

MEMORANDUM

Date: May 11, 2016
To: Water Right 37-8296 File
From: Jana Reeder
Re: Evaluation of Sufficiency of Information Submitted

Greg Sullivan of Brockway Engineering inquired about the supplemental condition of this right on 5/9/2016. After discussion with staff it was interpreted that all 357.2 acres can be irrigated with ground water if the BWCC and the AFRD2 surface water is not available. Also that the 77.2 acres are primary ground water acres with the 280 acres being supplemental to surface water totaling the 357.2 acres on the farm.
