To appropriate the public waters of the State of IdahoIdent. No. 73-12256**RECEIVED****MAR 31 2016****DEPARTMENT OF
WATER RESOURCES**

Phone (208) 334-3700

1. Name of applicant(s) STATE OF IDAHO, Idaho Fish and Game CommissionName connector (check one): ☐ and ☐ or ☐ and/orMailing address P.O. Box 25City BoiseState Idaho Zip 83707Email larry.weeks@idfg.idaho.gov2. Source of water supply Pahsimeroi Riverwhich is a tributary of Salmon River

3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
14N	22E	35		SE	NE	SW	Lemhi	Pahsimeroi River	P-16

4. Water will be used for the following purposes:

Amount .80 for Fish Propagation purposes from 04/01 to 11/01 (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)5. Total quantity to be appropriated is (a) .80 cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. The fish screen located downstream from the headgate has a 10" bypass pipe with a 4" inlet orifice for fish returnb. Height of storage dam NA feet; active reservoir capacity NA acre-feet; total reservoir capacity NA acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ Noc. Proposed well diameter is NA inches; proposed depth of well is NA feet.d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ Noe. If well is already drilled, when? NA; drilling firm NA;
well was drilled for (well owner) NA; Drilling Permit No. NA

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower: show total feet of head and proposed capacity in kW. NAb. Stockwatering: list number and kind of livestock. NAc. Municipal: complete and attach the Municipal Water Right Application Checklist.d. Domestic: show number of households NAe. Other: describe fully. This is a non-consumptive use of water that enables fish to return to the stream through a bypass pipe that runs from the fish screen to the stream.

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below.
See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
14N	22E	35									H								

Total number of acres to be irrigated: 0

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping?

There are over 250 fish screens in Lemhi, Custer, and Blaine Counties that have non-consumptive water rights that are held by the State of Idaho Fish and Game Commission. 74-1692; 74-1693; 74-1696

10. a. Who owns the property at the point of diversion? BLM
- b. Who owns the land to be irrigated or place of use? BLM
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing:
IDFG has a easement for ingress and egress to construct and maintain fish screens on this property

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

12. Time required for completion of works and application of water to proposed beneficial use is 1 year years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
RIGHT-OF-WAY RENEWAL GRANT

SERIAL NUMBER IDI-37700

1. A right-of-way grant is hereby granted pursuant to Title V of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761).

2. Nature of Interest:

a. By this instrument, the holder:

Idaho Department of Fish and Game
97 Highway 93 N
Salmon, Idaho 83467

receives a right to install, operate, maintain, and terminate a fish screen and road access on public lands described as follows:

Boise Meridian, Idaho

T. 14 N., R. 22 E.,

section 26, SENW, SWNE, NWSE, NESW, SESW and SWSE;

section 35, NWNE, SWNE, NWSE and NESW.

b. The right-of-way or permit area reserved herein contains 4.2 acres, more or less, and is approximately 70 feet long and 70 feet wide for the fish screen structure, 110 feet long and 25 feet wide for the fish bypass pipe and 8750 feet long and 25 feet wide for the road.

c. This instrument shall terminate on December 31, 2044, 30 years from the effective date of the grant, unless, prior thereto, it is relinquished, abandoned, terminated, or modified pursuant to the terms and conditions of this instrument or of any applicable Federal law or regulation.

d. This instrument may be renewed. If renewed, the right-of-way or permit shall be subject to the regulations existing at the time of renewal and any other terms and conditions that the authorized officer deems necessary to protect the public interest.

e. Notwithstanding the expiration of this instrument or any renewal thereof, early relinquishment, abandonment, or termination, the provisions of this instrument, to

the extent applicable, shall continue in effect and shall be binding on the holder, its successors, or assigns, until they have fully satisfied the obligations and/or liabilities accruing herein before or on account of the expiration, or prior termination, of the grant.

3. **Rental: THIS ROW IS EXEMPT FROM RENTAL**

For and in consideration of the rights granted, the holder agrees to pay the Bureau of Land Management fair market value rental as determined by the authorized officer **unless specifically exempted from such payment by regulation.** Provided, however, that the rental may be adjusted by the authorized officer, whenever necessary, to reflect changes in the fair market rental value as determined by the application of sound business management principles, and so far as practicable and feasible, in accordance with the comparable commercial practices.

