Subject: RE: Northern Water LLC - Proof deficiency letter

June 1, 2016

Dear Mr. Waldo,

Re: Proof Deficiency for Water Right Permit # 95-9277

In connection with the proof of beneficial use statement the Department needs you to provide documentation to us from DEQ showing that the water supply system is being regulated by them as a public water supply and that it has been issued a public water supply number, or proof that the PWS # is valid and current. Please provide documentation from DEQ showing the required information in connection with the proof statement IDWR received May 11, 2016.

Keep in mind that this permit has lapsed. Your Proof Due Date was April 1, 2016. IDWR will not be able to accept the required information after the 60 day deadline of June 6, 2016. After that date the Department will have no choice but to return your proof statement as unacceptable, and refund your fee. You will then be required to submit a form titled "Request to Reinstate a Permit Lapsed more than Sixty Days", hire a certified water right examiner to provide the Department with a Beneficial Use Field Report, and pay a Reinstatement application fee of \$250.00.

Sincerely,

Darla Block
