RE: Application for Permit

Dear Mr. Doberstein:

Here is the Application for Permit form (and the instructions for filling it out) that I promised to send you earlier today. You will need to have the application for permit processed before you can legally use the 3<sup>rd</sup> well.

I have also enclosed a couple of well logs for wells in the area. The vast majority of the wells are 50 ft or shallower and deliver less than 50 GPM. There is a reliable clay layer in the area that when tapped, can supply enough water for domestic use. A few fortunate well owners tapped into a sandy or gravelly layer less than 50 ft deep that provided more than 50 GPM. That was luck. However, I found that there is a well ~0.5 mile due north of your property that is significantly deeper than 50 ft and appears to be capable of delivering 200 GPM. That well is the Champion Home Builder Co's well.

Your property is in an area that is under the jurisdiction of our Western Region Office. Therefore, please submit your completed application package to them at Western Region, Idaho Dept of Water Resources, 2735 Airport Wy, Boise ID 83705.

If you have additional questions call either the State Office 287-4800 or the Western Office 334-2190.

Sincerely,

Michele D. Edl
