Subject: Water Right Permit 82-12257

Hello Mr. Stickles,

The last time we spoke, you had submitted your proof of completion for water right permit 82-12257 without securing your Special Use Permit from the Forest Service. We talked about this issue, and you decided to withdraw your proof of beneficial use form until the Conditional Use Permit had been issued. One of the Forest Service representatives was going to visit the site to confirm the location of the spring and issue the Special Use Permit, which would allow us to move forward with licensing your permit. I am writing to find out if the Forest Service has issued your Conditional Use Permit. I also spoke with Molly Pusher of the US Forest Service, and she told me that they planned to visit the site as soon as the snow had cleared enough for them to determine what was going on at the spring.

If the Forest Service has issued the permit, then you can re-file your proof of beneficial use form, and we can move forward towards licensing the water right permit. I will do everything that I can to assist you in this effort. Please don't hesitate to contact me if you have any questions or concerns.

Respectfully,

Daniel Nelson
