CONDITIONS OF APPROVAL

1. Commercial use of the water is for a dairy located in the SWNW, S26 and the NENE, S27, T01S R02W.
2. The water used for commercial purposes under this right may be applied to, and irrigate land listed in, the place of use to satisfy water quality requirements. Water shall not irrigate growing plants unless the water is first beneficially used in the dairy as authorized by this water right.
3. Ground water diverted under rights 63-2712, 63-2955, and 63-3099 is the sole source of irrigation water for five (5) acres within the permissible place of use approved by Transfer No. 80024. Ground water delivered to the remainder of the place of use supplements surface water irrigation.
4. Diversion from the well located in the SENW S15, T01S R02W, is limited to 2.00 cfs (900 gpm) and 157 acre feet annually.
5. Rights 63-2712, 63-2955 and 63-7814 when combined for dairy use shall not exceed a total diversion rate of 1.06 cfs, and/or a combined total annual volume for both stockwater and commercial use of 134 acre-feet. Because the annual volume for both stockwater and commercial use was reduced from the quantities sought by the application for transfer (Transfer 5356), the permit holder must determine the division of the 134 acre-feet into stockwater and commercial components.
6. This right is limited to the irrigation of 380 acres within the authorized place of use in a single irrigation season.
7. Rights 63-2712, 63-2955 and 63-3099 when combined for irrigation purposes shall not exceed a total combined diversion rate of 9.76 cfs, a total combined annual diversion volume of 2029.5 af at the field headgate, and the irrigation of 451 acres.
8. Rights 2-7109, 63-2631A, 63-2631C, 63-2632A, 63-2632C, 63-2712, 63-2955, and 63-3099 when combined shall not exceed a total irrigation of 1,254 acres.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
10. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department as part of the diverting works, including if determined necessary by the Department, a separate measuring device and lockable controlling works for measurement and control of water delivered to the dairy.

WATER RIGHT NO. 63-2712

As Modified by Transfer No. 80024

CONDITIONS OF APPROVAL

11. If the surface water right(s) appurtenant to the place of use for this right is unavailable for any reason other than drought or curtailment by priority (for example abandoned, forfeited, sold, transferred, leased, used on another place of use, or disallowed by court decree), the right holder shall not divert ground water for irrigation purposes on the land with appurtenant surface water rights without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
12. The right holder shall annually report diversions of water under this right to the department.
13. The issuance of this right does not grant any right-of-way or easement across the land of another.
14. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
15. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
16. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 8/26/2014.
