DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of IdahoIdent. No. 63-33952**AMENDED**

APR 28 2016

WATER RESOURCES
WESTERN REGION1. Name of applicant(s) Snake River Dairies, L.L.C.Phone (208) 495-2034Name connector (check one): ☐ and ☐ or ☐ and/orMailing address 15188 S. Can-Ada RoadCity MelbaState IDZip 83641

Email _____

2. Source of water supply Ground water

which is a tributary of _____

3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
01S	02W	24			NE	SE	Canyon	Ground water	

4. Water will be used for the following purposes:

Amount 1.6 cfs for Irrigation purposes from 3/15 to 11/15 (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)5. Total quantity to be appropriated is (a) 1.6 cfs cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. Electric motor, pump and pipelines to sprinkler system.b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ Noc. Proposed well diameter is 8-10 inches; proposed depth of well is 181 feet.d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ Noe. If well is already drilled, when? 1992; drilling firm Johnston Drilling; well was drilled for (well owner) Robert Harris; Drilling Permit No. 63-92-W-115.

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. _____

b. Stockwatering; list number and kind of livestock. _____

c. Municipal; complete and attach the Municipal Water Right Application Checklist.

d. Domestic; show number of households _____

e. Other; describe fully. _____

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below.
See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
01S	02W	24							40	32	40	40			40	35			227?

Total number of acres to be irrigated: * Limited to 160 acres w/in 227 acres

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping?

Surface water delivered by Boise-Kuna Irrigation District. 63-11633 provides ground water irrigation within the NESE and NWSE, but does not cover all of the irrigable acres within those quarter-quarter sections.

10. a. Who owns the property at the point of diversion? Applicant
- b. Who owns the land to be irrigated or place of use? Applicant
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing:

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

To provide supplemental ground water for irrigation of acres already irrigated with surface water from the Boise-Kuna Irrigation District. For the NESE and NWSE, this application seeks to provide groundwater irrigation for irrigable acres not already covered by 63-11633. For the remainder of the place of use, this application seeks new groundwater irrigation.

12. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

13. MAP OF PROPOSED PROJECT REQUIRED - Attach an 8 1/2" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Application for Permit No. 63-33952

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the PRESS TRIBUNE on 5/19/2016 and 5/26/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Rachel Neely
Administrative Assistant

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

TRANSFER NO. 80380

EUREKA DITCH CO NO 2, C/O BILL DORAMUS 21766 HOWE RD, CALDWELL, ID 83607; has filed Application No. 80380 for changes to the following water rights within CANYON County(s): Right No(s): 63-21361, 63-21362, 63-21363, 63-222D, 63-223K, 63-32241, 63-3572; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx. The purpose of the transfer is to change a portion of the above rights as follows: Add one point of injection from the Eureka Canal into the North Drain and add two points of re-diversion from the North Drain. A total of 3.22 cfs is sought to be transferred based on the pro-rated amount of water allocated for ground served by the two new re-diversion points. General location is approximately 3 miles west of Notus, ID.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact Western Region office at 208-334-2190; or for a full description of the right(s) or proposed transfer (s) please see www.idwr.idaho.gov/WaterManagement/WaterRights. Protests may be submitted based on the criteria of Idaho Code §§ 42-203A and 42-222. Any protest against the approval of the application(s) must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705 together with a protest fee of \$25.00 for each application on or before 6/6/2016. The protestant must also send a copy of the protest to the applicant.

Subject: Application for Permit No. 63-33952 – Snake River Dairies, LLC

Dear Vicki:

In response to your letter dated July 10, 2014, this letter provides additional information related to sufficiency of groundwater in the vicinity of the place of use proposed by application for permit No. 63-33952.

Application for permit 63-33952 proposes diversion of 1.6 cfs for supplemental irrigation of 162 acres. The proposed point of diversion is an existing well located within the NESE, Section 24, T1S, R2W, Canyon County, Idaho. Water will be diverted from water-bearing zones below 145 feet depth. Boise Kuna Irrigation District surface water will remain as the primary irrigation water supply for the proposed place of use.

Your letter requested information to demonstrate there is sufficient ground water available for the proposed appropriation and the anticipated effect on other wells within a ½-mile radius of the proposed place of use. To address these questions, SPF identified ground water rights and well construction records located within the requested search area and compared this ground water use proposed under application 63-33952. Information from nearby water level hydrographs was also evaluated in regards to ground water availability. The findings of this investigation are provided below.

