Ident. No. 75-14835

Department of Water Resources
Eastern RegionSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

Amended
AMENDED

1. Name of applicant(s) STATE OF IDAHO, Idaho Fish and Game Commission Phone (208)334-3700
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address P.O. Box 25 City Boise
 State Idaho Zip 83707 Email larry.weeks@idfg.idaho.gov

2. Source of water supply Freeman Creek which is a tributary of Salmon River
 3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
23N	22E	36		NW	NE	SE	Lemhi	Freeman Creek	SCCFC-02

4. Water will be used for the following purposes:
 Amount .80 for Fish Propagation purposes from 04/01 to 11/01 (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) .80 cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. The fish screen located downstream from the headgate has a 10" bypass pipe with a 4" inlet orifice for fish return

b. Height of storage dam NA feet; active reservoir capacity NA acre-feet; total reservoir capacity NA acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No

c. Proposed well diameter is NA inches; proposed depth of well is NA feet.

d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No

e. If well is already drilled, when? NA; drilling firm NA;
 well was drilled for (well owner) NA; Drilling Permit No. NA.

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. NA

b. Stockwatering; list number and kind of livestock. NA

c. Municipal; complete and attach the Municipal Water Right Application Checklist.

d. Domestic; show number of households NA

e. Other; describe fully. This is a non-consumptive use of water that enables fish to return to the stream through a bypass pipe that runs from the fish screen to the stream.

* Amended application

AMENDED

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below.
See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
23N	22E	36													H				

Total number of acres to be irrigated: 0

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping?

There are over 250 fish screens in Lemhi, Custer, and Blaine Counties that have non-consumptive water rights that are held by the State of Idaho Fish and Game Commission. 74-1692; 74-1693; 74-1696

10. a. Who owns the property at the point of diversion? Wolfley Family Living Trust
- b. Who owns the land to be irrigated or place of use? Wolfley Family Living Trust
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing:
IDFG has a easement for ingress and egress to construct and maintain fish screens on this property
11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

12. Time required for completion of works and application of water to proposed beneficial use is 1 year years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

EASEMENT AGREEMENT

(Land Owner) CEF--2

THIS INDENTURE, Made and entered into this 21st day of February, 1959, by and between E. R. and CARMEN WOLFLEY, husband and wife, hereinafter called Grantors, and the STATE OF IDAHO for the use and benefit of the Department of Fish and Game, hereinafter called Grantee, WITNESSETH:

That for and in consideration of the sum of ONE DOLLAR (\$1.00), cash in hand paid by the Grantee to the Grantors, receipt whereof is hereby acknowledged, the Grantors have this day bargained and sold and by these presents do hereby grant, bargain, sell, convey, transfer and deliver unto the Grantee a permanent easement for the purposes of construction, operation, maintenance, alteration, renewal and removal of a self-cleaning fish screen and fish bypass thereto on, within, and across a canal or ditch known as Outler No. 1 Ditch and located in Lemhi County upon lands of the Grantors at a point within the NW 1/4 SE 1/4, Section 36, Township 23 North, Range 22 East, Boise Meridian, which point is approximately 180 feet south and 100 feet west of the northeast corner thereof, said fish bypass to run from said fish screen to the adjacent stream course known as Carmen East Fork. Together with the right of ingress and egress for personnel of the Grantee or its authorized agent or agents on and over property of the Grantors for the purposes herein designated, together with rights of way along the canal channel to provide for removal of debris, logs, log jams, mud or gravel bars that may accumulate in the canal channel or ditch immediately above or below the fish screen and which have been caused to accumulate by installation of said fish screen.

In the event of any future alterations in the line or grade of the canal channel, ditch or stream course necessitating changes in or relocation of the Grantee's installations, the Grantors, by these presents, also grant, bargain and sell to the Grantee an easement as herein first above granted to relocate its installations in said canal channel or ditch as the same may be located on the lands of the Grantors, their heirs and assigns.

All such installations placed on, within and across said canal or ditch by the Grantee shall be and remain the property of the Grantee and may be removed by the Grantee at any time.

All expenditures to be made by the Grantee under the provisions of this agreement shall be subject to appropriations being available for the purpose.

IN WITNESS WHEREOF, The said Grantors have hereunto set their hands and seals, the day and year first above written.

RE: Applications for Permit: 75-14824, 75-14825, 75-14826, 75-14827, 75-14828, 75-14829, 75-14830, 75-14831, 75-14832, 75-14833, 75-14834, 75-14835 and 75-14836

Dear Watermaster:

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced water right applications for permit. You can find copies of the applications at: <http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>. Please review the applications, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the applications are approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to these applications should be specifically addressed in your recommendation.

IDWR's offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Jean Hersley
Technical Records Specialist

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 4/21/2016 and 4/28/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Jean Hersley

This application proposes the diversion and use of water from a tributary of the Salmon Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because the diversion rate and acres will be applied to the subordination amounts specified in the decree for the Wild & Scenic River listed above.

These applications filed by the Dept of Fish and Game propose the diversion and use of water from a tributary of the Salmon Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in these applications will benefit from the subordination provision because it is for non-consumptive fish propagation purposes.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact the State office at (208) 287-4800; or for a full description of the right(s), please see www.idwr.idaho.gov/apps/ExtSearch/WRFiling.asp. Protests may be submitted based on the criteria of Idaho Code § 42-203A. Any protest against the approval of this application must be filed with the Director, Dept. of Water Resources, State Office, 322 E Front St, PO Box 83720, Boise, ID 83720 together with a protest fee of \$25.00 for each application on or before 5/9/2016. The protestant must also send a copy of the protest to the applicant.

