APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant(s) Cameron L. Rolle and/or Timothy D. Carroll Phone (541) 326-8100
 Name connector (check one): ☐ and ☐ or ☒ and/or
 Mailing address 10 W Infanger Ct. City Salmon
 State ID Zip 83467 Email Cameron.rolle1@gmail.com
2. Source of water supply Groundwater which is a tributary of...
3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
20N	21E	01	01	NE	NE		LEMHI	Groundwater	

4. Water will be used for the following purposes:

changed by C.R.
 Amount 0.12 cfs for Irrigation purposes from April 1 to Oct 31 (both dates inclusive)
 (cfs or acre-feet per year)
 Amount 0.04 cfs for Domestic purposes from Dec 31 to JAN 1 (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) 0.08 cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).
 6. Proposed diverting works: 16 CFS (changed by C.R.)

- a. Describe type and size of devices used to divert water from the source. Submersible pump (up to 1 1/2 HP)
to 1 Household Domestic System And Low-Pressure Irrigation System
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is 8 inches; proposed depth of well is 100 feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? N/A; drilling firm _____;
 well was drilled for (well owner) _____; Drilling Permit No. _____

7. Description of proposed uses (if irrigation only, go to item 8):

- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; complete and attach the Municipal Water Right Application Checklist.
- d. Domestic; show number of households One Household

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
20N	21E	01	D																
20N	21E	01	4																

Total number of acres to be irrigated: 4

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping?

There are no other water rights on the property. We intend to use the irrigation portion of the right to cover the landscaping water needs.

10. a. Who owns the property at the point of diversion? Timothy D. Carroll and Cameron L. Rolle
- b. Who owns the land to be irrigated or place of use? Timothy D. Carroll and Cameron L. Rolle
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing:

N/A

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

We intend to Drill A Culinary well for Domestic use of one household and for Farm purposes. The house will be constructed within 5 years and the irrigation Right will be used on up to 4 acres for vegetable, fruit tree, and herb production as well as general Landscaping. Low Pressure drip irrigation components will be used.

12. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

13. MAP OF PROPOSED PROJECT REQUIRED - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Application For Permit No. 75-14843

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 7/7/2016 and 7/14/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in cursive script, reading 'Jean Hersley'.

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 80936**

KAREN A DOWTON and SYDNEY M DOWTON, PO BOX 7, ELLIS, ID 83235; has filed Application No. 80936 for changes to the following water rights within LEMHI County(s): Right No(s). 73-2170; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx. The purpose of the transfer is to change a portion of the above rights as follows:

To change the point of diversion to SWSW, Sec 16, T15N, R21E for 1.60 cfs from the Pahsimeroi River adjacent to the place of use. For additional information concerning the property location, contact IDWR State office at (208) 287-4800; or for a full description of the transfer, please see <http://www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm> Protests may be submitted based on the criteria of Idaho Code Sec. 42-222. Any protest against the proposed change must be filed with the Department of Water Resources, 322 E Front St, PO Box 83720, Boise ID 83720-0098 together with a protest fee of \$25.00 for each application on or before 7/25/2016. The protestant must also send a copy of the protest to the applicant.

CAMERON
a Tim Carroll
Ident NO: 75-14843
10 W. Infanger Ct.
Salmon, ID 83467

Dear Idaho Dept. of Water Resources,

I Believe my plan for development of this water right will be in the local public interest and will benefit fish habitat in the following ways:

1. Production of sustainable food for the local community using organic and water saving methods - I plan to irrigate fruit trees and vegetable crops using high-efficiency drip irrigation; replacing food purchased from unsustainable commodity sources that have high inputs of water and harmful pesticides/herbicides.
2. I commit to restoring streambank stabilizing and shade species along the section of Perreau Creek that runs through our property. I will use native species such as booth and geyer willow, Black Cottonwood, thinleaf alder and currants. Trees I plant elsewhere on the property will increase the moisture holding capacity and reduce erosion on site.
3. I commit to preserving a portion of the land - (1/2 to 1 acre) - in it's natural sagebrush steppe state. We have a wonderful opportunity for preservation on this property as it has not been farmed or grazed actively. this portion of the land will not be irrigated, and native dryland species will be encouraged to grow there, further reducing water use.

MEMORANDUM

Date: May 31, 2016
To: Water Right File 75-14843
From: medl
Re: priority date

During the review of this application for permit, I found that the applicant had not requested the standard diversion rate for the irrigation use. I notified the applicant by phone and email messages that they had potentially short-changed themselves.

