Re: Water Right Permit No. 63-33952 (Snake River Dairies LLC)

Dear Nick:

Thank you for IDWR's recent issuance of the above-referenced water permit. The permit itself appears accurate to me, but I do want to clarify an issue with respect to the place of use map that was enclosed with the permit, which I have enclosed here for your convenience.

The map depicts a defined place of use along the southern boundary of the NWSE and the NESE. However, as you may recall, IDWR's place of use map for existing license 63-11633, which I have also enclosed here, has never designated the specific place of use acres within those same two quarter-quarter sections. The beneficial use field exam report for 63-11633 stated that it was irrigating the "northern portion" of the property, so presumably that is why IDWR designated 63-33952 as irrigating the southern portion of those quarter-quarter sections. Still, Scott King and I are not sure the place of use within those quarter-quarter sections for 63-33952 can be identified with such precision at this time, and wanted to note that in advance of the beneficial use field exam. In other words, if the field exam for 63-33952 does not show irrigation limited to those specific 10 acres, we do not believe that should be viewed as an inconsistency with the permit that would require a licensing amendment.

Again, the permit itself appears accurate to us, and we do not believe that anything further is required on this issue. We simply wanted to note this issue for the upcoming beneficial use exam and licensing.

IRRIGATION

The map depicts the place of use for the water use listed above and point(s) of diversion of this right as currently derived from interpretations of the paper records and is used solely for illustrative purposes. Discrepancies between the computer representation and the permanent document file will be resolved in favor of the actual water right documents in the water right file.
