Re: Funk Transfer

Dear Mr. Cefalo:

The Lance and Lisa Funk Partnership desires to add an additional point of diversion to water rights 35-14081, 35-14084, 35-14089, 35-14092, 35-13608 and 35-7914. This additional POD will provide sustaining water to the existing water rights that draw from the existing PODs. This well will also act as a backup well operating at a smaller pumping capacity until there is a problem or maintenance issue with the main wells. At which time the full capacity of the well will be pumped and utilized.

This transfer also proposes to update the ownership of water rights 35-7914 and 35-13608. Diane Benson Funk is still listed as an owner of 35-7914. However, Diane Funk is deceased. Please remove her name from the ownership of the water right.

Reid Stewart has recently signed a quitclaim deed for water right 35-13608 assigning the water right ownership to Lance and Lisa Funk Partnership. Please update the ownership to reflect this change.

No ESPA model analysis has been performed for this transfer because the current well locations are in adjacent model cells to the proposed well location.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S., Engineer

Cc: Lance Funk