I sent page 1 of the application via email today and received the scanned image showing the corrections, later today.

The wet-ink page will be returned to me by standard mail as soon as possible. As a consequence of the rate increase, the priority date has been advanced from May 26, 2016 to May 31, 2016.

MEMORANDUM

Date: May 31, 2016

Thank you for your clarity Michelle, I have increased the amount of the total cfs to .16 and the irrigation portion to .12. Please see attached scanned document and attach it to my application.
Have a wonderful day.

On Tue, May 31, 2016 at 12:51 PM, Edl, Michele <Michele.Edl@idwr.idaho.gov> wrote:

Cameron Rolle, Timothy Carroll,

I have been assigned to process your application for permit 75-14843.

Cameron, I you a voice-mail message a few moments ago. This email in the promised follow-up.

You will be receiving a letter from IDWR which invites you to provide any other information relevant to processing this permit but which wasn't submitted with the application for permit package. Because this area provides salmon habitat, IDWR (and you) are required to work through some additional steps.

I have begun the review of your application and I have found that you may be shorting yourself.

Your proposed place-of-use is within an irrigation zone which has a bigger allowance for rate per acre than the rate you have proposed in your application. You propose to irrigate 4 acres but have only requested 0.04 cfs as the rate for that irrigation. In that area of the state, and for fields which are less than 5 acres, IDWR standards allow for 0.03 cfs/acre or 0.12 cfs (4 acres x 0.03 cfs/acre= 0.12 cfs).

At this stage in the water rights processing, it is better to be optimistic. If at a later stage, we find that you chose not to irrigate the full 4 acres, or that your pump couldn't deliver the rate or whatever, IDWR can trim this water right permit back to a smaller amount, but we can't add to it. S

Your permit could authorize 0.04 cfs for domestic use and 0.12 cfs for irrigation use and still be covered by the fee that you have already paid. The only penalty will be to your priority date. Your priority date will be advanced the number of days that it takes you to provide a confirmation of this change. Therefore, I am sending you a PDF copy of the first page of your application. If you wish to increase the rate for your irrigation use to 0.12 cfs in item 4 and then also change the total quantity in item 5 to 0.16 cfs. Please initial those changes, and send the page back to me at your earliest possible convenience.

If you don't wish to make those changes, please contact me and I will proceed with the processing of your application.

Sincerely,

Michele Edl

Subject: application for permit 75-14843
Attachments: DOC005.pdf

Cameron Rolle, Timothy Carroll,

I have been assigned to process your application for permit 75-14843.

Cameron, I you a voice-mail message a few moments ago. This email in the promised follow-up.

You will be receiving a letter from IDWR which invites you to provide any other information relevant to processing this permit but which wasn't submitted with the application for permit package. Because this area provides salmon habitat, IDWR (and you) are required to work through some additional steps.

I have begun the review of your application and I have found that you may be shorting yourself.

Your proposed place-of-use is within an irrigation zone which has a bigger allowance for rate per acre than the rate you have proposed in your application. You propose to irrigate 4 acres but have only requested 0.04 cfs as the rate for that irrigation. In that area of the state, and for fields which are less than 5 acres, IDWR standards allow for 0.03 cfs/acre or 0.12 cfs (4 acres x 0.03 cfs/acre= 0.12 cfs).

At this stage in the water rights processing, it is better to be optimistic. If at a later stage, we find that you chose not to irrigate the full 4 acres, or that your pump couldn't deliver the rate or whatever, IDWR can trim this water right permit back to a smaller amount, but we can't add to it. S

Your permit could authorize 0.04 cfs for domestic use and 0.12 cfs for irrigation use and still be covered by the fee that you have already paid. The only penalty will be to your priority date. Your priority date will be advanced the number of days that it takes you to provide a confirmation of this change. Therefore, I am sending you a PDF copy of the first page of your application. If you wish to increase the rate for your irrigation use to 0.12 cfs in item 4 and then also change the total quantity in item 5 to 0.16 cfs. Please initial those changes, and send the page back to me at your earliest possible convenience.

If you don't wish to make those changes, please contact me and I will proceed with the processing of you application.

Sincerely,
Michele Edl
208-287-4946

MEMORANDUM

Date: May 31, 2016
To: Water Right File 75-14843
From: Michele Edl
Re: Application Review

Applicant

According to available Lemhi County taxlot information, the POU is property owned by Timothy Carroll. Cameron L Rolle is not listed as an owner of the taxlot, although she is listed as one of two grantees on the Warranty Deed which was included with the application package.

