

RECEIVED
MAY 31 2016DEPT OF WATER RESOURCES
SOUTHERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCESTransfer No. 80971MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Jack W Flammer JrCheck whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.Yes N/A * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☒ ☐ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☒ ☐ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).**
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☒ ☐ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☐ ☒ #10 Other. Please describe: _____

A. PURPOSE OF TRANSFER

- ☒ Change point of diversion ☐ Add diversion point(s) ☒ Change place of use
☐ Change nature of use ☐ Change period of use ☒ Other Change of Source
- Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.2**.
Applicant seeks to transfer 2.0 acres of 37-159D to property owned by Edward A. and Julie C. Lawson. See attached purchase and sale agreement between current owner of 37-159D and Lawsons. Additionally, see narrative explaining water right transfer and purchase and sale agreement.

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Existing well will provide water to buried pressurized irrigation system on purchaser's property.

- b. Who owns the property at the point(s) of diversion? Purchasers (Lawson Family Living Trust)

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

N/A.

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: N/A.

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

N/A.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

Water right 37-8603 is authorized to irrigate 3.0 acres on purchasers property.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- | | | |
|--------------------------|-------------------------------------|---|
| ☐ | ☒ | undergone a period of five or more consecutive years of non-use, |
| ☐ | ☒ | currently leased to the Water Supply Bank, |
| ☐ | ☒ | currently used in a mitigation plan limiting the use of water under the right, or |
| ☐ | ☒ | currently enrolled in a Federal set-aside program limiting the use of water under the rights? |

If yes, describe:

DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 2

A. DESCRIPTION OF RIGHT(S) AS RECORDED

For each water right listed in Part 1B.1 of the application, attach a **Part 2A** report obtained from any Department office or from the Department's website @ www.idwr.idaho.gov, Water Right Transfers, Step 1.

Insert Part 2A reports into the application following Part 1.

B. IF ONLY A PORTION OF THE RIGHT IS PROPOSED TO BE CHANGED, DESCRIBE THE PORTION BEING CHANGED AS IT APPEARS BEFORE THE REQUESTED CHANGES

- ☒ Complete and attach one copy of Part 2B for each right for which only a portion is proposed to be changed. If the entire right is proposed to be changed, Part 2B is not applicable. Additional copies of the **Part 2B** form can be obtained from any Department office or from the Department's website @ www.idwr.idaho.gov, Water Right Transfers, Step 3, or Water Right Forms, Changes in Use. Insert completed Part 2B forms into the application following Part 2A of the same water right.

Right Number: 37-159D

APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**.

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the rights(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

**Jack W Flammer Jr- Stream Depletion Analysis for
Application for Water Right Transfer, 2.0 Acres of
37-159D**

To: Mr. Allen Merritt- IDWR Southern Regional Manager
From: Zach Latham
Cc:
Date: May 26th, 2016
Re: Jack W Flammer Jr - Stream Depletion Analysis for Application for
Water Right Transfer, 2.0 Acres of 37-159D.

This memo serves as a stream depletion analysis for the application for water right transfer filed by Jack W Flammer Jr. (Flammer). The transfer application seeks to split 2.0 acres of 37-159D and divert the proportionate flow rate from an existing ground water well on property owned by Edward A. and Julie C. Lawson, trustees of the Lawson Family Living Trust (Trust) near Bellevue, ID. Water right 37-159D is authorized to divert 0.10 cfs for the irrigation of 5.0 acres from the East Fork of the Big Wood River in T.03N R.18E Sec. 8 NE ¼ SW ¼. Currently, this water right is involved in an actively protested water right transfer no.79984. In order for the transfer protest to be resolved, acreage from 37-159D that was partially decreed in the SRBA on BLM lands needs to be transferred off. Filing this water right transfer application will allow that to occur.

The applicant proposes to transfer 2.0 acres of 37-159D to the Trust's property as the two parties have signed a purchase and sale agreement (attached) authorizing Flammer to file the attached application. Upon successful transfer of 2.0 acres of this water right, the portion of the right identified in the transfer will change ownership over to the Trust.

