STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

1. DEPT. OF WATER RESOURCES
Name of applicant(s)

Canyon Springs LLC c/o Thomas Ziegler

Phone 208-788-4657

Name connector (check one): ☐ and ☐ or ☐ and/or

Mailing address 113 Abby Rd.

City Hailey

State ID

Zip 83333

Email

2. Source of water supply Springs

which is a tributary of Snake River

3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
9S	16E	17	6	SW	SW	SE	TWIN FALLS	SPRINGS	
9S	16E	17	6	SW	SW	SE	TWIN FALLS	SPRINGS	
9S	16E	17	6	SW	SW	SE	TWIN FALLS	SPRINGS	

4. Water will be used for the following purposes:

Amount 7.0 cfs for Diversion To Storage purposes from 01/01 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)Amount 7.0 cfs for Recreation purposes from 01/01 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)Amount 7.0 cfs for Wildlife purposes from 01/01 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)Amount 7.0 cfs for Aesthetic purposes from 01/01 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) 7.0 cubic feet per second (cfs) and/or (b) 617.0 acre feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. Spring water emerges from talus slope and enters existing ponds described in 47-4294 and two additional ponds described in this application.

b. Height of storage dam 8 feet; active reservoir capacity 24.0 acre-feet; total reservoir capacity 24.0 acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☒ No

c. Proposed well diameter is N/A inches; proposed depth of well is N/A feet.

d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ Noe. If well is already drilled, when? N/A; drilling firm N/A;
well was drilled for (well owner) N/A; Drilling Permit No. N/A

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW.

b. Stockwatering; list number and kind of livestock.

c. Municipal; complete and attach the Municipal Water Right Application Checklist.

d. Domestic; show number of households

e. Other; describe fully. Applicant proposes to allow water authorized under 47-4294 to enter two existing ponds.

Consumptive use from evaporation will be mitigated by drying up associated acreage under 47-4294.

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
9S	17E	17							WRJ										
9S	17E	18				WRJ													
28 4/16/16 27 4/16/16 9S	16E																		
9S	16E																		

Total number of acres to be irrigated: _____

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping?

None.

10. a. Who owns the property at the point of diversion? Applicant.
- b. Who owns the land to be irrigated or place of use? Applicant.
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: N/A.

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

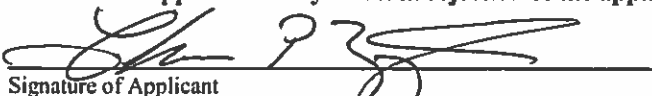

Spring water emerges from talus slope and enters ponds described in 47-4294 and two ponds described in this application. Applicant proposes to allow the same water authorized under 47-4294 to enter two existing ponds.

Consumptive use from evaporation will be mitigated by drying up associated acreage under 47-4294. Diversion rate sought under this permit does not exceed or replace diversion rate authorized under 47-4294. Seepage in pond considered non-consumptive and returns to Snake River.

12. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Narrative and Mitigation Plan for Permit Application Canyon Springs LLC

Brockway Engineering, PLLC
Zach Latham, Hydrologist, M.S.

March 11, 2016

Overview

The applicant, Canyon Springs LLC ("LLC"), is the owner of water right 47-4294 (as well as other decreed water rights) appurtenant to property owned by the LLC in T.9S R.16E Sections 7, 12, 17 and 18 in Twin Falls County, ID. Although waste water and spring water (springs identified in 47-4294) have historically flowed through two existing ponds in T.9S R.16E Sections 17 and 18, spring water now fills the two ponds (see attached map showing conveyance of water from springs to ponds). The larger of the two ponds has been in existence for more than 40 years, the smaller of the two ponds was constructed in 1994 or thereabouts. The attached water right permit application proposes to allow the diversion of up to 7.0 cubic feet per second presently authorized under 47-4294, into the two ponds for year round recreation, wildlife and aesthetic uses. The attached water right permit does not seek to appropriate or consume more water than has been authorized under 47-4294.

Use of Spring Water Right 47-4294 for Mitigation

The surface area of the eastern pond is 3.4 acres and the western pond has a surface area of 0.6 acres; they both have an average depth of 6 ft. Therefore, the total volume of the two ponds is approximately 24.0 acre-feet. Evaporation data from Allen and Robison¹ for the two ponds was calculated using data from the Buhl NWS weather station for open water, shallow systems using the annual P_{def} value of 658mm or 2.16 ft. For both ponds, the total annual evaporation volume was calculated at 8.6 acre-feet. Using an assumed seepage rate of 0.4 ft per day (for ponds that have been silted in and sealed from decades of wastewater input), an annual seepage rate for both ponds was calculated at 584.4 acre-feet. The summation of these three volume components equates to 617.0 acre-feet of volume required to be identified on the permit application.