Recorded Water Rights. As described and shown in Attachment A, 15 domestic and/or stockwater right diversions, 3 irrigation water right diversions, and one combined irrigation/stockwater diversion were identified within ½-mile of the proposed place of use. Two of the 19 water right diversions identified as Nos. 8 & 11 in Attachment A are located on property owned by the applicant. Well No. 8 is the proposed point of diversion for application 63-33952.

Recorded Well Drillers' Reports. As described and shown in Attachment B, well drillers' reports for 22 domestic wells and 4 irrigation wells were found within the section quarter-quarters of the ½-mile search area. Of the 26 wells, total depths range from 108 and 600

feet. Average well depth is 244 feet. The proposed point of diversion is identified as Well No. 15 in Attachment B.

The recorded well production rates appear to be adequate for the uses they serve.

Anticipated Annual Groundwater Use

The proposed place of use for 63-33952 is currently irrigated with a dependable surface water supply delivered by Boise Kuna Irrigation District. It is likely that supplemental groundwater will be needed primarily during the shoulder seasons (i.e., before early April and after early October) and drought periods. Assuming an annual irrigation demand of 4 acre feet per acre, it is expected that surface water will provide at least 75 percent of this demand. Therefore, the anticipated groundwater use is unlikely to exceed 1 acre foot per acre, or 162 acre feet over the proposed 162-acre place of use.

Supplemental irrigation has been authorized from the proposed well for 65 adjoining acres since 1992 under water right 63-11633. The licensing field exam for water right 63-11633 recommended system capacity at 0.65 cfs based on a theoretical calculation. Changes to the existing diversion works are not anticipated. The applicant contends current system capacity is sufficient for the limited supplemental use proposed.

Water-Level Hydrographs

Figure 1 maps ten water level monitoring wells identified within proximity of the proposed point of diversion. Four of these observation wells are within approximately one-mile distance from the proposed well, with observation wells 01S01W-30BAB1 and 01S02W-24CBA1 being the two in nearest proximity. Hydrographs for these two demonstrate what appears to be seasonal responses to pumping and/or observations during pumping (especially for 01S01W-30BAB1) with recovery to pre-pumped conditions.

Measured levels are presented in Figure 2 and Figure 3 for wells in T01S R01W and T01S R02W, respectively, using similar axis scales. The observations present long-term stable aquifer conditions in this area indicating water is available for additional appropriation. Attachment C presents individual well hydrographs.

Effects on Other Wells

Water right and well construction records show other wells in proximity to the proposed point of diversion. Aerial imagery indicates the nearest are several hundred feet distant from the proposed point of diversion. The Theis methodology was used to estimate anticipated drawdown in nearby wells. The analysis is based on the average diversion rate required to deliver an annual 1 acre foot of water per acre to 97 acres (the balance between application 63-33952 and water right 63-11633), the equivalent of 0.27 acre-feet per day or 60 gallons per minute. Additional drawdown in proximate wells based on this approach is estimated at

several feet, which is a small effect and not expected to negatively impact required well productivity. Calculation details are presented in Attachment D.

