 acres of land (5.5 acres in the SENE of Section 24 of Township 10S Range 42 E.B.M, and 5.1 acres in the SWNW of Section 19 of Township 10S, Range 43, E.B.M), accurately reflects the acreage that my family has irrigated since 1971 and that was irrigated prior

to our purchasing the property.

16. The statutory claims for water rights nos. 11-7691 (Clove Creek) and 11-7692 (Pole Creek) accurately reflect the diversion rate (0.31 cfs for 11-7691 and 0.32 cfs for 11-7692) my family and I have used under these rights since 1971, and that we understood was used since the time the Budge family owned the land and associated water rights.

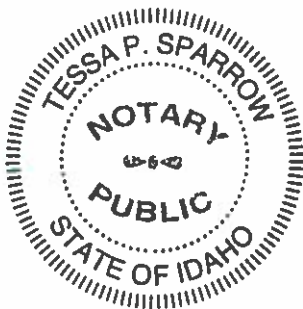

17. It is my understanding that my family has continued to use the flood irrigation rights under statutory claims for water rights nos. 11-7691 (Clove Creek) and 11-7692 (Pole Creek) in the same manner as the Budge family who owned the property several years before my family acquired an interest in the land.

DATED this 6 day of December, 2015.

Wade L Harris

1

4. My father, Reed W. Budge, was one of several stockholders in the Company and operated and managed it from approximately 1951 to 1962, when it was sold to Frank and Jo Bidart.

5. The Budge Ranch was located along the banks of the Bear River between the towns of Soda Springs and Georgetown in Bear Lake County, Idaho. It was bordered by the Eight Mile Creek on the north, U.S. Highway 30 on the east, Pearl Creek on the south, and Caribou National Forest on the west. The ranch consisted of approximately 9,500 acres plus 4,000 acres of forest grazing rights and the second oldest water rights on the Bear River in Idaho with a priority date of May 1, 1889.

6. From 1956 continuously though 1962 when the Budge Ranch was sold , I recall accompanying my father, older brother and other employees and helping with the irrigation, raising of crops and livestock and all aspects of ranch operations. During that time I recall that the irrigation practices included diversion of water and flood irrigation from Pole Creek and Clover Creek to raise meadow hay in the manner described in the Transfer Application and statutory claims nos. 11-7691 and 11-7692 to irrigated the lands shown in **Exhibit A** and **Exhibit B** respectively.

7. The source of water we used for water right no. 11-7691 was Clove Creek, and the source of water we used for water right no. 11-7692 was Pole Creek. My father indicated to me and it has been my understanding that the irrigation practices, ditches and structures that existed during the period he managed the ranch from approximately 1951 through 1962 had been in existence and used in the same manner form the time Budge Land & Livestock Company was originally organized.

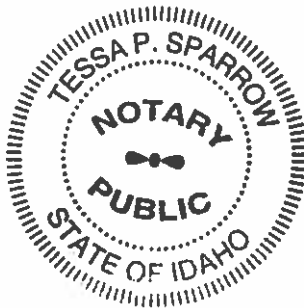

FURTHER YOUR AFFIANT SAYETH NOT.

DATED this 4th day of December, 2015.
