DEPARTMENT OF
WATER RESOURCESSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

Ident. No.

75-14845

1. Name of applicant(s) Hermenegildo T. Jordan ^{Message} Phone 208-865-2234
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address PO BOX 664 City SALMON
 State ID Zip 83467 Email dishong@centurytel.net
2. Source of water supply Groundwater (well) which is a tributary of N/A
3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
24N	21E	35	6		SW	SE	Lemhi	Ground water	0020739

4. Water will be used for the following purposes:
 Amount .06 for Irrigation purposes from 3/1 to 11/1 (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
5. Total quantity to be appropriated is (a) _____ cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).
6. Proposed diverting works:
- Describe type and size of devices used to divert water from the source. well pump to pump water out of ground to irrigation pipe & sprinkler system
 - Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
 - Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
 - Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
 - If well is already drilled, when? yes; drilling firm Harber Drilling; well was drilled for (well owner) _____; Drilling Permit No. See encl. Drillers report
7. Description of proposed uses (if irrigation only, go to item 8):
- Hydropower; show total feet of head and proposed capacity in kW. _____
 - Stockwatering; list number and kind of livestock. _____
 - Municipal; complete and attach the Municipal Water Right Application Checklist.
 - Domestic; show number of households _____
 - Other; describe fully. Irrigation of 2 Acres of Ground For GRASS HAY production

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
24N	21E	35															2		2

Total number of acres to be irrigated: 2

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping?

N/A

10. a. Who owns the property at the point of diversion? Hermenegildo T. Jordan
- b. Who owns the land to be irrigated or place of use? Hermenegildo T. Jordan
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing:

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

I plan to irrigate 2 Acres of land for the purpose of GRASS HAY production

12. Time required for completion of works and application of water to proposed beneficial use is 1 YR years (minimum 1 year).
13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Application For Permit No. 75-14845

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 9/1/2016 and 9/8/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Enclosed is a Notice of Change in Water Right Ownership for water rights 75-10714 and 75-10715. These water rights appear to be appurtenant to your property. Please fill out the form and submit to the Department along with the required documentation and fees.

Please contact this office if you have any questions regarding the application.

Sincerely,

Jean Hersley

RE: Application for Permit No. 75-14845

Dear Interested Party:

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced water right application for permit. You can find copies of the application at: <http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>.

This office can publish notice of the application as soon as the initial review is completed; therefore, your prompt response to this request is appreciated. If your agency desires to formally protest the approval of this application, you may do so after the notice is published by filing a written protest along with a \$25.00 filing fee within 10 days after final publication.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in black ink that reads "Jean Hersley". The signature is written in a cursive, flowing style.

The following application(s) have been filed to appropriate the public waters of the State of Idaho:

75-14845

HERMENEGILDO T JORDAN
PO BOX 664
SALMON, ID 83467
Point of Diversion L6(SWSE) S35 T24N R21E LEMHI County
Source GROUND WATER
Use: IRRIGATION
04/01 to 10/31
0.06 CFS
Total Diversion:
0.06 CFS
Date Filed: 7/14/2016
Place Of Use: IRRIGATION
T24N R21E S35 L6(SWSE)
Total Acres: 2

This application proposes the diversion and use of ground water tributary to the Salmon Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because the diversion rate 0.04 cfs and 2 acres will be applied to the subordination amounts specified in the decree for the applicable Wild & Scenic River listed above.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact the State office at (208) 287-4800; or for a full description of the right(s), please see www.idwr.idaho.gov/apps/ExtSearch/WRFiling.asp. Protests may be submitted based on the criteria of Idaho Code § 42-203A. Any protest against the approval of this application must be filed with the Director, Dept. of Water Resources, State Office, 322 E Front St, PO Box 83720, Boise, ID 83720 together with a protest fee of \$25.00 for each application on or before 9/19/2016. The protestant must also send a copy of the protest to the applicant.

MEMORANDUM

Date: August 8, 2016
To: Water Right 75-14845
From: Michele Edl
Re: Application Review

Applicant

According to available Lemhi County taxlot information, the proposed POD and the proposed POU will be within property owned by the applicant, Hermenegildo Jordan.

Source & POD

The source of water will be ground water indirectly tributary to the Salmon River. The source is in a Wild and Scenic area and so the application is subject to those processing steps.

The applicant responded to IDWR's additional information request letter on August 8, 2016.

A Well Driller's Report to the well was submitted as part of the application package. A new well has been created in the well layer and the report has been associated with that well. Because the well was drilled before drilling fees were implemented, a well upgrade fee will not be required.

Water Use & Quantity

The application requested water for irrigation use on 2.0 ac of his property. By IDWR policy, small irrigation uses on less than 5 acres could be authorized 0.03 cfs/af and the application does propose that amount. However, the W&S agreement stipulates 0.02 cfs/ac. Therefore the permit will be issued for 0.04 cfs or 0.02 cfs/ac. The permitted use will benefit from the subordination provisions.

