There is no form for a petition to reconsider, you can compose a letter addressed to the regional manager (the one who signed the preliminary order). The letter should contain the purpose of the letter "I am petitioning for reconsideration for application no..." and the reasons why the department should reconsider the preliminary order to void. You can fax or email an electronic version and mail the signed original if that is easier then bringing the signed letter to this office.

Good morning Phil,

Where can I find the petition for reconsideration form? Is it available on the the website? I have the yellow explanatory form, but I am having a hard time finding the petition form online. Does it go by another name? Or is just a written statement requesting for reconsideration? I appreciate your help. Thank you.

I received your application but have not yet received the petition for reconsideration. The deadline to submit the petition is 14 days after the date of the preliminary order. The order was signed 01/22/2016 making today the 14 day deadline

Brandon,

I looked over your corrected application and made one minor change to section 8. I removed the rate of water from the totals column and added the number of acres to be irrigated. Attached is pdf with the changes I made. When you submit this corrected application please submit a map with the well site marked (POD) and outline the land that you intent to irrigate (POU).

Hi Phill

My Water Right Permit Application No. is 78-12432. I am sorry it has taken so long to get back to you regarding the requested amendments. I understand that I need to fill out a petition for reconsideration, and I plan on mailing you the hard copy of this ammended application. I was hoping you could look this over and tell me if it's all filled out correctly so I can sign it and mail it out tommorow. Thank you for your help, and please let me know if there is anything else I need to do to successfully complete this application process.
