EAST VALLEY CATTLE-DAIRY TRANSFER

Applicant East Valley Cattle is preparing to convert an existing feedlot in Section 35, T11S, R27E (the "Section 35 Property") to a dairy near Malta, Idaho. The Applicant currently holds water right nos. 43-13491, 43-13493, 43-13495, 43-13497, 43-13499, 43-13501, 43-13503, 43-13505, 43-13507, 43-13509, 43-13511, 43-13449, 43-13451, 43-13453, 43-13455, 43-13457, 43-13459, 43-13461, 43-13463, authorizing diversion of 2.9 cfs and 1145.6 acre-feet of water for commercial and stockwater uses within the Section 35 Property. To meet additional commercial and stockwater requirements for the dairy, an additional 637.3 acre-feet are needed to supply a total of 1782.9 acre-feet annually.

The Applicant also holds water right 43-13452 authorized for irrigation and proposes to convert a portion of this irrigation right to stockwater/commercial use, which in addition to the existing commercial and stockwater rights will be sufficient for the dairy conversion. This water right transfer from irrigation to commercial and stockwater will occur in parallel with a companion transfer seeking to designate a permissible place of use (PPU) and comprehensive place of use (POU) for the Applicant's irrigation water rights used to irrigate the Applicant's farm lands associated with the Section 35 Property. The dairy waste water will be land applied to the remaining irrigable acres of the Applicant's associated farmland.

The Applicant anticipates phasing in the dairy operation over approximately eight years in approximate two-year increments. The applicant would dry up acres based on development, and coinciding with the phases. This transfer from irrigation to commercial/stockwater is for the completed dairy, which will have approximately 36,720 milking cows, 5508 dry cows, and 5340 replacement heifers. The unique operational aspects of the proposed dairy include rotary milking barns, reuse of cooling water, and no misting or sprinkler use for the cows. The dairy will use Jersey cattle exclusively, with estimated average size, milk production and fat content of: 1000 lb milking cows, 58.9 lb of milk per day, and 4.7 % milk fat (Exhibit A).

The dairy consumptive use has been estimated using the LCO Water Usage spreadsheet developed by Brockway Engineering LLC (Exhibit B), and compared with the IDWRmyDairy spreadsheet (Exhibit C). The results of the two methods are summarized in Table 1. The Brockway analysis estimated a total diversion volume of 1,782.9 acre-feet per year. Currently, Applicant's commercial/stockwater rights for the existing feedlot allow diversion of up to 1,145.6 acre-feet, resulting in an additional 637.3 acre-feet needed for the dairy conversion at build-out. The IDWR model estimated 12% less volume, mainly attributable to commercial use estimates. We were unable to confirm the model used in the IDWR spreadsheet to fully understand the differences between the methods. The commercial volumes within the Brockway spreadsheet were determined from the manufacture's data sheets (Exhibit B). The Brockway results are more conservative than those derived from the IDWR model, and thus are the values used for this transfer to ensure sufficient water rights for the completed dairy.

The historical beneficial use of WR 43-13452 is irrigation for 329.4 acres using 2.72 cfs and 1,292.8 acre-feet annually. The highest-consumption crop was determined to be alfalfa based on the attached Farm Service Agency crop reports (Exhibit D) and summarized in Table 2. Using the information supplied by ET Idaho (Allan and Robison 2012) for Malta, Idaho, the maximum consumptive use attributable to this water right when applied to alfalfa is 3.0 acre-feet per acre (Table 3). The Applicant proposes to cease

irrigation on 212.4 acres out of the 329.4 allowed by WR 43-13452 to supply the additional 637.3 acre-feet of consumptive use required for stockwater and commercial use on the new dairy at build-out. The acres identified for this irrigation to commercial/stockwater transfer are delineated in Attachment 7a. The initial POU and final POU for the accompanying transfer is in Exhibit E.

Part of the acres for the transfer proposed to be dried up are currently defined by the place of use as within the boundary of the feedlot, but are currently irrigated at another location. The legal description of the area is 11S 27E Sec. 35, and applies to 71.1 acres. The acres are accounted for as irrigated within the last five years as part of the companion transfer that combines all three hydraulically connected farms into a place of use within a permissible place of use.

SUMMARY

The Applicant requests that the Department authorize eight years to complete the change from irrigation to commercial/stockwater purposes based on the projected construction timeline. The estimated consumptive use for the dairy is the result of Jersey cattle data for Idaho and the manufacturer's data for the milking barns. Estimated consumptive use for the dairy as determined from the Brockway spreadsheet are conservative, and will ensure sufficient water is transferred for the complete dairy. The transfer can be reviewed at each phase to ensure that water usage is in line with estimates. The accompanying PPU Transfer enables the Applicant to maximize beneficial use on the associated farms, within the limits of its irrigation water rights and efficiently apply residual waste water to remaining irrigable acres because the associated farmland acres are all hydraulically connected and the future dairy with mainlines and pumps.

