That sounds great lets proceed as you have suggested.
Thanks also on including the other S/C rights would be fine too.

Thanks

Mr. Thompson,

It was pointed out to me during advertisement prep, that the PPU for associated rights 61-2220 & 61-7060 may not be changed without including the rights in the transfer. To do this of course would require additional transfer fees. For purposes of the transfer, we may not actually have to change the irrigation POU at all, and just add the stockwater / commercial use to the NE quarter. The transfer would reduce the number of acres available to irrigate in a season, but maintain a 920 acre PPU.

I have attached another transfer application page 3 for your review. Let me know and we will move forward with advertising.

If we need to separate the stock and commercial we can but they only have one measuring device and it measures both uses. There is a second parlor that is built but you are correct the existing commercial use as separated should be adequate. So I'm fine with either as long as they don't have to install another measuring device.

Mr. Thompson,

We are in the right direction. Page 5 looks good. I have included a draft of Page 3 for you to review. We want to describe the right *after* all changes are made. This should include the remaining irrigation use. Also, we want to separate the commercial and stockwater use to identify where we are moving the water to. Review of the dairy analysis shows that the water is needed for additional stockwater rather than actual dairy operations. I added the changes to irrigation to the stockwater use and left commercial as it stands. For #4, we want to identify all the place of use after changes are made. You had submitted a POU within Section 8, NENE and SENE QQ. Is this where the additional stock/commercial use is going to be placed? It looks like you will want to include the existing dairy use within the NW quarter of Sec 8. Finally, I removed the 45.5 acres from the QQ you outlined and fully described the remaining PPU. Please review the aerial photo map to confirm these QQ descriptions are accurate. Make changes to the attached doc as needed and return. Once this is received, looks like we can move forward.
