

MEMORANDUM

Date: April 15, 2016
To: Water Right File 67-15040
From: Michele Edl
Re: well system

I spoke with Mr. Robert Doberstein at some length in office day phone calls yesterday, April 14, 2016. He has recently purchased the property associated with Permit 67-15040. Proof had been submitted timely by the previous owners on November 2, 2015.

Although Permit 67-15040 authorized only 2 PODs, according to Mr. Doberstein there are 3 wells drilled within the property. The previous owners, Randy Smith and Janine Smith, had paid for a 3rd well to be drilled in the property and there is some evidence in the GW files, that a third drilling permit may have been issued.

Apparently the driller had died unexpectedly and before the paperwork was filed on the completed well. Mr. Doberstein has very little information about the new 3rd well but believes that he will need to utilize it in order to successfully grow the intended crops. As of the date of this memo, the two earlier wells are connected to the irrigation system. The third well is not.

I explained to Mr. Doberstein that he was not currently authorized to use the third well, but because the area is open for new appropriation, he could file an application for permit for the additional rate and point of diversion.

Mr. Doberstein did not have easy access to a computer, so I sent an application for permit form and instructions for completing it, to the address that he gave me.
