Damasco Pond Beneficial Use Exam for Permit 37-22354 Narrative

RECEIVED

OCT 30 2014

DEPT OF WATER RESOURCES
SOUTHERN REGION

Prepared by: Charles E. Brockway

Date: October 28, 2014

The pond which is the subject of a Transfer Application No 73743 and permit application 37-22354 filed by Brockway Engineering constructed between about 1974 and 1979 by the former owner, Hatch Buttram. The property on which the pond is constructed is located adjacent to a lateral from the Hiawatha Canal in the SE ¼ SW ¼ Section 33 T.03N R.18E and in Lot 3 NE ¼ NW ¼ of Section 4 T.02N R.18E and receives water from the Hiawatha Canal. It is an off-canal pond and neither the Hiawatha Canal, nor the ditch to Northridge Subdivision flows through the pond. The outflow from the pond is controlled by a rock overflow structure and a pipeline which serves as a distributor of the inflow and discharges back into the ditch which flows to Northridge Subdivision. Flow in the lateral ditch crosses Buttercup road and sinks either in planned infiltration areas or from ponds for irrigation on the Northridge area. During the irrigation season, water from Indian Creek flows into the Hiawatha Canal from Indian Creek at a point in T3N R18E Sec 33 NE¼ SW¼, mixes with Big Wood River water, and is diverted into the lateral and thus into the Damasco pond. During the winter time, water is conveyed into the Northridge delivery ditch; through the pond and then can be diverted into and out of the pond. There are no water rights downstream of the Damasco pond listing Indian Creek as a source.

The pond as built encompasses 0.84 acres and is located on Lots 4, 5, and 6 of the Buckhorn Subdivision #1. The inlet to the pond from the ditch is on Lot 4 and the outlet structures are on Lot 6.

The pond comprises about 0.84 acres of water surface with the following distribution of pond area among the 3 lots:

Lot 4	(Martin)	0.08 acres or 8.4 %
Lot 5	(Damasco)	0.72 acres or 86.3 %
Lot 6	(Rice)	0.04 acres or 5.3 %
Total:		0.84 acres or 100 %

The pond averages approximately 4.5 feet deep as determined from the construction drawings. The estimated pond volume is therefore 3.78 acre feet. Lot 4 (Martin) utilizes the pond for irrigation by pumping from the pond under irrigation water right 37-38C and 37-297C which

jointly allows irrigation of 2 acres. Lot 5 (Damasco) utilizes the pond for irrigation under water rights 37-297D and 37-20359 also for 1.1 acres and 0.12 cfs total. No irrigation from the pond is performed by Rice (Lot 6). All of the irrigation water rights have been decreed in the SRBA. Agreements among the three parties allow joint use of the pond.

Storage in the pond is for wildlife, aesthetics, and recreation and was not claimed by the former owners in the SRBA. Permit application 37-22354 was submitted in 2008 to obtain a water right for recreation and wildlife on the portion of the pond located on the Damasco (formerly Chesnel) property.

The permit place of use includes the entire pond on all three subdivision lots. Mitigation for evaporative loss is included in water rights 37-20359 and 37-397D for which the irrigated area and associated Big Wood River discharge is reduced from 2.0 acres to 1.05 acres. Mitigation for evaporation for the entire pond is provided by drying up acreage only on the Damasco property as outlined in approved amended water right transfer 73743 attached. The decrease in discharge to provide for pond mitigation is 0.06 cfs total from both water rights, leaving 0.06 cfs from both water rights to irrigate 1.05 acres total.

Estimated open water evaporation from the as-built 0.84 acre pond, shows that the annual open water evaporation from the pond is less than the consumptive use provided by decreasing the irrigated area under 37-297D and 37-20359.

The estimated seepage rate for the constructed pond with compacted earth lining is 0.2 ft. /day. The storage volume to account for seepage in the pond (0.2 ft per day x 365 days x 0.84 acres) or 61.3 acre-feet and the actual pond volume of 3.78 acre-feet combined equals a total storage volume of 65.1 acre-feet. The allowed storage volume under water right 37-22354 is 73 acre feet. Actual estimated storage volume is lower than the permitted amount because the as-built pond surface area is smaller than the permitted area.

A water measurement device(s), as required by the Watermaster of District 37 and by the amended permit, is provided at the inlet from the Hiawatha lateral. Orders issued by IDWR waiving the measuring device at the inflow from Indian Creek to the Hiawatha Canal and the outlet measuring device are attached.

Elements of the proposed water right license would be as follows:

Source:	Indian Creek	via Hiawatha Canal
Nature of Use:	Diversion to Storage:	01/01 to 12/31 0.74 cfs
	Wildlife, Recreation, Aesthetic	01/01 to 12/31 0.74 cfs
	Aesthetic Storage: *	01/01 to 12/31 65.1 afa
	Wildlife Storage: *	01/01 to 12/31 65.1 afa
	Recreation Storage: *	01/01 to 12/31 65.1 afa
	Fire Protection Storage:	01/01 to 12/31 65.1 afa

Total: 0.74 cfs and 65.1 acre feet

Points of Diversion: Indian Creek at Hiawatha Canal T.03N R.28E Sec 33 NW $\frac{1}{4}$ NE $\frac{1}{4}$ SW $\frac{1}{4}$

