Subject: Re: Statement of Completion form and fee filed for Permit #63-34031

It's now a subdivision your aerial information is old and has houses on it. The irrigation ran all summer last year.

Re: Statement of Completion for Submitting Proof of Beneficial Use on Permit No. 63-34031

Dear permit holder(s)
Wood River Builders :

On March 22, 2016, the Department of Water Resources (Department) received your Statement of Completion (proof) form for water right permit 63-34031. According to aerial photography attached above it appears that the water use for this permit has not been put to use for irrigation yet.

Your proof of beneficial use due date isn't until July 01, 2020. You may want to withdraw your proof filing and request a refund of the \$75.00 submitted with it, until you have had an opportunity to put the water to the permitted use for irrigation of the entire 2.5 acres.

If withdrawing your proof form is something you want to move forward with, please respond to this email with a request to do so. Once I receive your request, I will be able to move forward with your withdrawal and issuance of your refund.

If you have any questions, you can call me at (208) 287-4945

Sincerely,

Darla Block