4. **Terms and Conditions:**

- a. This grant is issued subject to the holder's compliance with all applicable regulations contained in Title 43 Code of Federal Regulation parts 2800 and 2880.
- b. Upon grant termination by the authorized officer, all improvements shall be removed from the public lands within **90** days, or otherwise disposed of as provided in paragraph (4)(d) or as directed by the authorized officer.
- c. Each grant issued pursuant to the authority of paragraph(1)(a) for a term of 20 years or more shall, at a minimum, be reviewed by the authorized officer at the end of the 20th year and at regular intervals thereafter not to exceed 10 years. Provided, however, that a right-of-way or permit granted herein may be reviewed at any time deemed necessary by the authorized officer.
- d. The stipulations, plans, maps, or designs set forth in Exhibit(s) **A & B**, dated **May 2015**, attached hereto, are incorporated into and made part of the grant instrument as fully and effectively as if they were set forth herein in their entirety.
- e. Failure of the holder to comply with applicable law or any provision of this right-of-way grant or permit shall constitute grounds for suspension or termination thereof.
- f. The holder shall perform all operations in a good and workmanlike manner so as to ensure protection of the environment and the health and safety of the public.
- g. The holder shall conduct all activities associated with the construction, operation, and termination of the ROW within the authorized limits of the ROW.
- h. ROW shall be maintained in a sanitary condition at all times; waste materials at those sites shall be disposed of promptly at an appropriate waste disposal site. 'Waste' means all discarded matter including, but not limited to, human waste, trash, garbage, refuse, oil drums, petroleum products, ashes, and equipment.
- i. There is reserved to the Authorized Officer, the right to grant additional rights-of-way or permits for compatible use on, over, under, or adjacent to the land involved in this grant.

Subject: Applications for permit and Transfers

Applications for Permit 73-12256, 75-14819, 75-14820, 75-14838, 75-14839, 75-14840 and 75-14841 and Transfers 80850 and 80861 have been sent for advertising. The documents will be scanned and available for review by the end of the day. Please submit any comments or concerns you may have by June 6, 2016.

Cynthia, if the IWRB would like to protest any of these applications, the protest end date is also June 6, 2016.

Please let me know if you have any questions. Thank you.

and Transfer No. 80850 (74-7363) & 80861 (74-745)

Dear Interested Party:

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced water right transfers and applications for permit. You can find copies of the applications at: <http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>.

This office can publish notice of the applications and transfers as soon as the initial review is completed; therefore, your prompt response to this request is appreciated. If your agency desires to formally protest the approval of these applications, you may do so after the notice is published by filing a written protest along with a \$25.00 filing fee within 10 days after final publication.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in black ink that reads "Jean Hersley". The signature is written in a cursive, flowing style.

This application proposes the diversion and use of water from a tributary of the Salmon Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because it is for non-consumptive fish propagation purposes.

Application For Permit No. 73-12256, 75-14838, 75-14839, 75-14840 and 75-14841

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 5/19/2016 and 5/26/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Jean Hersley

c: Fish & Game- Salmon Office

MEMORANDUM

Date: April 25, 2016
To: Water Right File 73-12256
From: Steven Visosky
Re: Application for Permit Review

Applicant

Application for permit 73-12256 was filed by State of Idaho, Department of Fish and Game (Fish and Game) for fish propagation on the Pahsimeroi River in Lemhi County. The application was signed by Fish and Game Region 7 Supervisor Tom Curet and was submitted by Fish and Game easement specialist Larry Weeks. The application was received on 3-28-2016 and the \$250 fee associated with the application will be paid through the Interagency Billing Process.

The applicant does not own the land associated with the place of use (POU) or the point of diversion (POD) described in the permit. According to 2-24-2016 tax lot information from Lemhi County, the land associated with the POU and the POD is owned by BLM. Fish and Game has submitted an easement agreement to construct and maintain fish screens on this property.

