

MEMORANDUM

Date: June 13, 2016
To: Transfer 80904
From: Kerrie Mathews
Re: Transfer Evaluation

Transfer No. 80904 proposes to move a 7.1-acre portion of water right 32-7034E to a new place of use with a new point of diversion. Associated water rights 32-13335 thru 32-13340 (for the split portion) were added to this transfer to update the combined limit conditions. A companion transfer may be filed in the future to rearrange the place of use for the remaining portion of water right 32-7034E.

Authority to file:

The water right and the current place of use are in the name of Chad Larsen. The application contained a statement from Chad Larsen authorizing a split of water right 32-7034E and moving the 7.1 acre split portion to property owned by Paul and Katie Larsen. Ownership of the 7.1 acre water right will be updated to Paul and Katie Larsen. Applicants paid the fee to split the water right and update the ownership.

Validity of the Water Right:

Water right 32-7034E was licensed on October 10, 1996. Aerial photography shows consistent irrigation and forfeiture does not appear to be an issue.

Injury to Other Water Rights:

No injury to other water rights was identified. An ESPA analysis was not conducted. The existing and proposed PODs are in adjacent cells and an analysis is not required. The application was advertised, no protests were received. The water master for WD110 was notified of the transfer and did not oppose the transfer.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issues identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this transfer application.
