Thanks Vic.

Patrick – I will be out of town starting tomorrow through the 16 of January. If there is anyway we can get this finished for signature today I can make the trip to Boise. If not, it will either have to be after the 16th, or is it possible for me to have someone sign on my behalf for the Echo Water Users?

Thanks,
Darcy

Subject: Re: Water Right 51-7292 (Echo Water Users and BLM: Final Review of Application for Amendment)

Hi Vic and Darcy,

I just reviewed the last amendment. On page 3 of the amendment **T09S, R10E, S20**, IDWR erased the NWNW instead of the SWNW. If we can have them make that one correction, the amendment would be good for signing. I agree with Patrick's evaluation to keep S32 NWSW.

Thanks,
Sandy

Vic,

I have gone through and removed all of the QQ you identified but 1. Take a look at the image I have attached. There is a stock use that appears to be within the NWSW of 8S 9E Sec 32. You marked this to be removed and to include the NESW. From the information I have presented, we should move forward with the NWSW. Let me know if you feel we should change this, otherwise a new licensing amendment is attached. As a reminder, the form should be signed and returned with a \$100 check.

Thanks Vic, look forward to wrapping this one up!

Subject: FW: Water Right 51-7292 (Echo Water Users and BLM: Final Review of Application for Amendment)

Patrick:

Please see the comments below from the Sandra McCrea (BLM). Attached is the corrected list for the stockwater places of use. In addition, we need to provide a correction to the mailing address as follows:

For Echo:

Echo Water Users Assn, Inc.

P. O. Box 235

Mountain Home, Idaho 83647

For BLM:

Bureau of Land Management

1387 S. Vinnell

Boise, ID 83709-1657

We need to provide a signature line for the BLM. Both BLM and Echo need to sign this amendment.

If you will please update your Application for Amendment to include these corrections/updates and re-send, we will take care of getting it signed and turned in. Thank you.

Subject: Water Right 51-7292 (Echo Water Users and BLM: Final Review of Application for Amendment)

Hi Vic and Darcy,

I finished my review. Simplot data agrees with BLM data for POU's and PODs. Although IDWR added POU's, this was due to troughs laying in multiple QQs or on a QQ line. All POU's must be claimed that the POU lies in and this is consistent with IDWR practices. However, I noted nine POU's that IDWR added by mistake, which should be removed. There are no troughs/ ponds/ or tanks at the following locations. They look like they were added by IDWR due to land scarring in imagery, which made them look like they were part of the POU.

Remove the following POU's:

T08S, R09E, S32, NWSW

T09S, R07E, S09, NWSW

T09S, R09E, S11, NWNE and SESW

T09S, R09E, S13, SWSW

T09S, R09E, S26, NENW

T09S, R10E, S17, NWSW

T09S, R10E, S20, SWNW

T10S, R09E, S01, Lot 3 (NENW)

I have added remarks to the excel sheet that you provided me with a column with additional POU IDWR data. Items in red should be removed. I have also marked-up the Application for Amendment. The POUs boxed in red should be removed.

Also, the following POU is on **military lands T09S, R07E, S13, NWSW**. I don't remember per our conversation at the meeting if you still want to include it. There are troughs at the location which would need to be removed if they are not claimed.

Subject: RE: Water Right 51-7292 (Echo Water Users and BLM).

Vic,

Great work getting that submitted. I have attached a licensing amendment that reflects your input. The document must be signed and returned to IDWR with a \$100 fee within 14 days. This will also be sent via postal service to the BLM office in Boise. I have included a change in address form for Echo Water Users Association since recent mail was returned "not deliverable as addressed" for the record on file. ID SOS identifies Darcy as President - maybe she can complete the form and turn it in for the group.

I remember there being some conversation about applying for a larger diversion rate at the time of the field exam. Let me know if there are any questions moving forward.

Cc: Price, Fredric <fwprice@blm.gov>; Skaggs, Pam <Pam.Skaggs@idwr.idaho.gov>
Subject: RE: Water Right 51-7292 (Echo Water Users and BLM).

Hi Darcy,

The current water right ownership is described as:

Current Owner	ECHO WATER USERS ASSN INC
	C/O CHARLES HONSINGER
	PO BOX 2773
	BOISE, ID 83701-2773
	(208)342-4591
Current Owner	UNITED STATES OF AMERICA ACTING THROUGH
	USDI BUREAU OF LAND MANAGEMENT
	IDAHO STATE OFFICE
	1387 S VINNELL WAY
	BOISE, ID 83709-1657
	(208) 373-4000

The licensing amendment should really be signed by both parties so either Echo can send in a copy as well as BLM or the two can sign the same document – either way.

Patrick

RE: Water Right Permit No. 51-07292

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

☐ Point(s) of Diversion

☒ Place(s) of Use

☐ Other

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please call me at 208-334-2190.

Sincerely,

Patrick Kelly
Water Resource Agent

Subject: RE: IDWR Permit No. 51-7252; Echo Water User's Stockwater system.

Patrick:

As Fred and I explained during our phone conversation today, the BLM is close to completing its review of the Simplot field work data. The BLM's review included additional field work to verify certain portions of the system. As a result of the additional BLM field work, we have a handful of places of use that the Echo Water Users and BLM need to review together to confirm they are part of the Echo system – or are parts of other systems. We are very close, however, due to the weather our field work for the season is over until next spring.

Fred and I are hopeful we can answer our remaining questions without needing any additional field work. Our goal is to know by December 1 if we can wrap-up with descriptions of the places of use without going into the field again. Once the BLM and Echo exchange information this week I will follow-up to keep you informed of our progress.

Subject: IDWR Permit No. 51-7252; Echo Water User's Stockwater system.

Patrick:

We thought we had all of the places of use identified and met with the members of the Echo Water Users. One member identified a missing trough – which he will send in the coordinates today. We have shape files and a map that we need to send to BLM for their review and approval before we send it to you. Will you please allow us more time to allow for BLM review. We would like until November 1 if possible. We are making good progress and I think it is more efficient if

we address the review and concerns now, rather than have you issue an erroneous permit amendment that we have to provide objections to. Let me know if this is acceptable.