Source & POD

The proposed source of water is the Pahsimeroi River which is tributary to the Salmon River. This surface water is within water district 73 and 170 and is within the Wild and Scenic Watersheds of the Salmon River. According to Application Processing Memo No. 70, Water delivery No. 3, all surface water rights and ground water rights diverted from hydraulically connected to the Wild and Scenic River reaches upstream from the ending points will be recorded, tracked, and administered as anticipated under the provisions of the Wild and Scenic Agreement. The applicant was sent an IDWR's additional local public interest information letter.

There is a minimum streamflow right (73-7045) on the Pahsimeroi River however the location of this application is upstream from the beginning point listed on the water right. As this water right is non consumptive, there should be no concerns of this application affecting the minimum stream flow.

The POD is the headgate on the Pahsimeroi River that is shared with other water rights at the P-16 diversion. Water travels down a conveyance ditch to a fish screen and then is diverted from the fish screen through a bypass pipe back to the source. The point where water is diverted back into the Pahsimeroi River has been identified on a map submitted by Larry Weeks.

Use

The proposed use of the application is for fish propagation. This is a non-consumptive use of water that enables fish to return to the stream through a bypass pipe. The requested season of use of 4-1 to 11-1 was adjusted one day (10/31) to reflect the irrigation season associated with the other irrigation rights at this diversion. Water right 73-12081 is a stockwater right that diverts from the same P-16

diversion and has a season of use of 1/1-5/1. A phone conversation with Larry Weeks confirmed keeping the proposed season of use to start at 4/1 as it is difficult to properly operate the fish screens before April 1.

POU

The POU for fish propagation is the 10" bypass pipe that runs from the fish screen back to the Pahsimeroi River.

POU/POD overlap analysis

Application for permit 73-12256 proposes to share the same POD diversion as seven other water rights at the P-16 diversion. This diversion name in our mapping information is called the P-15 diversion however an email and map clarifying the location of this diversion confirmed the diversion is referred to as the P-16 diversion by the Fish and Game. There are no other water rights in the QQ with the same fish propagation use.

Subject: RE: Pahsimeroi River question

Steven,

Yes, that is the point of diversion. IDFG does call that diversion P-16 for sure. In our records, the diversions P-15 and P-14 were eliminated.

Hope that helps.

Have a good one. Larry

Subject: Pahsimeroi River question

Larry,

I am working on your Pahsimeroi River fish screen permit. On your application you stated that the diversion or tag name is P-16. Below is where I believe your maps indicate where the diversion is. Our mapping info refers to this diversion as the P-15 diversion. I just want to make sure this is the location you would like associated with your application.

Thanks,

Steven - The IDFG Anadromous Fish Screen and Habitat Program has been an integral part of improving conditions to support recovery of ESA-listed fish species Chinook salmon, steelhead, and bull trout in the Upper Salmon Basin. Fish screens and the bypass flows protect irrigators from illegal take of ESA-listed species and provide a benefit to the community by protecting and enhancing ESA-listed species populations for future generations. The Department certainly supports the approval of these water rights. Please let me know if you have any other needs. Thanks Tom Curet

Subject: Local public interest letter

Dear Larry,

Attached is the local public interest letter that we are required to send in regards to the 9 applications for permit that you submitted. Four are from your original application packet that you amended and 5 are new applications. Sources included in these application include Carmen Creek, Freeman Creek, Pahsimeroi River, Iron Creek, and Poison Creek.

I spoke with my supervisor and as we have been communicating via email, it would be OK for Tom to email me his response instead of writing a formal signed letter when responding. We are looking to see if he has anything further to add to his application in regards to the attached letter. Could you please share this information with Tom.

Please let me know if you have any questions.

RE: Application to Appropriate Water in the Upper Salmon River Basin 75-14828, 75-14834, 75-14835, 75-14836, 73-12256, 75-14838, 75-14839, 75-14840, 75-14841.

Dear Water Right Applicant:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund

- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the draft Comprehensive State Water Plan under revision by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery. Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at 208-287-4951, or email me at pam.skaggs@idwr.idaho.gov.

Sincerely,

For Pamela Skaggs
Water Rights Supervisor
