FROM: Steven Visosky
RE: Updating POD location on Carmen Creek

On March 23, 2016 the owners of water right 75-14499 were contacted to clarify the location of their water right POD on Carmen Creek. On 4/1/2016, Bruce McFarland (one of the owners of the water right) telephoned me to discuss the letter.

Bruce McFarland confirmed the "centroid" map location of the POD was incorrect however he was not sure exactly where on the map the POD is located. Bruce mentioned that the POD appeared to be very close the QQ line on the map sent to him. We discussed how a transfer would be required to move the POD to a different QQ listed on the water right. We also discussed that I could update the POD location if he submitted a map and it was within the same QQ.

It was concluded from the phone call that Bruce may attempt to GPS the POD and may file for a transfer if the location needed to be changed on his water right as he wanted to do "the right thing".