The Trust's existing 6" domestic well is located approximately 125' from the Big Wood River, is 121' deep and is drilled in gravels, sands and clays (alluvium). The local aquifer appears to be deeper than 120' per Lawson's and other surrounding well logs. A stream depletion analysis was performed to determine the portion of water supplied to the Trust's well by the Big Wood River using the Glover and Balmer method¹. This analysis calculated a transmissivity value of 10,871 ft²/day using data from a domestic well drilled for the Lawsons (attached). Additionally, a hydraulic conductivity value of 97.9 ft/day was calculated and both values were derived using data from the Trust well and transmissivity estimation² with effects of a partial penetration method³ (see attached analysis summary sheets and plot). Transmissivity, conductivity and storativity (0.15) values used in the stream depletion analysis are within the range of published values for alluvium in this area.

¹ Glover, R. E. and C. G. Balmer (1954) "River depletion resulting from pumping a well near a river". Am. Geophys. Union Trans. v. 35. pt. 3, pp. 468-470.

² Bradbury, K.R., and E.R. Rtothchild, (1985) "A computerized technique for estimating the hydraulic conductivity of aquifers from specific capacity data" Ground Water, v.23, no.2, pp. 240-246.

³ Sternberg, Y.M., (1973) "Efficiency of partially penetrating wells". Groundwater v.11 no.3 pp5-8.

The resulting analysis estimates approximately 73% of the proposed pumping (18 gpm) from the Trust's well (resulting from the water right supply bank rental application) originates from the Big Wood River within a 24 hour period, exceeding the 50% in 24 hour criteria set forth by IDWR Water Right Transfer Processing Memo No. 24. This same analysis using the methods outlined above has been approved in April of 2014 by IDWR in association with water right transfer 79140 among a number of other approved in the last five years.

Transmissivity Estimation with Partial Penetration

Bradbury and Rothschild (1985) specific capacity method.

Suitable for situations where a single time and drawdown measurement is available.

Includes effects of partial penetration using Sternberg (1973) approach.

Enter data in blue, pay attention to units.

AGREEMENT FOR PURCHASE AND SALE OF WATER RIGHT

THIS AGREEMENT FOR PURCHASE AND SALE OF WATER RIGHT is made and entered into as of April 6, 2016, by and between Jack Flamner, an individual ("Seller"), and Edward A. Lawson, as trustee of the Lawson Family Living Trust, under agreement dated November 29, 2011 ("Buyer").

RECITALS:

WHEREAS, the Seller owns Water Rights for irrigation of 5 acres appurtenant to Seller's real property commonly known as 113 Magic Mountain, Blaine County, Idaho identified by the Idaho Department of Water Resources ("IDWR") as Water Right Number: 37-159D, and more particularly described on Exhibit "A" to this Agreement ("Water Rights"); and

WHEREAS, the Buyer desires to purchase a portion of the Water Rights from the Seller in accordance with the terms herein below set forth;

NOW, THEREFORE, inconsideration of the mutual covenants, promises and conditions set forth herein, it is agreed as follows:

1. Purchase and Sale of Water Right.

Seller agrees to sell and convey, and the Buyer agrees to purchase 2 acres of the Water Right ("Conveyed Water Rights") to be transferred to Buyer's commonly known as 105 Lower Broadford Road, Blaine County, Idaho ("Buyer's Property").

2. Purchase Price/Closing Date/Contingency.

A. The purchase price shall be _____ per acre for a total purchase price of _____. Any amount of conveyance loss to be left in the original conveyance system for the Conveyed Water Rights shall be absorbed by Buyer. The purchase price shall be paid at closing which shall occur five (5) days from the date of the entry of the final order of IDWR approving the transfer on conditions acceptable to Buyer ("Final Order") and such Final Order having become non-appealable.

B. The issuance of the Final Order is a condition to Buyer's and Seller's obligations under this Agreement.

C. Neither Seller nor Buyer has used a broker with respect to this transaction and each agree to indemnify and holds the other party harmless from any and all claims for a commission arising from third parties claiming to represent them in connection with this sale.