Steven - The IDFG Anadromous Fish Screen and Habitat Program has been an integral part of improving conditions to support recovery of ESA-listed fish species Chinook salmon, steelhead, and bull trout in the Upper Salmon Basin. Fish screens and the bypass flows protect irrigators from illegal take of ESA-listed species and provide a benefit to the community by protecting and enhancing ESA-listed species populations for future generations. The Department certainly supports the approval of these water rights. Please let me know if you have any other needs. Thanks Tom Curet

Subject: Local public interest letter

Dear Larry,

Attached is the local public interest letter that we are required to send in regards to the 9 applications for permit that you submitted. Four are from your original application packet that you amended and 5 are new applications. Sources included in these application include Carmen Creek, Freeman Creek, Pahsimeroi River, Iron Creek, and Poison Creek.

I spoke with my supervisor and as we have been communicating via email, it would be OK for Tom to email me his response instead of writing a formal signed letter when responding. We are looking to see if he has anything further to add to his application in regards to the attached letter. Could you please share this information with Tom.

Please let me know if you have any questions.

MEMORANDUM

Date: April 8, 2016
To: Water Right File 75-14835
From: Steven Visosky
Re: Application for Permit Review

Applicant

Application for permit 75-14835 was filed by State of Idaho, Department of Fish and Game (Fish and Game) for fish propagation on Freeman Creek in Lemhi County. The application was signed by Fish and Game Region 7 Supervisor Tom Curet and was submitted by Fish and Game easement specialist Larry Weeks. The \$250 fee associated with this application for permit was paid through the Interagency Billing Process.

The original application was received on 2-16-2016 and was returned to clarify the source. The amended application clarifying the source was received on 3-23-2016 however the priority date should be set to the date the original application was received (2-16-2016).

The applicant does not own the land associated with the place of use (POU) or the point of diversion (POD) described in the permit. According to 2-24-2016 tax lot information from Lemhi County, the land associated with the POU and POD is owned by the Wolfley Family Living Trust. Fish and Game has submitted an easement agreement to construct and maintain fish screens on this property.

Source & POD

The proposed source of water is Freeman Creek, which is tributary to the Carmen Creek, which is tributary to the Salmon River. This surface water is within water district 75D Carmen Creek and the Wild and Scenic Watersheds of the Salmon River. Freeman Creek is listed as a minimum streamflow stream however no water rights are associated with this minimum streamflow. According to Application Processing Memo No. 70, Water delivery No. 3, all surface water rights and ground water rights diverted from hydraulically connected to the Wild and Scenic River reaches upstream from the ending points will be recorded, tracked, and administered as anticipated under the provisions of the Wild and Scenic Agreement. The applicant was sent an IDWR's additional local public interest information letter on 4-7-2016.

The POD is the headgate on Freeman Creek that is shared with three other water rights. Water travels down a conveyance ditch to a fish screen and then is diverted from the fish screen through a bypass pipe back to the source. The point where water is diverted back into Freeman Creek has been identified on a map submitted by Larry Weeks.

Use

The proposed use of the application is for fish propagation. This is a non-consumptive use of water that enables fish to return to the stream through a bypass pipe. Water right 75-4005 is diverted from this

same diversion and has an irrigation season of use listed as 4-1 to 11-15. The season of use for this permit should be 4-1 to 11-15 to match the longest possible season an irrigation right could be diverted from the diversion.

POU

The POU for fish propagation is the 10" bypass pipe that runs from the fish screen back to Freeman Creek.

POU/POD overlap analysis

Application for permit 75-14835 proposes to share this diversion with three other water rights. This diversion is also known as the "SCCFC-02" diversion by the Fish and Game. There are no other water rights in the QQ with the same fish propagation use.

RE: Application to Appropriate Water in the Upper Salmon River Basin 75-14828, 75-14834, 75-14835, 75-14836, 73-12256, 75-14838, 75-14839, 75-14840, 75-14841.

Dear Water Right Applicant:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund

- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the draft Comprehensive State Water Plan under revision by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery. Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at 208-287-4951, or email me at pam.skaggs@idwr.idaho.gov.

Sincerely,

For Pamela Skaggs
Water Rights Supervisor

RE: Applications for Permit No. 75-14834, 75-14835 and 75-14836

Dear Applicant(s):

The Department of Water Resources has received your water right applications. Preliminary review of the applications indicates that they are incomplete and cannot be accepted for processing. We are returning your application to allow you to complete the necessary items. The required information is described below.

- The Source was not provided correctly. Item #2 on the applications lists the source of water supply as Carmen Creek which is a tributary of the Salmon River. However, on item #3, Freeman Creek was listed as the source. Please correct this, initial and date the correction and return to the State Office.

Please feel free to contact this office if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Jean Hersley".

Dear IDWR:

Enclosed please find 13 "Application for Permit" for new water rights in Basin 75. Please initiate the Interagency Billing Process for the \$250.00 fee for each of these applications. When processing these applications, use PCA 35794, and code B6RA. Please send the billing documents to IDFG Headquarters Office, Attention: Walt Poole, P.O. Box 25, Boise, ID 83707.

Please send a copy of the approved permit to IDFG, Attn: Larry Weeks, 97 Hwy 93 N, Salmon, Idaho 83467. Please call me if you have any questions at 208-756-6022.

Sincerely,

Larry Weeks
Easement Specialist
