

MEMORANDUM

Date: June 17, 2016
To: Transfer 80990
From: Blake Jordan
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to change the place of use for water right 21-7050. Department records do not correctly describe the actual irrigated place of use. The applicant seeks to change the place of use to accurately describe the current acres being irrigated under the right.

The total number of acres being changed through this transfer is 5.1 acres which equates to 0.1 cfs. The filing fee for this application was based on 0.1 cfs.

Authority to File:

The applicant is the current owner of water right and current owner of the proposed place of use per quit claim deed. In September, 2015 Unit 1 LLC filed an ownership change application seeking to update Department records for water rights 21-7050 and 21-7564. However, due to the place of use discrepancies contained in these water rights the applicant proposes to first correct the place of use by filing transfers 80989 (21-7050) and 80990 (21-7564). Once the transfers are approved then the ownership change applications will be processed.

Water Right Validity:

Decreed in 2011. Forfeiture is not an issue.

Injury to Other Water Rights:

This water right sits inside the ESPA and is regulated by WD 100. This transfer seeks to rearrange the place of use. The point of diversion will not change. This transfer will be processed with no advertisement. The watermaster does not oppose the application. No injury issues identified.

Enlargement of Use:

No issues identified.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Effect on Economy the Local Area:

No issues identified.

Effect on Agricultural Base of the Local Area:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
