RE: Amendment Required for Application 67-15158 & 67-15159

Dear Applicant,

In May and June of 2016, you filed two applications for permit to appropriate water for an irrigation use in Section 8, Township 10 North, Range 5 West. After review of the document an amendment is required to complete the application process.

The 0.20 cfs diversion requested from the Snake River in application 67-15159 exceeds the diversion rate per acre limit on 5 acres. A 5 acre parcel may receive up to 0.10 cfs, unless the applicant provides information that justifies an increased rate per acre.

Ground water application 67-1558 for 16 acres is requesting a total diversion of 0.08 cfs. 16 acres may receive as much as 0.32 cfs when combined with all other rights, and it is recommended you increase the diversion rate. An application for 0.32 cfs would require an additional fee of \$150, however you may apply for up to 0.20 cfs without further fee requirements.

Please make the appropriate amendments and submit them for the applications to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov.

Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Re: Water Right Application Incomplete - Returned

Dear Applicant:

This office received your application on April 25, 2016. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following item is addressed:

- Section 4- No purpose of use was listed. You must also provide a rate of diversion for each of your described uses. This number should be included in section 4 next to "amount" for each of the uses. The combined rate should also be included in section 5 for total quantity to be appropriated.
 - Department standards allow for .02 cfs of water per acre. 16 acres would amount to .08 cfs and 20 acres to .1 cfs.
 - If you are planning on irrigating half an acre of your lawn with the domestic part of your request, then the standard diversion rate for the domestic use is .04 cfs. If your lawn will be watered under the irrigation portion of your request and you are only using the domestic part for internal uses, the standard diversion rate for the domestic use is .02 cfs.
- Section 5- Provide the total rate of diversion. The amount entered in section 5 may be less than the total of the amounts listed in section 4. However, it must be at least equal to the largest amount in section 4. The acre-foot amount should not be entered unless storage of water is proposed
- Section 8B- Locate all proposed uses listed in Section 4 by writing in the townships, ranges and sections. Identify the uses within each 40-acre tract with the appropriate symbols. The total number of acres to be irrigated does not match what you have provided in the sections.

The original incomplete application is enclosed. Please make the necessary amendments to the original form and re-submit within the next thirty (30) days. This letter is an attempt to ensure that your application is complete in order to establish a priority date. You may receive future correspondence regarding more specific details of your application. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult the IDWR website or contact this office at (208)334-2190 and ask for the "office day person" if you have any questions about the necessary information.

Sincerely,

Western Region Water Rights Staff