FEE MEMORANDUM

Date: August 1, 2016
To: East Valley Cattle Transfer - Dairy #80639
From: Jim Bitzenburg
Re: Receipting of fees paid – 2nd memo

This memo covers fees which have come to light after approval of the first East Valley Cattle transfer to create the irrigation PPU. In reviewing the dairy transfer (80639), I noticed that East Valley Cattle added several irrigation PODs to the transfer on February 29, 2016, after the first Fee Memo was composed. This means that the total transfer rate would increase from the 1.75 cfs which was being converted from irrigation to stockwater/commercial to a total of 4.61 cfs (2.86 cfs already at the dairy). This is because the 1.75 being converted, plus the 2.86 at the dairy would now be diverted from 8 total PODs, instead of the original 3. The fee for 4.61 cfs is \$820.00 and \$580.00 of that has already been paid. This left a shortfall of \$240.00, which was paid by Brockway Engineering with check #13484, on July 28, 2016 (receipt #S035624).

Re: East Valley Cattle LLC, Stock water Transfer #80639

Dear Mr. Bitzenburg:

Recent correspondence from you indicated that the stock water transfer for East Valley Cattle is ready for advertisement. During the review of the transfer, the stock water transfer was modified to include additional PODs for the existing stock water rights for 2.86 cfs of diversion. The total water requested to be transferred is now 4.61 cfs and includes: 1.75 cfs from irrigation to stock water and 2.86 cfs of stock water to the irrigation PODs. The total fee for the stock water transfer, change of use, and additional PODs is \$820.00. Fee to date paid is \$580.00, leaving a residual fee of \$240.00 due to the IDWR.

Thank you for your help on this transfer. The enclosed check for \$240.00 dollars will provide for the additional fee needed to process the transfer. Please let me know if you have any questions.

MEMORANDUM

Date: July 22, 2016
To: East Valley Cattle LLC Dairy Transfer 80639 File
From: Jim Bitzenburg
Re: Evaluation of Sufficiency of Information Submitted

Application for transfer proposes to change the nature of use, place of use (POU), points of diversion (POD), and period of use for a 1.75 cfs, 212.4 acre portion of irrigation water right 43-13452 which currently irrigates 329.4 acres within a 9204.0 acre permissible place of use located approximately 6.8 to 14.3 miles north and 2.5 to 8.4 miles east of Malta. The application proposes to change the nature of use and POU of these rights from irrigation during the irrigation season to year-round stockwater/commercial use at a CAFO located approximately 4.8 to 5.8 miles east and 7.5 to 8.5 miles north of Malta. The transfer proposes changing the POD for the converted portion from the currently authorized irrigation wells to eight wells to be associated with the CAFO facility. The transfer also proposes to add five existing points of diversion to the three currently authorized CAFO wells for the nineteen rights currently appurtenant to the CAFO. The twenty rights will allow for the total diversion of 4.61 cfs from eight authorized PODs for the CAFO facility.

The transfer should be advertised because it changes PODs in the Raft River Critical Ground Water Area and changes the nature of use and season of use for of a portion of an adjacent irrigation water right.

Proposed transfer is in Water District 143 and Watermaster comments will be solicited.

- **Authority to File:**
The Department's database indicates that the water rights involved are owned by the applicant, East Valley Cattle, LLC. The application was signed by Bill Millenkamp, the manager of East Valley Cattle, LLC. See attachment from the Idaho Secretary of State office, 'Annual Report Form', for East Valley Cattle, LLC.
- **Water Right Validity:**
Based on aerial imagery and FSA records, forfeiture of the irrigation right being converted does not appear to be an issue.
- **Injury to Other Water Rights:**
None anticipated or foreseen. The PODs being added to the stockwater/commercial rights are located immediately adjacent to, or within, the CAFO. .
- **Enlargement of Use:**
None anticipated. The acres being converted from irrigation to the CAFO will be dried up. The irrigation to stockwater and commercial use conversion is based on a consumptive use value (3.0 afa per acre for alfalfa hay in the area) for the acres being dried up. Basing the conversion on consumptive use, rather than the allowable diversion volume actually results in an overall reduction in total allowable diversion volume if the transfer is approved as proposed.
- **Local Public Interest:**
No issues anticipated. The application will be advertised.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.

- **Effect on the Economy of the Local Area:**
None Anticipated
- **Effect of the Agricultural Base of the Area:**
None Anticipated

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Hattie-

I am finally to the point of being able to put the East Valley Dairy transfer into advertising next week, and in getting everything together, I noticed that we added the five extra irrigation PODs to the 19 existing feedlot water rights, which adds cfs (2.86 cfs) to the amount originally paid for, since the 2.86 cfs will be pumped through additional PODs. This was done after we re-worked the fees in mid-February. I believe the less expensive route to go is to look at it this way:

The total cfs for the dairy transfer is now 4.61 (1.75 from irrigation to dairy, 2.86 already at dairy). The fee would be \$820.00, but \$580.00 of that has already been paid. So that would leave \$240.00 needing to be paid by next Wednesday, July 27.

If you have any questions, as always, feel free to call and harass me.

