Item 9:

Irrigation water is available for this parcel from Weiser Irrigation District. In order to get it to the property it first must go through two different property owners. Ground elevation of the field compared to water level elevation in the canal is very flat and hard to transport water to the parcel. One of the land owners grazes cattle that trample the ditch and restrict water flow. It is highly unlikely that this practice will change. The original owner stated to me that he could not get sufficient water to the property to surface irrigate so he had a well drilled.

Item 11:

This application is to correct the error that was previously made by the previous owner. I would irrigate this 5.3 acre parcel from the existing well that is on the property. I purchased the property in 1999 from Gregory Brown and have used the existing well to sprinkler irrigate the entire 19 acre field. Later I submitted a change in ownership application for the well. When I was reviewing this data recently I noticed that the acreage allowed for the well was 13.7 acres and not the entire field of 19 acres. Mr. Brown stated to me that the well driller filled out the water right forms and estimated the acreage which was incorrect based on maps from the Farm Service Agency and other mapping tools.

Re: Application for Permit No. 67-15153 Additional Information Required

Dear Applicant:

Your recent application for permit proposing the use of water for irrigation is being processed. The application has been assigned a priority date but cannot be processed further until the following items are clarified:

- **5 - Total Quantity**

Although you applied for 0.27 cfs, the permit (if approved) will be for less than that rate. The maximum allowable rate is 0.02 cfs per acre. You indicated the proposed place of use will be 5.3 acres so the maximum rate that can be approved is 0.11 cfs. Combined with water right no. 67-7863 this will allow 0.38 cfs for the entire 19 acre plot.

- **8 - Place of Use**

Based on the map provided with the application, the location of the place of use may be incorrect. The map shows the proposed place of use is in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ of section 26, township 11N, range 03W. Please amend the application to the correct location or submit a new map that shows the place of use at the location listed in section 7 of the application.

Please submit the requested information within thirty (30) days for the application to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.
