Gentlemen

On December 30, 2015, I called Ms. Newbry to indicate that it was going to be very difficult to take the meter readings of the individual home owners due to the heavy snow fall which we have experienced. Ms. Newbry indicated that I should write a letter to the Department so indicating.

We will undertake the meter readings for each home owner as soon as the snow levels go down to a point where we can find meter boxes and clear enough snow to access the meters themselves.

To avoid this problem in the future, we request that we be allowed to change the measuring period to determine compliance with paragraph 5 of our water license from the current January 1st – December 31st to a period starting with July 1 and ending June 30.

With respect to the water measurement annual report due on January 15 (the measuring device Method for Totalizing Flow Meters form) for the same reasons stated above, it is very difficult to obtain the meter readings for December for Wells #4 and #6. We can provide you the meter readings at each well site through November but would request an extension for filing this report until we can more easily access each well site.

We would further request that in future years we be allowed to file this totalizing report for the 12 month period starting on July 1st and ending on June 30th. This will assure that we can avoid these delays due to weather conditions in the future.

Thank you.

Very truly yours,

Fernan Estates Corporation
