CONDITIONS APPLICABLE TO ALL RENTED WATER RIGHTS

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. This rental does not grant any right-of-way or easement to use the diversion works or conveyance works of another party.
5. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
6. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
7. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
8. Renter acknowledges and agrees that the Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
9. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
10. This rental agreement does not authorize the construction of a well.
11. The renter must diligently pursue a permanent water right to provide for the uses authorized under this rental agreement.
12. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.

13. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
14. The water right(s) referenced above is accepted into the bank and rented in accordance with a private agreement formulated between the lessor and the renter. Administrative fees will be paid based on the current rental rate.
15. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO. 37-2619**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$71.40** was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 4.2 acre-feet. Since you have a private agreement with the lessor, **you are only obligated to pay the 10% administrative fee or \$7.14.** An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$7.14 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

MEMORANDUM

To: Water Right No(s): 37-2619
From: Michele Edl
Date: January 4, 2016
Re: Review and Analysis of Greenstein Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: On November 23, 2015, James Speck submitted a lease-rental package which included a lease application and two rental applications for water right 37-2619. This rental application proposes to rent a portion of 37-2619 to irrigate 1.2 acres in SWSE sec 1, Twp 4N, Rge 17E. The application requested a rental agreement with a 1-year duration for Jeffrey Greenstein and Judith Greenstein.

AUTHORITY TO FILE: According to available Blaine County taxlot information, the proposed place-of-use is owned by Jeffrey Greenstein and Judith Greenstein. The application is signed by both renters. The proposed point-of diversion is an existing well located on the Greenstein property. That well is the source of an unrecorded domestic use.

WATER RIGHT VALIDITY: Water right 37-2619 is leased to the Bank and is available for rent. A review of aerial photography of the former POU shows that the water right use has been idled at that location. Water sufficient to satisfy this rental request is available from the right.

INJURY TO OTHER WATER RIGHTS: No injury is apparent. The rental point-of-diversion is located more than one hundred feet from the Big Wood River so there are no concerns about a direct impact to the river or injury to the minimum stream flow. The lease and rental PODs are both wells in the Ketchum zone. Therefore, any ground water accretions/depletions are contained to this administrative area.

ENLARGEMENT OF USE: No enlargement is evident through the rental. Both the lease and the rental locations have the same standard season-of-use. The application requested the standard rate of 0.02 cfs/ac for irrigation purposes and that flow can be provided by the right

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: Comments were requested from the Watermaster and Southern Region staff. Southern Region manager did not oppose the rental.

In the 2015 season, the Watermaster requested that a condition requiring flow meters be included in the agreement to ensure this rental and the use of water in excess of the 0.5 acre de minimis exemption conforms to the measurement requirements applied to all other points of diversion. A condition requiring a flow meter was included on the July 2015 rental agreement. Compliance with that condition is unknown. The watermaster did not respond to this request for comment.
