Subject: RE: Application Amendment

Thanks JoAnne,

I'm sorry to do this, but I just spent the morning reviewing the corresponding transfer application. The proposed place of use for the transfer application also needs a small amendment. The SENE of Section 6, T7S, R44E should be designated as Lot 1 instead of Lot 3. I think you should add the SESE of Section 5, the NWNE of Section 8, and the NWSE of Section 9 to the place of use list. I also think the SWNE of Section 9 can be dropped from the place of use. (It may be that the SWNE of Sec. 9 was just an error and should have been marked in the NWSE.)

The points of diversion are correct.

One other change. On Part 1.B.1 of the application (on the same page as the proposed place of use), can you change the proposed nature of use from "mining" to "mining storage". The current water right authorizes "mining storage" and "mining from storage" as authorized beneficial uses. Identifying the new use as "mining" technically constitutes a change in nature of use and would require additional filing fees.

On a side note, I believe the existing water right 27-7302, contains an error. Both the "mining storage" element and the "mining from storage" element should have been for 150 acre-feet. The "mining storage" element was mistakenly listed as 3.6 acre-feet, the size of the retention pond. Because the pond fills and refills many times during the year, the "mining storage" element should have reflected the total volume of water stored in the pond over the course of the year (150 af). We will attempt to correct the error in the transfer approval document for this transfer.

The changes can be initialed by Mr. Haslam and scanned and emailed to me.

James

Good morning James

Attached is the amended application per your note; we appreciate you catching this error. Please advise if there are any further items that require attention.

Thanks again for your assistance.

Joanne,

I just discovered a minor error in the Application for Permit. The place of use list includes the NW1/4 of the SW1/4 of Section 9, T07S, R44E. Based on the map, I think you intended to describe the SW1/4 of the NW1/4 of Section 9. In other words, I think the designations got flipped (which happens all the time). The place of use needs to be amended to mark an "X" in the SWNW of Section 9, rather than the NWSW.

This is a very minor change. It can be done by making the amendment to the POU page and having Mr. Haslam initial or sign the amended page. You can scan the amended page and send it to me by email. I don't need the original.

That is the only change needed on the Application for Permit. I'll let you know if I find anything on the Transfer Application.

Thanks,

James

Subject: Re: Applications

Thanks for the update, James. Sorry for my delay as well; I have been on the road since last week.

Please let us know if there are any problems or questions.

Best regards,

JoAnne

Joanne,

Sorry for the delayed response. I received both of Agrium's applications in late June. I will conduct a preliminary review of the applications next week and prepare them for public notice. The applications will likely be published in the first and second weeks of August. If no protests are filed against the applications, a final decision will be made by the end of August.
