Hello! We are berry growers and are in need of water for the spring planting on our acreage at highway 20-26. We recently acquired this land and have service water access. It is our goal to grow organically as possible. The service water may have residual herbicides, pesticides and/or other unorganic chemicals from other growers. Having our berries watered with well water would assist with our goal in providing organically grown berries. Currently, there isn't a well and we are needing to put one in as soon as possible. It was unbeknownst to us that the application process would take up to 8 weeks! We would have applied for it in January with that knowledge. We would greatly appreciate our application for water rights to be expedited.