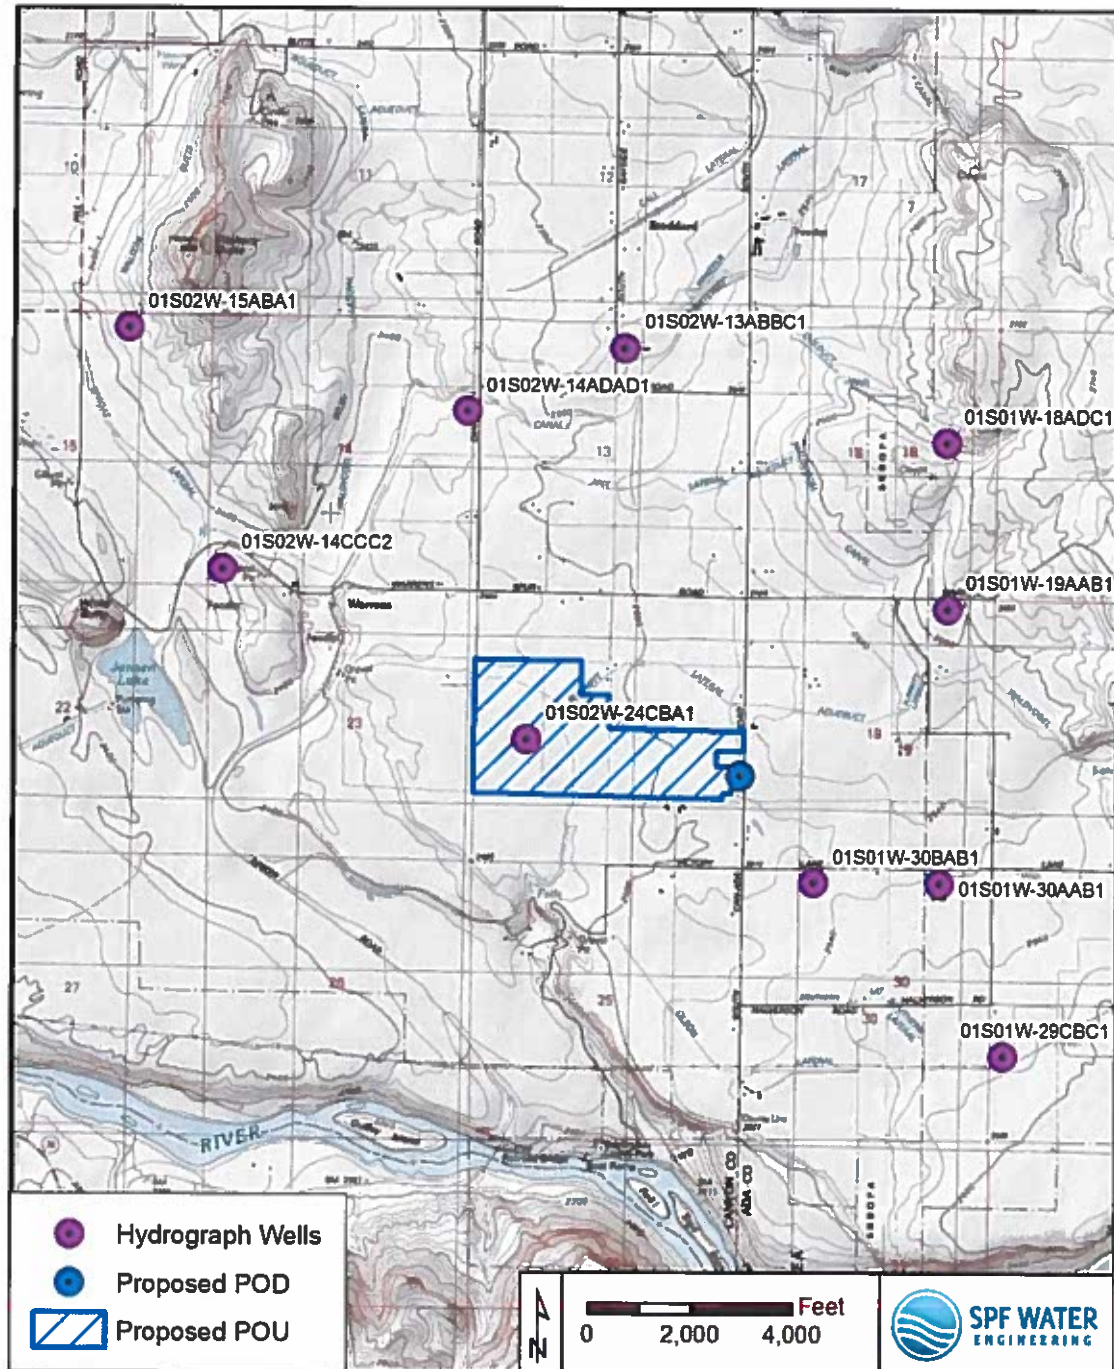

Figure 1: Local water level observation wells.

