Subject: RE: Cockrell Application for Permit 74-16010

Ann,

When I spoke with Orie Cockrell a couple of weeks ago, he mentioned that they wanted to file a transfer to move their Lemhi River point of diversion from a ditch to a pumping station on the River. I don't know what needs to occur before the transfer application is filed. (I don't know if the proposed project will be accomplished with grant money or cost sharing from fisheries groups). I am not opposed to holding off on holding a pre-hearing conference until the details of a possible transfer are more developed.

James

Subject: Cockrell Application for Permit 74-16010

Hello James,

I am writing on behalf of the IDFG and IWRB in regard to Application for Permit No. 74-16010 submitted by Lamar Cockrell and Sons, LLC. IDFG and IWRB both protested this application. However, it has come to my attention that IDFG has been working with Mr. Cockrell and that Mr. Cockrell has agreed to file a transfer that may resolve IDFG and IWRB's concerns with the application.

IDFG and the IWRB would request that the prehearing conference in this matter be delayed until Mr. Cockrell has had a chance to file his transfer with IDWR. It is my understanding that Mr. Cockrell has also agreed to delaying the prehearing conference. I have not contacted the other protestant (NMFS) regarding this delay, but have c/c'd them on this email.

Please let me know how you would like to proceed.

Sincerely,

Ann Vonde
