Re: Review & Evaluation of Sufficiency of Information

Review & Evaluation of Sufficiency of Information
2/19/2016

The overall intent of this Transfer is to update the water system of Round Lake State Park by drilling a new well that will become the primary well for the Park water system. Use of the new well is recommended in a 2015 Idaho Department of Environmental Quality (DEQ) report. Use of the new well will reduce the likelihood of septic system contamination in winter months and allow the current primary well used for Water Right License 96-7466 to become a backup well.

The well for Water Right License 96-7036 is currently inactive and the pump has been removed. Completion of the Transfer will allow the Park to move the Point of Diversion for this right to the backup well location.

Authority to File: Idaho Department of Water Resources (IDWR) records indicate the Applicant is the Current Owner of both Water Right Licenses involved in the Transfer.

Water Right Validity: The June 2015 Idaho Department of Environmental Quality (DEQ) Drinking Water Supply Report for Public Water Supply (PWS) Number ID1090116 (Round Lake State Park) was reviewed. The DEQ Report indicates that all portions of Water Right License 96-7036 and 96-7466 remain in use and none has been forfeited for non-use within the last five years.

Injury to Other Water Rights: The proposed transfer utilizes a new well (Groundwater) as the proposed source. The new well is not close to wells owned by other parties or Water Rights that utilize Groundwater. Adverse impact to any existing Rights is unlikely.

Enlargement of Use: No enlargement of use is proposed.

Local Public Interest: No damage to the local public interest is likely to occur if the Transfer is approved. The location of the proposed new well has already been approved by DEQ as indicated in the June 2015 report.

Beneficial Use/Conservation of Water Resources: The Transfer does not propose an increase in use that would adversely affect conservation objectives.

Effect on Economy of the Local Area: No net negative effect on the local economy is likely from the action proposed in the Transfer. The improvements to the water system of Round Lake State Park proposed in the Transfer may improve the local economy through increased tourism and recreational opportunities.

Effect on Agricultural Base of the Local Area: The proposed action does not involve use of water for irrigation or other agriculture use and is not likely to negatively affect the agriculture base of the area.

Review of the Application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Does Panhandle Health have Sanitary Survey or site inspection reports for Round Lake State Park, off Dufort RD, in Bonner County? The PWS Number is ID1091116. My PWS list shows Dave Russell as the Point of Contact.

We have a Transfer to review that involves two separate Water Rights. A new well is to be added.
