

MEMORANDUM

Date: April 12, 2016
To: Transfer 80745
From: Kerrie Mathews
Re: Transfer Evaluation

Transfer No. 80745 proposes to change the point of diversion for water rights 35-2689B and 35-7016. The existing point of diversion is in the SESE of Sec 20 T2S R34E. The proposed point of diversion is in the SESW of Sec 20 T2S R34E. The place of use remains the same. This application is being filed to correct an error in the SRBA. There is no well in the SESE. The well has always been located in the SESW. It is an existing well shared with water rights 35-2716 and 35-2133.

Authority to file:

The water rights and place of use are in the name of Larry Clement. The application was filed by Zane Clement who has power of attorney for Larry Clement.

Validity of the Water Right:

Water rights 35-2689B and 35-7016 were decreed on January 25, 2002. Aerial photography shows consistent irrigation. Forfeiture does not appear to be an issue.

Injury to Other Water Rights:

No injury to other water rights was identified. An ESPA analysis was not required, the existing and proposed point of diversion are located within the same model cell. The application was advertised, no protests were received. The water master for WD120 was notified of the transfer and did not oppose the transfer.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issues identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this transfer application.