3. Warranties and Disclaimer.

The Buyer acknowledges and agrees that they have been informed and understand that the Seller makes no warranties, express or implied, with respect to the Conveyed Water Rights.

4. Title

Title to the Conveyed Water shall be conveyed by Seller executing a Quitclaim Deed conveying all of Seller's rights, titles, estates and interest in the Conveyed Water to Buyer, free

and clear of all liens and encumbrances, once the Final Order has been entered and become non-appealable.

Buyer shall be responsible to pay for all fees and costs of the transfer, whether or not the transfer is approved by IDWR. Seller and Buyer shall jointly file the application for IDWR approval of the transfer. As the current owner of the Conveyed Water Right, Seller agrees to cooperate in the IDWR approval process by signing any and all necessary documents to facilitate the transfer, and Seller agrees to support the transfer before IDWR or any other applicable governmental entity or political subdivision.

5. Miscellaneous Provisions.

The representations, warranties, covenants and agreements of the parties contained in this Agreement shall survive the closing hereunder. This Agreement is being executed and delivered within the State of Idaho and shall be construed and enforced in all respects in accordance with the laws of the State of Idaho. This Agreement shall be binding upon and inure to the benefit of the heirs, personal representatives, administrators, successors and assigns of the parties hereto.

The parties agree that the terms, covenants and conditions of this Agreement shall supersede all such prior negotiations and agreements, and that there are no other agreements not contained in this Agreement, and that this Agreement shall be and is the final expression of the agreement of the parties and shall control. No modification of this Agreement shall be valid unless in writing and executed by the parties to the Agreement. In the event any provision of this Agreement or any part hereof shall be determined by any Court of competent jurisdiction to be invalid, void or otherwise unenforceable, the remaining provisions hereunder, or parts thereof, shall remain in full force and effect, and shall in no way be affected, impaired, or invalidated thereby, it being agreed that such remaining provisions shall be construed in a manner most closely approximating the intention of the parties with respect to the invalid, void or unenforceable provision or part thereof.

IN WITNESS WHEREOF, the parties have executed this Agreement the day and year first above written.

Irrigation Water Right 37-159D; Review of Sale Portion

To: Interested Brockway Engineering Clients
From: Zach Latham
Cc:
Date: August 31st 2015
Re: Irrigation Water Right 37-159D; Review of Sale Portion

The owner of irrigation water right 37-159D, Mr. Flammer, is a client of Brockway Engineering. Mr. Flammer has notified our office that 2.6 acres of his irrigation water right 37-159D are for sale. This memo summarizes the water right as it currently exists, the portion for sale, a historic water right cut-off analysis for this water right's priority date and baseline scenarios for potential future transfers of this portion of 37-159D to different locations up and down the Wood River Valley.

Irrigation water right 37-159D has a priority date of July 30th 1888 and is authorized to irrigate five acres from April 15th through October 31st annually using 0.10 cubic feet per second (48.8 gallons per minute) from the East Fork of the Big Wood River at the mouth of the East Fork Canyon in T.03N R.18E Section 8 B.M. Brockway Engineering is in the process of changing the place of use for the water right to describe the actual property owned by Mr. Flammer as a portion of the water right was decreed in the Snake River Basin Adjudication on BLM land. In order for the correction in the place of use to occur, the portion of the water right on BLM land must be moved to a different location; hence the need to sell a portion of the right.

The portion of water right 37-159D for sale is described as 52% of the water right which constitutes 2.6 acres, 0.052 cfs (23.3 gpm) and 7.8 acre-feet annually. This portion for sale authorizes a flow rate of 0.02 cfs or one miner's inch per acre or 9 gpm per acre, and a diversion volume limit of 3.0 acre-feet per acre. The flow rate and diversion volume are adequate to grow most crops (including turf) in the Wood River Valley.

