RE: Point of Diversion location of Water Right 75-14499

Dear Water Right Holder(s),

Recently the Idaho Department of Fish and Game submitted an application for permit for the non-consumptive use of water at a fish screen on Carmen Creek in close proximity to your water right. This particular fish screen, also known as "SCC-05" by the Department of Fish and Game, has identified the point of diversion (POD) on Carmen Creek as being in Twp. 22N, Rge. 22E, Sec. 9 NWNE.

During the evaluation of the application, it was noted that the mapping representation of one of the PODs for water right 75-14499 may not be accurate. If the POD is located within the SWNE as indicated on your water right and you would like me to update the representative map location, please mark the actual location of the diversion on Carmen Creek on the attached map and return it to me. If the POD is actually located beyond the QQ line and into the NWNE, a transfer of the POD location would be required to change the location on the water right.

I am sharing this information as an opportunity to more accurately reflect your water right. No action is required at this time. If you have any questions, please feel free to call me at 208-287-4933.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steven Visosky'.

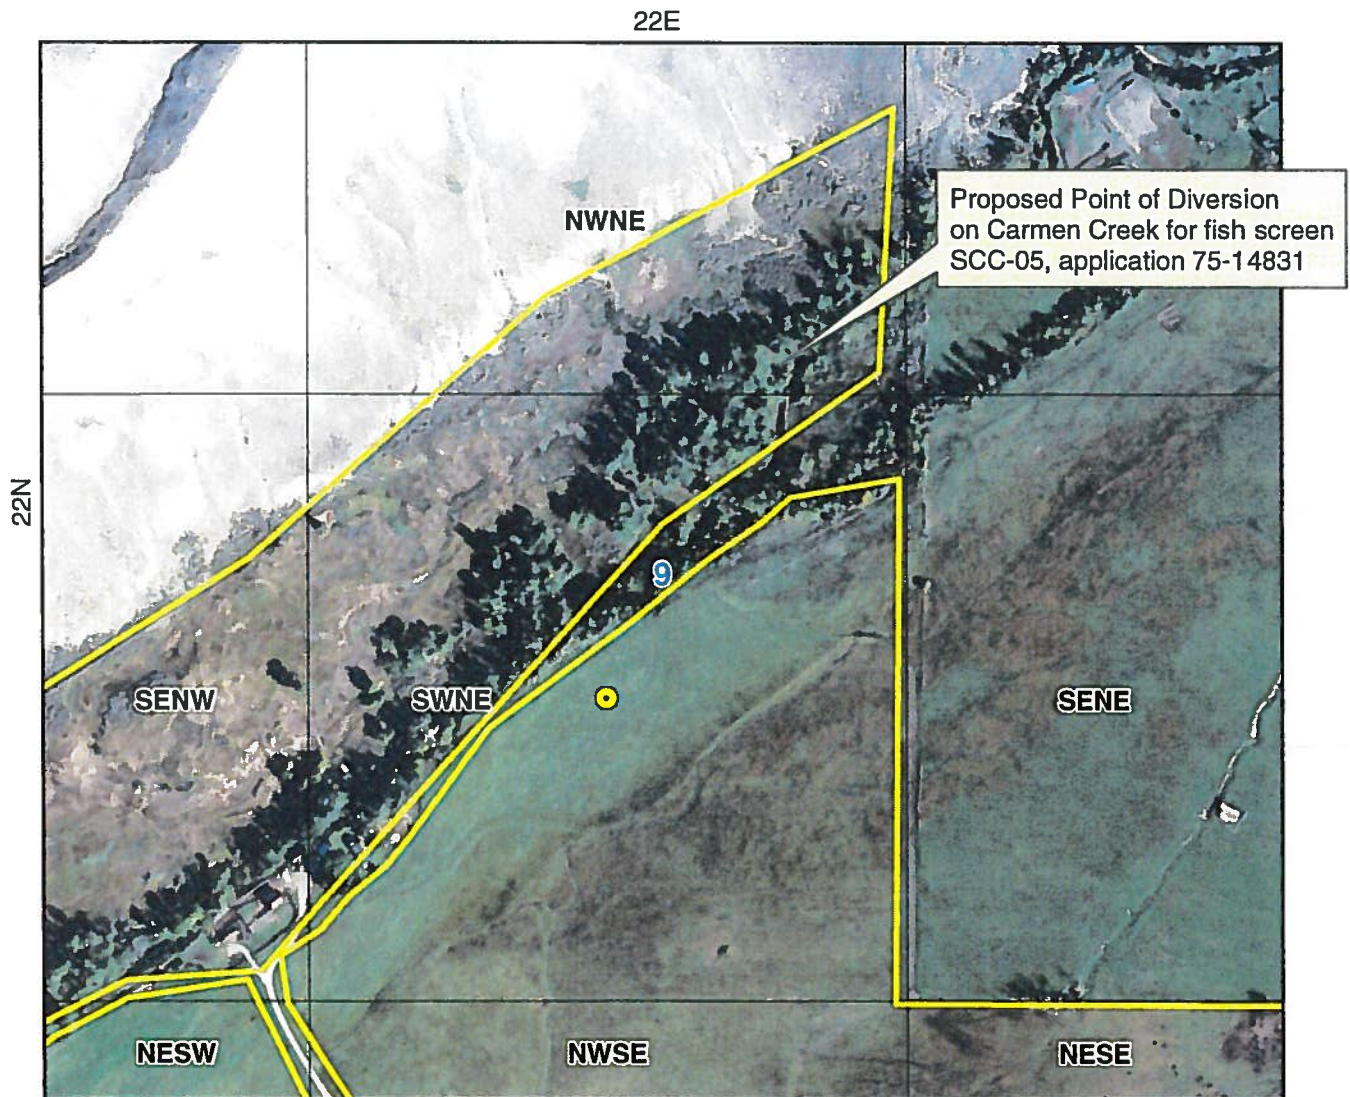

Steven Visosky
Water Resources Agent
