CONDITIONS APPLICABLE TO ALL RENTED WATER RIGHTS

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. This rental does not grant any right-of-way or easement to use the diversion works or conveyance works of another party.
5. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
6. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
7. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
8. Renter acknowledges and agrees that the Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
9. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
10. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

11. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
12. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 02.
13. This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it Attachment 4B:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it Attachment 4C:

Clay,

No concerns. It'll be interesting to see where Grandview Mutual ends up on a permanent solution for this dilemma... We have a permit application pending we've given them significant time to address trust water issues on, but still no resolution (it's not looking good). Should be interesting. Thanks for the opportunity to comment!

MEMORANDUM

To: Water Rights 02-4013, 02-10201 and 02-10472
From: Clay Webster
Date: 3/21/2016
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The department received this application to fulfill the unfilled portion of last year's rental request. This request is for irrigation of 168.9 acres identified in Twp 05S Rng 02E in Sections 1, 2 and 12. The true purpose of this rental is to provide rate (2.93 cfs) and volume (760af) to aid in the conveyance loss of their system. Last year they requested 10 cfs and 2250 af for 5 years. We were able to provide 7.07 cfs and 1551.5 af for 5 years and a single year rental for 0.30 cfs and 60.0 af.
The rights for this rental represent what is available for this area. 02-10201 will only provide 0.83 cfs and 189.0 af for a three year rental.
02-4013 Will provide 0.82 cfs and 164.0 af for a one year rental.
02-10472 will provide 0.30 cfs and 60.0 af for a one year rental.

AUTHORITY TO FILE: This application was signed by Rohl Hipwell, he is listed as the President of the Grandview Mutual Canal Company on the Idaho SOS web site.

WATER RIGHT VALIDITY: 02-4013 was leased entirely in 2015 through 2016. A portion of this right has been rented. This rental will use the balance of this water right. 02-10201 was decreed in 2009. It was leased into the WSB in 2015 through 2018. 02-10472 was split via transfer in 2011 from water right # 02-10449. This right was leased entirely in 2015 and then again in 2016. Forfeiture is not an issue for either of these rights at this time. Satellite imagery shows that the leased acres have been idled. These rentals will use all of the water available under these rights.

INJURY TO OTHER WATER RIGHTS: These rights divert water from CJ Strike Reservoir and upstream. The rental will also divert water out of CJ Strike Reservoir. Review staff has found no indications that this rental will cause injury to other water right users.

ENLARGEMENT OF USE: The applicant has identified a specific place of use to prevent enlargement of these rights.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is subject to a Water District 02. Comments were requested from the watermaster and the regional office on 3/17/2016. The regional office had no concerns. I discussed this rental application with the watermaster on 3/21/2016 and he told me to proceed with the rentals to address this application.