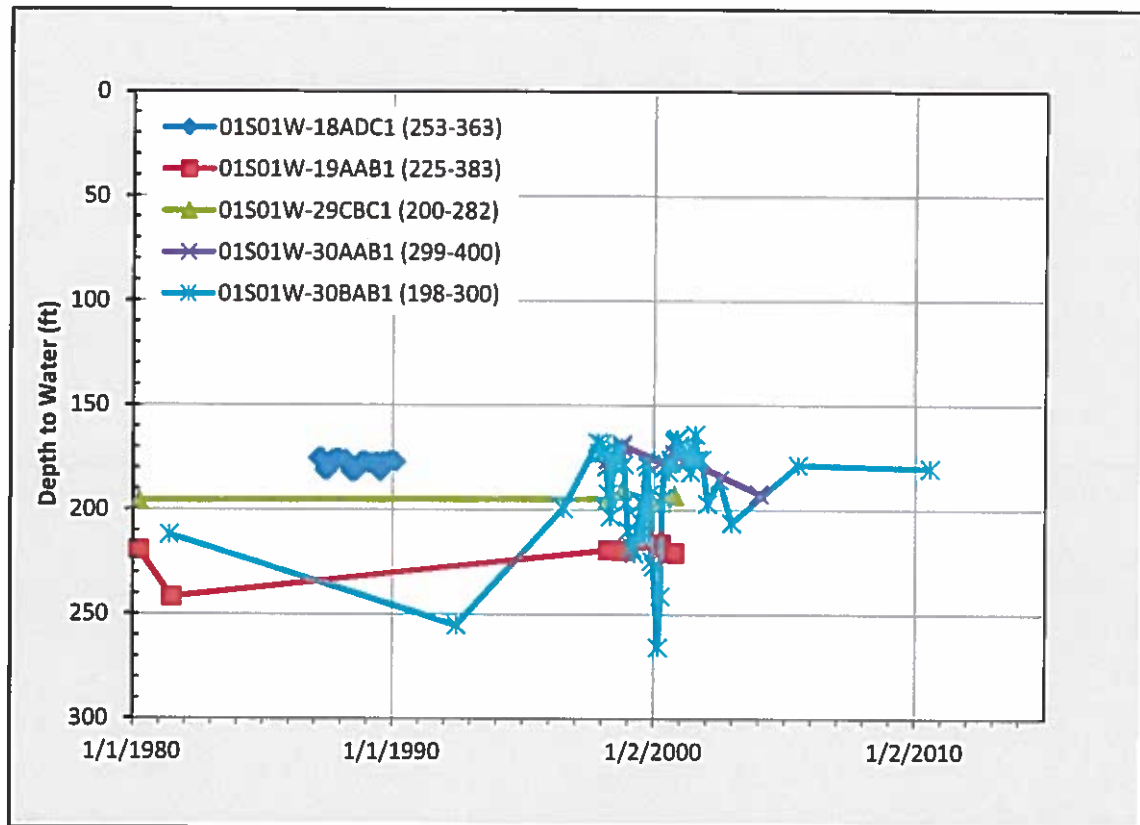

Figure 2: Local observation wells in T01S R01W.

