3D Water Association Inc.  
450 B Street  
Idaho Falls, ID 83402

Welcome to the BJGWD (Bonneville Jefferson Ground Water District).

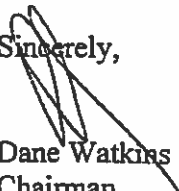

We are happy that you have teamed up with us in an effort to protect and preserve our aquifers and water rights.

BJGWD works to promote and support sound management of groundwater based on local conditions and good science. BJGWD provides educational and technical assistance to members and the public, serves as a resource on groundwater issues with state officials, assists members in keeping current with state law, and is a central point of contact for information on groundwater issues and practices.

BJGWD also provides members with an efficient means of communicating and exchanging information on the day-to-day management of local groundwater resources. BJGWD members form a network of valuable technical and operational experience and knowledge, facilitating information exchanges that work to save districts both time and money.

BJGWD can handle measurement and reporting functions required by law. Additionally, we can "represent our members in various water-use issues and related legal matters, develop and operate mitigation and recharge plans, and perform other duties," according to IDWR.

Sincerely,

  
Dane Watkins  
Chairman