For the 24.0 acre-feet of actual pond storage, this application does not propose a first fill component because of the age of the ponds; they have been full for over 20+ years and they are currently full and spilling water back to the Snake River. The 8.6 acre-feet of evaporation will be mitigated by drying up a portion of 47-4294. Grass pasture, low management has been grown in association with 47-4294. Per Allen and Robison, the annual P_{def} value for grass pasture, low management is 683 mm or 2.24 ft. In order to

¹ Allen, Richard G. and Clarence W. Robison, 2012. *Evapotranspiration and Consumptive Irrigation Water Requirements for Idaho: Supplement updating the Time Series through December 2008*, Research Technical Completion Report, Kimberly Research and Extension Center, University of Idaho, Moscow, ID.

mitigate for 8.6 acre-feet of evaporation, 3.9 acres of 47-4294 will be permanently dried up as seen on the attached map. Seepage associated with these ponds is assumed to be non-consumptive. The close proximity of the ponds to the Snake River, shallow depth to bedrock, and the elevation difference between the ponds and river allows seepage water to drain back to the river.

Permitting the ponds described in this application is consistent with the public interest, is not intended to, nor will cause an expansion in consumptive use, nor injure an existing water right holder.

RE: Application For Permit No. 47-17656

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

Further review of your Application for Permit which proposes diversion of 5.0 cfs or more reveals that additional information is required to be made part of the application file pursuant to Idaho Code provisions and the department's Rules and Regulations for Water Appropriation. The attached sheets give details regarding the information which is requested.

Failure to supply the requested information within 30 days from the date of this letter could result in a regional recommendation that the application be declared void, null, and of no further consideration by the Department.

A legal notice of the application has been prepared and is scheduled for publication in the **TIMES NEWS** on **5/5/2016** and **5/12/2016**. Protests to this application may be submitted for a period ending ten (10) days after the second publication (**May 23, 2016**).

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact Jana Reeder at this office if you have any questions regarding the application.

Sincerely,

Denise Maline
Administrative Assistant

cc: BROCKWAY ENGINEERING PLLC

GUIDELINE FOR SUBMITTING ADDITIONAL INFORMATION

This outline is intended to assist you with providing the additional information required under Rule 40 of the Department of Water Resources and Idaho Code, Section 42-203A(5)(a) which may help answer questions as to the type of information you should submit. The outline below follows the same order as the attached rules. Please take the time to review the outline. Much of the information requested under Rule 40 may already be available to you. Gathering the necessary information may be of benefit to you in planning the proposed development.

Rule 040.05.c and Idaho Code, Section 42-203A(5)(a) Information relative to effects on existing rights:

i. If diverting from a surface water source with 5 or fewer existing users, submit the water right numbers held by those users if available.

If not available, submit the names and addresses of those users and describe the location of their diversions and types of use associated with those diversions.

ii. If you are diverting from a groundwater source, submit a map locating your proposed well and all other wells within a 1/2 mile radius of your well. It would be helpful to describe the use from those wells (i.e.; domestic, irrigation etc.). You are not required to submit a map if there are no wells within the 1/2 mile radius, but you should indicate if there are no existing wells within that radius, if that indeed is the case.

iii. This rule seeks general information about the type of irrigation system you intend to install and how the project may affect other users. If you feel your proposed project will not affect other users, then explain why. You may describe any techniques or equipment you intend to employ which may reduce impacts on other water rights or promote water conservation.

Rule 040.05.d and Idaho Code, Section 42-203A(5)(b) Information relative to sufficiency of water supply:

i. Provide projections for your peak and average water demands. While your well or diversion may not yet be completed, you should be able to estimate project demand based on size of project (or number of acres irrigated), type or texture of local soils, type of crops grown, and type of irrigation system used. Demand projections should be given in terms of flow rate (cfs or gpm) and annual volume diverted (acre-feet).

Example: A 40 acre tract with 6 handlines and 20 heads/line discharging 3 gpm/head would produce a total flow rate of about 360 gpm or 0.8 cfs (1 in/acre). This flow rate multiplied by average number of hours per set, sets per irrigation and irrigations per year provides number of acre-feet per year or annual volume.

ii. You should be able to provide some basic information about the nature of the water supply. If the diversion is from a surface water source for example, you should provide stream flow data or estimate the amount of stream flow available for diversion and describe generally the seasonal availability of water. If you are diverting from a groundwater source, you should be able to generally describe the aquifer which you plan to divert from, i.e.; deep confined or shallow unconfined aquifer, depth to water level or depth to aquifer, known yields from wells within the same aquifer etc.

