Allen,

In reviewing the Trust Water conditions applicable to the above mentioned application, condition #s 10, 11 & 12 appear to represent the standard conditions and mitigation condition imposed by the IDWR. With respect to the mitigation requirement, is there or should there be an obligation of the permit holder to submit proof of compliance with condition #12 on an annual basis? This additional language would ensure that the permit holder complies with mitigation imposed and submits the necessary information to IDWR.

Thank you for your attention to this matter.