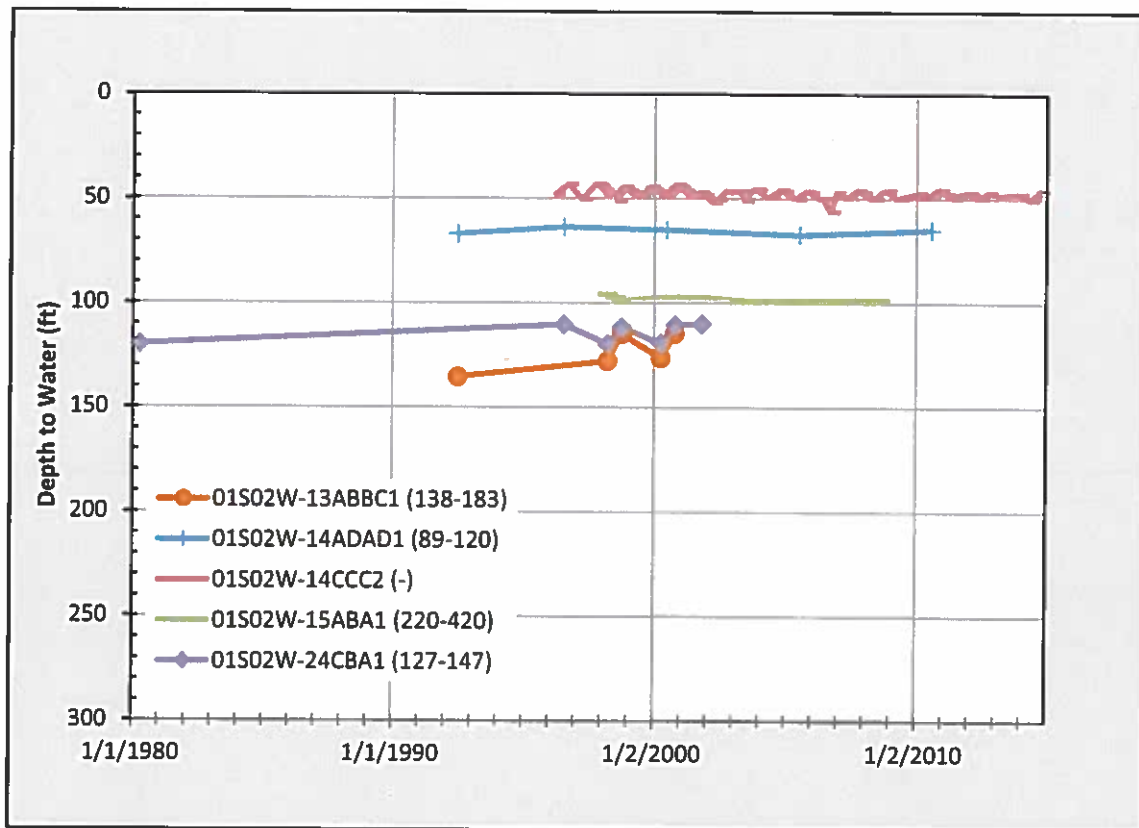

Figure 3: Local observation wells in T01S R02W.

Summary

1. The primary water supply from Boise Kuna Irrigation District will continue to provide the majority of the annual irrigation demand.
2. The proposed system has operated for years without any known negative impacts to neighboring wells.
3. Water level hydrographs demonstrate relatively stable water levels, suggesting water is available for appropriation.
4. Drawdown effects on neighboring wells are estimated at several feet. This limited drawdown is not expected to significantly impact water availability in neighboring wells.

Please contact me with any questions or comments concerning this analysis. We look forward to continued processing and approval of application for permit 63-33952.