Rule 040.05.e and Idaho Code, Section 42-203A(5)(c) Information relative to good faith, delay, or speculative purposes of the applicant:

i. If you do not own the land to be irrigated and/or where the point of diversion is located, you must submit copies of lease agreements, easements or rights-of-way etc. If you are the owner of the place of use and point of diversion, documentation of ownership is not required.

ii. If applicable, submit copies of applications for permits or approvals which are needed from other government agencies or individuals in order to complete the water development project.

Rule 040.05.f and Idaho Code, Section 43-203A(5)(d) Information relative to financial resources:

i and ii. Submit a current financial statement or other statement describing how you will finance the project. You must also submit plans and specifications along with basic estimates of construction and equipment costs of the proposed project.

Rule 040.05.g and Idaho Code, Section 42-203A(5)(e) Information relative to conflict with the local public interest:

i. You, as the applicant, bear the initial burden of coming forward with evidence as to whether your proposed project may have any affect concerning local public interest. If you have any reason to believe that the proposed project under your application may be of concern to any local individuals, governments, tribal reservations, irrigation districts, the State Fish and Game Department, or Health and Welfare Department, then you are responsible for seeking comments from those individuals or groups. This requirement is mandatory for projects located within irrigation districts, canal companies or tribal reservations (failure to obtain comments from the irrigation district, canal company or reservation will delay approval of the application.). All comments must be submitted to the Department of Water Resources.

Use: WILDLIFE 01/01 to 12/31 7 CFS

Use: WILDLIFE STORAGE 01/01 to 12/31 617 AF

Total Diversion: 7 CFS

Date Filed: 3/11/2016

Place Of Use: AESTHETIC, AESTHETIC STORAGE, RECREATION, RECREATION STORAGE, WILDLIFE, WILDLIFE STORAGE

T09S R16E S17 L9(SWNW)

T09S R16E S18 L14(SENE)

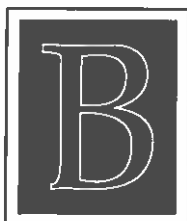

Application proposes diverting up to 7.0 cfs from spring water for recreational, aesthetic and wildlife uses associated with existing ponds. Application also proposes to appropriate 617 AF for storage volume and evaporative and seepage losses associated with the same ponds. The springs and ponds are located approximately 5.0 miles north of Filer on the south side of the Snake River. A mitigation plan is included with the application.

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 80835**

JIM D SCARROW, 3184 S 1900 E, WENDELL, ID 83355; has filed Application No. 80835 for changes to the following water rights within GOODING County(s): Right No(s). 36-10446, 36-15094, 37-3155, 37-795, 37-796, 37-798. The purpose of the transfer is to change a portion of the above rights as follows: Application proposes combining three Birch Creek rights (2.04 cfs), a South Fork of Birch Creek right (0.5 cfs), an unnamed stream right (0.09 cfs), and a wastewater right (0.61 cfs) to create a new 118.7 acre permissible place of use on a farm located approximately 2.2 to 2.6 miles north of the City of Hagerman. Existing diversions, plus two new proposed diversions for the wastewater right, will divert up to a total of 3.24 cfs for the irrigation of 48.6 acres within the new 118.7 acre permissible place of use to reflect current irrigation practices.

Permits will be subject to all prior water rights. For additional information concerning the property locations, contact Southern Region office at (208) 736-3033; or for a full description of the rights &/or proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx . For additional information on new permits, please see www.idwr.idaho.gov/WaterManagement/WaterRights/#NewListings. Protests may be submitted based on the criteria of Sec 42-222 and 42-203A, Idaho Code. Any protest against the approval of this application(s) must be filed with the Director, Dept. of Water Resources, Southern Region, 650 Addison Ave W, Ste 500, Twin Falls, ID 83301 together with a protest fee of \$25.00 for each application on or before May 23, 2016. The protestant must also send a copy of the protest to the applicant.

Re: Application for Water Right Permit; Canyon Springs LLC and
Withdrawal of Water Right Permits 47-8213 and 47-8198.

Dear Allen,

Enclosed is an application for permit in the name of Canyon Springs LLC for the diversion and storage of spring water in two ponds on the Canyon Springs LLC Property. The permit application seeks to permit two existing ponds with spring water diverted under 47-4294 for year round recreation, aesthetic and wildlife storage. The attached mitigation narrative outlines the proposal and identifies mitigation for the new permit.

Also enclosed is a letter from Canyon Springs LLC requesting that permits 47- 8213 and 47-8198 be withdrawn. Please see the accompanying permit withdrawal request letter. A Brockway Engineering PLLC check for \$490.00 has also been included to cover the cost of the permit application. Please let me know if you have any additional questions regarding this permit application, thanks for your time.

CHARLES E.
BROCKWAY,
PH.D., P.E.
