Nathan,

Attached is a spreadsheet that has the acres for each field totaling 4,271.86 acres presently irrigated. This is within our permissible place of use and I hope answers your original question about a 206 map.

Thanks and let me know if you need anything further to keep our rights current and correct.

Charlie

Nathan,

Attached is a map which shows all the irrigated fields and our numbering system for the fields. Does this answer your question?

Would you please send back a map showing the acres irrigated in each field?

Thanks,
Charlie

Here is a map of the entire farm with the irrigated acres currently identified in our system. If you could mark this up to represent what is currently being irrigated that should help us update our records. If you have any other questions please let me know.

Nathan,

I am the right person but I do not know what a "206 map" is. What do you need?

Thanks,

Charlie

Hi Charlie,

I show that UBS is listed as a contact for Eagle Creek Northwest LLC. We recently noticed that the water rights over in the Raft River area need to have the 206 map updated to include a half pivot (see the attached map), water right 43-2471 etc. Would you please let me know if you are the right person to ask for an updated 206 map or who should we contact.

Thank you,

Nathan
