RE: Water Right Permit No. 75-7354

Dear Mr. Bossert

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The permit describes the place of use and the point of diversion by township, range, and section and quarter quarter. Any point of diversion that falls within a quarter quarter not described in the permit requires an amendment. The point of diversion for this water right is in a different quarter quarter than described on the permit.

Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 21 days.

If you have any questions, please call me at (208)287-4879.

Sincerely,

Sandra Thiel
Water Resource Planner
