AMENDED APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:
New wells will be constructed and installed with an authorized IDWR measuring device with lockable controlling works. The wells will tie into the existing irrigation system to provide groundwater when the surface water is no longer available.
- b. Who owns the property at the point(s) of diversion? Albion 12 Investments, LLC
 If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
If the water right is transferred, then the water right will change ownership to Albion 12 Investments.
- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
 If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: _____

 It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.
- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?
 If yes, ☐ complete Attachment WSB.
- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
See Attachment Water Right Summary

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:
 Yes No
☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

AMENDED APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☐ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**.

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☒ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

This groundwater right is currently a supplemental right for 67 acres with the following rights: 45-14288, 45-10912, and 45-14286. Right 45-14286 is a 7/1/1876 right from Marsh Creek for 67 acres. Right 45-14288 is a 3/31/1888 right from Lake Cleveland for 67 acres. Right 45-10912 is a 3/1/1965 right from Springs for 29.9 acres. After the groundwater right is relocated, there will be no change in the water right combination at the original place of use.

This groundwater right will be moved to irrigate 67 acres of property that is currently irrigated by water right no. 45-284B. Water right no. 45-284B has a priority date of 4/1/1875 from Howell Creek and authorizes irrigation on 90 acres. Water right no. 45-284B is within a Permissible Place of Use. There will be no expansion of the acres of irrigation, no expansion of diversion rate, and no expansion of supplementalness - as the underlying right at the new place of use is more reliable than the combination of rights at the current place of use. To illustrate how the groundwater right will not be expanded, we have used the reported cumulative water delivery by the watermaster, and have included it as Attachment #8b.