Sincerely,

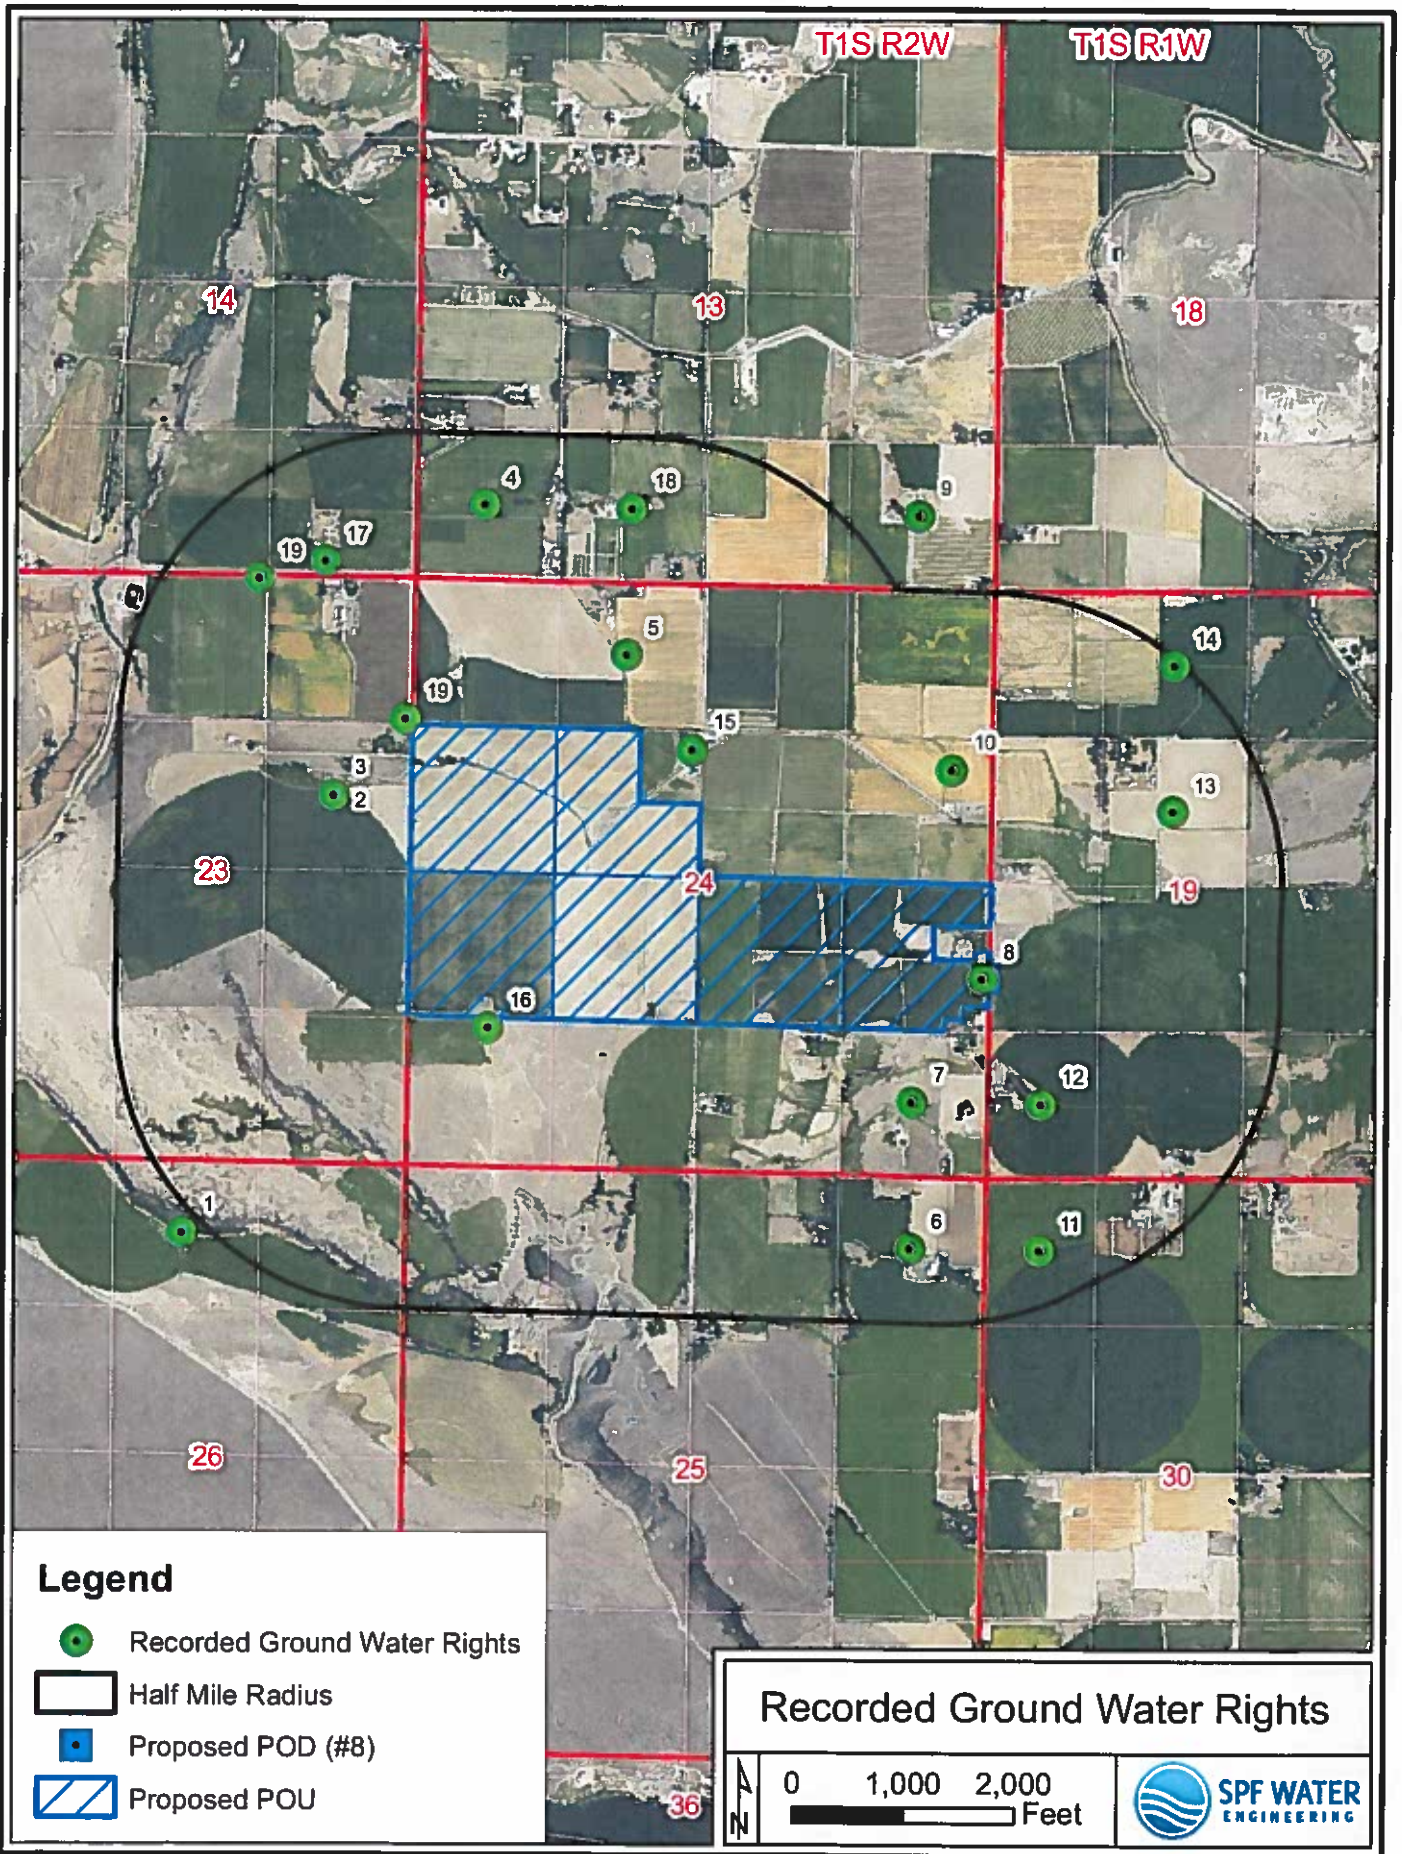

Scott King, P.E

Dylan –

Via this e-mail, IDWR grants an extension of time until December 8, 2014, by which Snake River Dairies, LLC, is to submit the information requested in my letter dated July 10, 2014.

Thank you.

Yes, Dylan, an applicant can apply for an extension" up to" 6 months, and in many instances, request an extension of less. So, so please clarify if the applicant wants 6 months or some other time period, "up to" 6 months. Thanks.

Thanks Vicky. Sorry, I read your letter to mean that the extension is for up to 6 months. Do you need us to request something less than that?

Hello Dylan –

I received the letter request for an extension. How long an extension did the applicant want? When we determine that, I will response with a date certain extension.

Thanks –

Re: Extension Request for Application for Permit No. 63-33952 (Snake River Dairies, LLC)

Dear Ms. Music:

Thank you for your letter of July 10, 2014, in the above-referenced matter. The applicant Snake River Dairies, LLC hereby requests an extension of the August 9 deadline to provide the additional information you have requested.

If you have any questions or concerns, please do not hesitate to contact me. Thank you for your attention to this matter.

Sincerely,

VARIN WARDWELL

Re: Application for Permit No. 63-33952

Dear Mr. Lawrence:

The application referenced above, that you submitted on May 15, 2014, on behalf of your client, has been assigned to me for review and processing. The application proposes 1.6 cfs from ground water for the irrigation of 165 acres. The ground water is intended to supplement surface water for irrigation from Boise Kuna Irrigation District. IDWR requires additional information before processing can continue.

