4. Domestic use is for 5 homes and does not include lawn, garden, landscape, or other types of irrigation.
5. The domestic use authorized under this right shall not exceed 13,000 gallons per day per home.
6. Water bearing zone to be appropriated is from 250 to 500 feet.
7. Only one well may be operated at a time under this water right except in the case of a fire unless the Department expressly approves a method of measurement and reporting that insures adherence to annual volume limitations while water is pumped from both wells simultaneously.
8. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.
9. Noncompliance with any condition of this right is cause for the Director to issue a notice of violation, cancel or revoke the right, or, if the right is included in a water district, request that the watermaster curtail diversion and use of water.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.
