Michael:

Attached is the new POU for the 133.5 acres of water rights formerly owned by Beard.

The water rights authorize the diversion of water from the North Beard and South Beard ditches, as well as the Desert Ditch. The South Beard ditch will mostly be used to deliver water to the POU on the south side of South Leigh Creek. The North Beard ditch historically delivered most of the water on the north side of the creek, and the ditch actually crosses the Killpack Ditch/Pipeline. At the crossing point, the North Beard water can be dumped into the Killpack ditch, and from there, the water can be flood irrigated out on the corners depicted on the north side of the property. At first glance, this may seem unusual, but if the water is diverted, this is where it will be used to irrigate. Water can also be diverted prior to the crossing to irrigate the pivot corners closest to ditch heading.

Please confirm that you received this email. I will send the shapefile for the new 1005.6-acre POU in a separate email.

Thanks,

Robert L. Harris