Dear Jim,

We haven't talked in a couple of weeks, and I hope things are going well. A few updates on the two East Valley Cattle Transfers:

We spoke a few weeks ago about the PODs on the stock and commercial transfer for East Valley Cattle. I finally talked with the owner. He would like to add the irrigation PODs as shown on the attached sheet. Please review the proposed changes. The diversion to stockwater and commercial would all be metered separately from the irrigation, and could be easily checked.

The owner also agreed with the 5 year time limit. We would like a memo included in the backfile to document the recommended conversion rates. The goal of the memo is to communicate the transfer complexities if we have to place any unused water the Water Supply Bank after 5 years.

Thank you,

Hattie-

Yes, it's me again. With the increased flow rate on the irrigation transfer (from 113.86 cfs to 114.74 cfs) an additional fee of \$20.00 will be necessary. No hurry on this, and please, always, double check my findings to see if you agree. I attached a short summary to show the fee transactions to date. Thanks for all of your help.

FEE MEMORANDUM

Date: February 18, 2016
To: East Valley Cattle LLC Irrigation PPU #80638 and Dairy #80639 transfer file
From: Jim Bitzenburg
Re: Receipting/disposition of fees paid

These two transfers were filed in the Southern Region office on January 14, 2016 along with a check for \$6000.00 (receipt S035205, Brockway Engineering, check #13122). Upon receipt, the fee was split between the two transfers as follows: \$5,500.00 was credited to the Irrigation transfer (80638) and \$500.00 was credited to the Dairy transfer (80639). Transfer 80638 involves the addition of all of the PODs on three separate farms to all of the rights involved, as well as creating a PPU of the combination of the three farms. The cfs of all of the rights is 113.86, so from the transfer fee schedule, 100 cfs is \$5220.00 and the additional 13.86 cfs would cost \$280.00 more for a total of \$5500.00.

The Dairy transfer is changing the nature of use for 1.75 cfs from irrigation to stockwater/commercial, so that fee would be \$580.00 for the cfs, and \$250.00 for the change in nature of use for a total of \$830.00. This fee paid was deficient \$330.00. The representative was contacted and a check for the extra \$330.00 was received (receipt S035218, Brockway Engineering, check #13141).

Upon further review of the irrigation PPU application 80638, it was necessary to amend the application flow rate from 113.86 cfs to 114.74 cfs which increases the fee by \$20.00 (1 cfs x \$20.00). The representative was contacted by email on 2/11/16. On 2/18/16, a check for \$20.00 was received to cover the additional cfs (receipt S035282, Brockway Engineering, check #13192).

Hattie-

I was going through the Irrigation transfer, and on the application under 5., f., it says that the diversion system for the stock facility is connected to the irrigation system. The stock/commercial rights all list 3 PODs, two of which we have included in the transfer, and the third, T11S, R27E, Section 26, SESWSE, we don't. It doesn't show that the irrigation rights are diverted from it, so maybe it is not connected with the irrigation system. Will it be connected? Or is it already? When you get a minute, could you check that out and let me know? No hurry, I've got lots of other work to do on it.

Thanks.

Re: Alfalfa hay grown under water right 43-13452

Application for transfer proposes to dry up 212.4 acres under this right and convert them to a dairy. I checked the FSA 578 forms and maps submitted by the applicant's representative and found many more acres of alfalfa hay grown than are necessary. Two side by side pivots totaling 264 acres were found in 2010. They are on the 578 form from 2010 and are on Farm # 4851, Tract 1699.

Re: East Valley Cattle LLC Irrigation POU/PPU and Stockwater and
Commercial Transfer

Dear Mr. Merritt:

East Valley Cattle LLC is a farming and cattle operation located in Raft River, near Malta, Idaho. Two transfers for the applicant are included. The first transfer proposes to combine the three separate Places of Use into a Place of Use within a Permissible Place of Use. The irrigation transfer will also update the irrigation shape file for the current farming operations. The second transfer proposes to change the nature of use of a portion of an irrigation water right to stockwater and commercial use for a dairy conversion.

The irrigation transfer will create a permissible place of use of 9,205 acres. The initial Place of Use for irrigation will total 7,363 acres. All of the farms included in the transfer will be hydraulically connected. The final Place of Use will dry up 212.4 acres that will be transferred to stockwater and commercial use resulting in a final Place of Use for the irrigation on the farm of 7,150.6 acres.

The stockwater and commercial transfer will ensure that there is sufficient water for conversion of the current stock operation to a Jersey Cow dairy over the next eight years. The existing stockwater and commercial water rights total 1,145.6 acre-feet annually. The required volume for the dairy conversion was modeled to be 1,782.9 acre-feet annually. Therefore, the total volume of water recommended for the transfer is the difference of 637.3 acre-feet.

The timeline for the conversion of the existing facilities to the dairy is expected to be eight years. The applicant requests eight years for the completion of the transfer enabling the stockwater and commercial transfer to be in step with the dairy conversion timeline. The Place of Use for the Irrigation will be updated yearly to reflect acreage idled for the stock and commercial transfer. The extended timeline is requested due to the complexity and scope of the two transfers.