When analyzing historic water right cut-off data for the Wood River Valley from 1948 through 2010, a water right administered from the Big Wood River with a priority date of 7/30/1888 has been cut (required to cease diversion by the Water District 37 Watermaster in order to fulfill senior water right holder's water rights) fifty-six times, or 89% over the period of record. This indicates that the average annual cut-off date for water right 37-159D is July 30th for this period of record. In 2015, the priority date associated with the Flammer water right was cut on June 29th, meaning this water right was out of priority and not divertible after that time. Future water calls and conjunctive management of ground water rights alongside surface water rights may or may not prolong the date when this water right is cut due to downstream senior water right holders' water calls.

EXHIBIT A

TRANSFER 80971

The location associated with a potential future transfer of this portion of 37-159D will determine how the water right move (transfer) is conditioned and whether or not third party protests may be involved. If the water right is to be moved downstream on East Fork or downstream within the Big Wood River, it is likely that it will not be affected by any minimum in-stream flow water rights held by the Idaho Water Resource Board. Additionally, injury to other water right holders is not likely to occur because the water historically diverted in East Fork will flow down the Big Wood River to be diverted at a new location. Under this scenario, there will be more water in the river in the reach between East Fork and the potential new point of diversion downstream than was historically present when the water was diverted from the East Fork of the Big Wood River.

If the water right is to be moved and diverted upstream from the East Fork or upstream from the Big Wood River, it is likely that the move will be subject to any minimum in-stream flow water rights held by the Idaho Water Resource Board. When the flow in the Big Wood River drops below 189 cfs at the USGS Halley Gauge (flow associated with the minimum stream flow in the river Halley reach between the confluence of Warm Springs Creek and the Big Wood River in Ketchum and the District 45 Canal diversion in Bellevue), 37-159D would likely be non-divertible at the new upstream location because the upstream move and subsequent diversion would be impacting the in-stream flow water right. When compared to historic flows, the flow in the Big Wood River under this scenario would have less water in it between the confluence of the Big Wood River and the East Fork of the river, and a new point of diversion upstream.

This preface is based on conditions associated with recent pending water right permits, and water right transfer applications. The median flow in the Big Wood River has historically dropped below 189 cfs when a water right with an early May of 1884 priority date would be cut. Subordination to a minimum in-stream flow water right as a result of an upstream transfer within the Halley reach would not likely impact 37-159D because it has historically been off by priority and non-divertible at the time when the river drops below 189 cfs at the USGS Halley Gauge.

Additionally, injury to other water right holders may occur as a result of an upstream move because there will be less water in the river in the reach between East Fork and the potential new diversion upstream than was historically present, which could impact the amount of water diverted and or the duration of time which other valid water rights can be diverted in that reach of the Big Wood River.

RE: Transfer No. 80971
Water Right No(s). 37-159D

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the **IDAHO MOUNTAIN EXPRESS** on **6/15/2016** and **6/22/2016**. Protests to this application may be submitted for a period ending ten (10) days after the second publication (**July 5, 2016**).

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Denise Maline
Administrative Assistant

RE: Transfer No. 80971
Water Right No(s). 37-159D

Dear Kevin:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form as necessary, and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Maline
Administrative Assistant

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 80971**

JACK W FLAMMER JR, PO BOX 3923, HAILEY, ID 83333; has filed Application No. 80971 for changes to the following water rights within BLAINE County(s): Right No(s). 37-159D; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx. The purpose of the transfer is to change a portion of the above rights as follows: Application proposes changing the point of diversion and place of use for a 0.04 cfs and 2.0 acre portion of an East Fork Wood River irrigation right. Current point of diversion and place of use are located approximately 5.8 miles north and 1.5 miles west of Hailey. The transfer proposes moving the portion of the right to an existing well within 125ft of the Big Wood River located approximately 11.0 miles downstream. An analysis of hydraulic connectivity between the well and the Big Wood River is provided with the application. Transfer also proposes creating a 15.0 acre permissible place of use at the proposed place of use. Proposed place of use and existing well are located approximately 0.8 miles south and 0.1 miles west of the intersection of Broadford Rd and Hwy 75 in Bellevue.