Section 42-203A, *Idaho Code*, requires IDWR to consider certain criteria in processing new water right applications. On a case-specific basis, the applicant must provide IDWR with sufficient evidence to address some or all of the following criteria:

1. Will the new appropriation injure existing water rights?
2. Is the water supply sufficient for the purpose for which it is sought?
3. Is the application made in good faith or for delay or speculation?
4. Does the applicant have sufficient financial resources to complete the project?
5. Will the proposed use conflict with the local public interest, where local public interest is defined as interests of the people within the watershed who will be directly affected by a proposed water use?
6. Will the proposed use be contrary to the conservation of water resources within the State of Idaho?

For this application, IDWR requests that the applicant provide credible information about whether there is water available in the aquifer for this proposal, and the effect on other domestic and other water right wells within 0.5 mile radius of the boundary of the place of use described in the application. The applicant may wish to retain a consultant to provide this information. A list of consultants is enclosed for your convenience.

Application for Permit 63-33952

July 10, 2014

Page 2 of 2

Please provide the requested information in writing by **August 9, 2014**. Alternatively, you may request a processing delay of up to six months. Your application will be voided if a timely response is not received. Refunds are not issued for voided applications. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please call me at 208-334-2190 if you have any questions. Thank you for your attention to this matter.

Sincerely, ,

A handwritten signature in black ink, appearing to read "Vicky Music". The signature is fluid and cursive, with the last name "Music" being more prominent.
