RE: Water Right Permit No. 75-7354

Dear Mr. Bossert:

On October 1, 2013 we had a conversation about the use of water on your property. During that conversation you said that you had not used ground water right 75-7088 for several years. Instead, you used spring water under permit 75-7354 for in-house domestic use.

The beneficial use on permit 75-7354 is 0.12 cfs for irrigation. Based on the field exam you irrigate 2.8 acres from the spring. The addition of the 0.02 cfs for domestic use, in addition to irrigation, falls within the 0.12 cfs on the permit. With the domestic and irrigation we would allow a diversion rate of 0.09 cfs.

Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed. Based on our conversation an additional beneficial use, domestic, was developed under the permit.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 21 days.

I previously forwarded to you an Application for Amendment so that you can amend Permit No. 75-7354 to correspond with the findings of the Department's field examiner. I did not receive a response. If I do not receive the amendment by Friday, June 24th, I will assume that you are no longer interested in the water right and void the permit.

If you have any questions, please contact me as soon as possible at (208) 287-4881 or sandra.thiel@idwr.idaho.gov.

Sincerely,

Sandra Thiel
Sr. Water Right Agent