For additional information concerning the property location, contact Southern Region office at (208) 736-3033. Protests may be submitted based on the criteria of Idaho Code Sec. 42-222. Any protest against the proposed change must be filed with the Department of Water Resources, Southern Region, 650 Addison Ave W Ste 500, Twin Falls ID 83301 together with a protest fee of \$25.00 for each application on or before July 5, 2016. The protestant must also send a copy of the protest to the applicant.

MEMORANDUM

Date: June 6, 2016
To: Transfer 79984
From: William Mills
Re: Evaluation of Sufficiency of Information Submitted

Application proposes changing the point of diversion (POD) and place of use (POU) for a 0.04 cfs and 2.0 acre portion of East Fork Wood River irrigation right, 37-159D (0.10 cfs, 5.0 acres), from its current POD located approximately 5.8 miles north and 1.5 miles west of Hailey. Transfer application proposes moving the transferred portion to an existing well located 11 miles downstream along the Big Wood River approximately 0.8 miles south and 0.1 miles west of the intersection of Broadford Rd and Hwy 75 in Bellevue. Application also proposes creating a 15 acre permissible place of use at the proposed location.

Hydrologic analysis was included that indicates there is hydrologic connection between the well and the Big Wood River and would result in at least a 50.7% reduction of the original source (Big Wood River) within a 6.0 hour period from pumping the well and a 73.3% reduction of the original source within a 24 hour period. Department guidelines require at least a 50% reduction in less than a 24 hour period.

Overlap review indicates that ground water right 37-8603 (0.030 cfs) is used to irrigate 3.0 acres on grounds adjacent to proposed acres identified by 206 map shapefile provided by the consultant. Condition R67 has been placed on the water right limiting all irrigation from all water rights when combined to 0.03 cfs per acre and 3.5 acre feet per acre. Point of diversion and place of use are located in Water District 37 and Watermaster comments will be solicited.

- **Authority to File:**
IDWR records indicate the applicant currently owns the water right involved in the transfer. A purchase and sales agreement was provided indicating the Lawson's consent to transfer the 2.0 acre portion of this right to their property and their intent to purchase that portion after the transfer is approved.
- **Water Right Validity:**
Water right 37-159D was decreed in the SRBA on 6/2/2010. Current Place of use is located on BLM ground and water right owner filed a previous transfer (#79984) in an attempt to move a portion of the water right off of BLM ground within 5 years of decree date. That transfer is currently protested and this application has been filed to completely move the remaining 2 acres off BLM ground and potentially resolve the protest and allow for approval of the original transfer.
- **Injury to Other Water Rights:**
None anticipated. The application includes a hydrologic analysis demonstrating

the hydraulic connection between the well and the Big Wood River.

- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated. Application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None Anticipated.
- **Effect on Agricultural Base of the Local Economy:**
None Anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

MEMORANDUM

Date: June 6, 2016

Flammer Jr.

Dear Allen,

Enclosed is an Application for Transfer of Water Right filed on behalf of Jack W. Flammer Jr. which proposes to transfer 2.0 acres of surface water right 37-159D to a well located on property owned by the Lawson Family Living Trust in Blaine County, ID. Mr. Flammer and Edward A. Lawson of the Lawson Family Living Trust have entered into a purchase and sale agreement (attached) which authorizes Mr. Flammer to file an application for transfer of water right onto the Lawson Family Living Trust's property. A stream depletion analysis and summary memo is also attached outlining justification for transfer and proposed diversion of the sale portion of 37-159D from the Trust's existing well.

Additionally, water right 37-159D is currently involved in water right transfer No. 79984 that has been protested by the BLM. Submittal of this transfer application should allow BLM to withdraw their protest to the application so that IDWR can process both transfers.

Enclosed is a check for \$200.00 to cover the cost of the transfer application. Please copy our office on all correspondence regarding the enclosed water right transfer application. Don't hesitate to give me a call should you have any further questions or comments. Thanks for your time and assistance on this matter.

Regards,

for

Zach Latham, M.S., Hydrologist.