The applicant has not yet responded to IDWR's local public interest letter. (Sent today 5/31/2016)

Source & POD

The source of the water will be groundwater is which tributary to the Salmon River. The proposed well is within a Wild and Scenic area and subject to those processing steps.

Perreau Creek runs through this property. The distance to the creek from any point on the lot is less than 300 feet, which means that the proposed well may be directly connected to Perreau Creek.

I created the POD shape based on the application shape.

Water Use

The application proposes use of ground water for domestic and irrigation uses on the property. The house is not yet constructed but the applicant anticipates that its construction will be completed within the five years.

The application for permit requested lower rate for irrigation than the IDWR standard for the area. I connected with Cameron Rolle on 5/31/2016 and discussed the rate with her. She decided to amend the application and sent a scanned copy of her initialed changes to page 1 of the application. I requested that the 'original' be sent in the mail as soon as possible.

POU

The place-of-use is the entire property which is approximately 4.5 acres. The POU is also known as Lot 18, Block 1, Amended Perreau Creek Subdivision.

I created the POU shape based on the taxlot and application layers.

POU/POD overlap analysis

No other rights were found to overlap the property.

Conditions

The proposed POU and POD are not currently located within a water district but IDWR anticipates that they will be. The permit is conditioned with measuring device and watermaster control notifications.

RE: Application to Appropriate Water in the Upper Salmon River Basin 75-14843

Dear Water Right Applicants:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund
- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

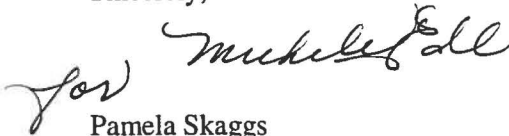

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the draft Comprehensive State Water Plan under revision by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery. Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at 208-287-4951, or email me at pam.skaggs@idwr.idaho.gov.

Sincerely,

A handwritten signature in cursive script, appearing to read "Pamela Skaggs".

RE: Application for Permit

Dear Applicant(s):

The Department of Water Resources has received your water right application. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. We are returning your application to allow you to complete the necessary items. The required information is described below.

- Clarification of the source of water supply. On item #2 you listed Perreau Creek with the tributary of Salmon River and on item #3 the source is ground water. Ground water would be considered a well.
- Page 2 of the Application for Permit. Please fill out the enclosed page 2 and return to the Department.
- Filing fee of \$100

Please feel free to contact me at (208) 287-4942 if you have any questions.

Sincerely,

Jean Hersley

1. Name of applicant(s) Cameron L. Rolle and/or Timothy D. Carroll Phone (541) 326-8100
 Name connector (check one): ☐ and ☐ or ☒ and/or
 Mailing address 10 W Infanger Ct. City Salmon
 State ID Zip 83467 Email Cameron.rolle1@gmail.com
2. Source of water supply Perrean Creek which is a tributary of Salmon River
3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
20N	21E	01	01	NE	NE		LEMHI	Groundwater	

4. Water will be used for the following purposes:
- Amount .04 cfs for Irrigation purposes from April 1 to Oct 31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount .04 cfs for Domestic purposes from Dec 31 to JAN. 1 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
5. Total quantity to be appropriated is (a) .08 cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).
6. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. Submersible pump (up to 1 1/2 HP)
to 1 Household Domestic System And Low-Pressure Irrigation System
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is 8 inches; proposed depth of well is 100 feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? N/A; drilling firm _____;
 well was drilled for (well owner) _____; Drilling Permit No. _____.
7. Description of proposed uses (if irrigation only, go to item 8):
- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; complete and attach the Municipal Water Right Application Checklist.
- d. Domestic; show number of households One Household
- e. Other; describe fully. _____

Warranty Deed

For Value Received

Joseph A Woods and Sheila S Woods, husband and wife

the grantors, do hereby grant, bargain, sell and convey unto

Timothy Carroll, an unmarried man and Cameron Rolle, an unmarried woman

Whose current address is:

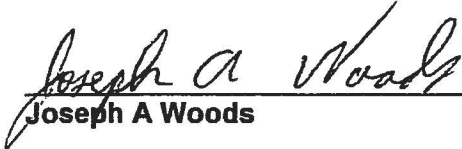

**10 W Infanger Court
