RE: Water Appropriation Permit 96-9562

Request for Information

Dear Permit Holders:

In 2015 the Idaho Department of Water Resources (IDWR) issued permit 96-9562 authorizing the development of a right to divert 0.08 cfs of water from a Spring within NW $\frac{1}{4}$ NW $\frac{1}{4}$ NW of Section 9, Township 56 North, Range 01 West, B.M., for domestic use.

The final step in the water appropriation process is the issuance of a Water Right License. By issuing a license, IDWR recognizes that you have met the requirements for establishing a water right.

During the In-House License Review, IDWR personnel were unable to confirm which homes that domestic use for 96-9562 applies. If you believe a water right license for domestic use should be issued to you, please supply the requested information below:

- Several of the lots apparently associated with this permit do not show any homes constructed on the tax lots. If these lots are included in this permit, please provide the evidence that a domestic use has been developed. A residence recently constructed, a mobile home, or recreational vehicle which is plumbed into the water system would qualify as a domestic use. We would need a description of how this system designed to accommodate any mobile homes or recreational vehicles.
- Water right license 96-7051 in the name of Max Kenneth Perce, covers a domestic use for a home built in 1970 in the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of section 16 Township 56 North, Range 1 West. The only home shown that is shown in this 40 acre tract, is the home owned by David Pucci. Our parcel information states that this home was built in 1970, so we are assuming that water right 96-7501 belongs to Mr. Pucci. If this is the case, we have enclosed a change of ownership form for Mr. Pucci to change the ownership of his property into his name. This will also affect the number of domestic uses that can be included in permit 96-9562.
- Please provide the physical address of the three homes to which 96-9562 applies.
- On the map enclosed, please indicate which homes to which 96-9562 applies.

Please provide the information requested by June 8, 2016.

Please mail the information to IDWR, C/O Danielle Favreau, to the address on at the top of this letter. If you would like, you could email the information to Danielle.Favreau@idwr.idaho.gov. Dan Nelson is currently working with me to license these permits. **I will be out of the office most of the rest of this month, so if you need immediate assistance, please contact Dan at (208) 287-4856 or dan.nelson@idwr.idaho.gov.**

If you wish, you can request Department staff to come to the site and do an infield verification of your water use. Please contact Dan Nelson, if you want Department staff to visit the property to verify the water use, and he will work with staff to assign someone to visit you on site.

If you have not developed a beneficial use of water from a spring within the development period authorized by your permit a license cannot be issued. Once the development period authorized by your permit expires, your permit cannot be retained to cover future development of the resource. If I do not receive the requested information or have been contacted by you by June 8, 2016, may take action to void your permit under the provision of Section 42-219(8) of the Idaho Code.

If you have any questions regarding proof of beneficial use, please contact Dan Nelson at 208-287-4800.

Respectfully,

Danielle Favreau