POU

The property containing the POD and POU is abutted on the east side by Salmon-Challis National Forest property.

The proposed POU is within a lot also known as Lot 3 in the Amended Rock Point Subdivision.

I copied the POU shape from the application layer to the permit layer.

SOU

The application requests non standard SOU for the area. The permit will be issued with the current standard 4/1-10/31 season for irrigation use in the area.

POU/POD overlap analysis

Statutory claim 75-4434 for irrigation use from 4th of July Creek, had been issued to the Rock Point Subdivision. It was not claimed in the SRBA.

The applicant's well was drilled by Clyde Hodges in 1985 for domestic use. On November 10, 2000 the SRBA court decreed two domestic water rights 75-10714 and 75-10715, to Clyde Hodges and Dorothy Hodges. The decrees describe the POU's and POD's as being located within the SWSE. The comment directly below appears in the recommendations for both 75-10714 and 75-10715.

Comments:

- | | | | |
|-------------------------------|-------|----------|---------------------|
| 1. | CORR2 | 4/7/1997 | COPIED FROM REMARKS |
| ROCK POINT SUBDIVISION, LOT 3 | | | |

It is likely that 75-10714 and 75-10715 are more specifically located in govt lot 6 (SWSE) and are overlapping this application. For complete overlap analysis see the attached spreadsheet.

Conditions

The proposed use is not currently in a Water District but is expected to be annexed into one soon. The permit will be conditioned with notifications related to watermaster control. Watermaster comments will be requested.

Regional IDF&G and USFS personnel will be contacted for comment.

AUG 08 2016

DEPARTMENT OF
WATER RESOURCES

To whom it may concern:

I recently applied for water rights on my property located at 14 Elk Ridge Lane, North Fork, ID 83466. I recently received a letter regarding "the public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources." I would like to respond as follows:

It is primarily this reason, helping to protect habitat and aquatic life, that I have applied for water rights for my property. Under Idaho law I, as a landowner am required to control noxious weeds on my property (Idaho law ch.24, Title 2, 22-2407) I have tried diligently over the past several years to control the abundant and well-established noxious weeds on my property (including field bind weed, knapweed and Canadian thistle) I am very concerned about the use of excessive amounts of herbicides needed to help eradicate and control these noxious weeds as my property is a natural drainage that flows into the Salmon river .

I have exhausted every "natural" effort to control these weeds without any success. To exasperate the problem, my land is located at the base of a very large mountain (BLM and private property) in which heavy amounts of noxious weed seeds and heave sediment flow during rainstorms and spring runoff. I have been told that the only way to effectively control the weeds is by the rehabilitation of my property and establishing healthy vegetation that will inhibit the growth of noxious weeds. Without healthy vegetation, the only way to control the noxious weed problem is through the use of herbicides and fertilizers. It has proven impossible to rehabilitate the property without additional water. The weeds are too well established and the ground too poor and dry without additional water. While large amounts of herbicides temporarily stop weed infestation, the herbicides only provide temporary relief in the weed cycle. Without the use of water and thus the ability to rehabilitate the ground with healthy vegetation, I cannot break the cycle of noxious weed growth. I hate to use large amounts of herbicides when, with a minimal amount of water, I can rehabilitate my property with healthy vegetation and will be able to break the noxious weed cycle without the continued use of herbicides and fertilizers.

Furthermore, once my property is weed free and healthy vegetation is established, it will act as a filter in catching large, untold amounts of noxious weed seeds and sediment that currently flow unabated across my property and into the Salmon River. These seeds eventually wash downriver contaminating wildlife habitat. Herbicides currently used to control them ultimately end up in the Salmon River as well.

My 2 acres will be planted in a good quality grass that will be baled and fed to livestock with remaining stubble left to help sustain local wildlife.

Thank you very much for your consideration in the matter.

Hermenegildo T. Jordan

				Walker POU is likely not correctly located. Taxlots show Walker property in gov't lot 5 (NWSE)					
				Dischong POU is not an overlap. Dischong property is also in Govt lot 6 but is directly to north					
				Hodges POU may be a true overlap; the proposed well for this permit is an existing domestic well

RE: Application to Appropriate Water in the Upper Salmon River Basin 75-14845

Dear Water Right Applicant:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund
- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the draft Comprehensive State Water Plan under revision by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery. Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at 208-287-4951, or email me at pam.skaggs@idwr.idaho.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Pamela Skaggs", with a stylized flourish at the end.

RE: Application for Permit

Dear Applicant(s):

The Department of Water Resources has received your water right application. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. The Department did not receive the **\$100** fee required for processing an application for permit for 0.06 cfs. I have enclosed a copy of the fee table for your benefit.

The Department will hold your application for 30 days pending receipt of the filing fee. If the fee isn't received within 30 days, the Department will return your application unprocessed.

Please feel free to contact this office if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jean Hersley'.