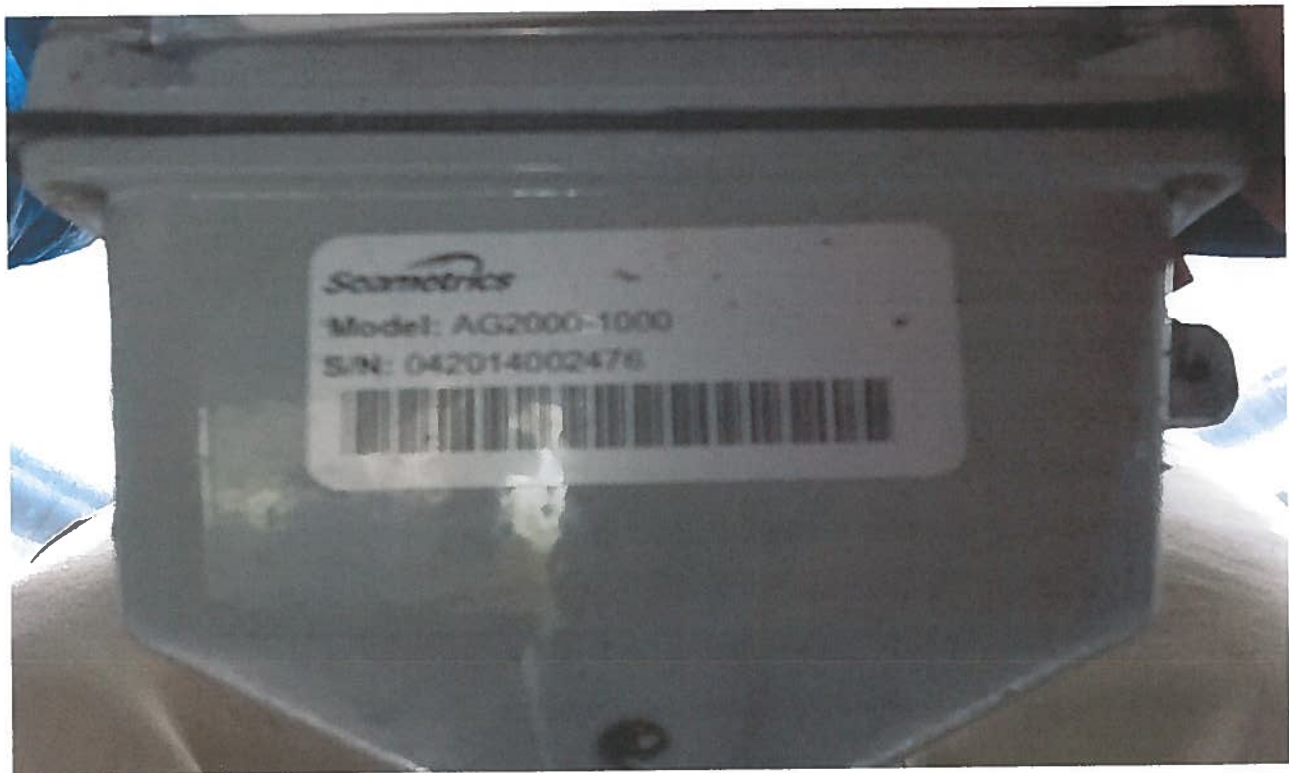

Place of Use: Lots 4,5,6, Buckhorn Subdivision T.03N R.18E Sec 33 SE $\frac{1}{4}$ SW $\frac{1}{4}$
 Lot 6, Buckhorn Subdivision T.02N R.18E Sec 4 Lot 3 NE $\frac{1}{4}$ NW $\frac{1}{4}$

Storage = Pond volume (3.78 af) and estimated pond seepage (0.2 ft/day x 365 days x 0.84 acres = 61.3 acre feet) Total Storage = 65.1 acre feet

CONDITIONS OF APPROVAL

1. Irrigation place of use is located within Lot 5, Blk. 1; Buckhorn Subdivision. Aesthetic, recreation, and wildlife storage place of use is located within Lots 4, 5, and 6, Blk. 1; Buckhorn Subdivision.
2. Rights 37-297D and 37-20359 when combined shall not exceed the irrigation of 1.1 acres.
3. Rights 37-297D and 37-20359 authorize the diversion of an annual total of 1.3 acre-feet to be used for the replacement of losses caused by evaporation from the 0.95 acre of total surface area of the pond authorized by Right 37-22354.
4. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
5. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
6. This right does not grant any right-of-way or easement across the land of another.
7. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
8. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
9. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Conditions of Approval:

1. 220 The pond established by the storage of water under this right shall not exceed a total capacity of 3.8 acre-feet or a total surface area of 0.95 acre.
2. The 73.0 afa total storage described by this right includes the 3.8 acre-feet capacity of the pond authorized by this right and an additional 69.2 afa to account for seepage loss from the pond. Rights 37-297D and 37-20359 provide an annual total of 1.3 acre-feet to be used for the replacement of losses caused by evaporation from the pond.
3. X60 Place of use is located within Lots 4, 5, and 6, Blk. 1; Buckhorn Subdivision.
4. 004 This right does not grant any right-of-way or easement across the land of another.
5. 218 Water shall not be diverted from fire protection storage except to fight or repel an existing fire. Use of water under this right will be regulated by a watermaster with responsibility for the
6. R05 distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.

- 7.01J Prior to diversion of water under this right, the right holder shall install and maintain a measuring devise and lockable controlling works of a type acceptable to the Department as part of the diverting works. A measuring device with control works shall be installed at the location where water is diverted from the Hiawatha canal for conveyance to the pond. When notified by the Department or the watermaster, the right holder shall install and maintain a measuring device or rated section, subject to approval by the Department, at the mouth of Indian Creek where water from Indian Creek discharges into the Hiawatha Canal or at the location of discharge from the pond or both.
- 8.051 Any license issued by IDWR pursuant to the right or portion thereof for the use of trust water is subject to a term review of 20 years after the date of this approval to determine availability of water for the use and to re-evaluate the public interest at the end of the term.
