Subject: Harris Family license 63-32966: excess mitigation

Jim,

In discussing your licensure with the water rights section manager it was noticed that you are currently mitigating a total of 25.2 acre-feet whereas the losses from the ponds we calculated are no more than 16.5 acre-feet. This leaves an excess mitigation amount of 8.7 acre-feet coming from water rights 63-365 and 63-2973.

I wanted to make you aware of this and ask What would you like to do with this excess amount you're entitled to?

Regards,
Brian

Transfer No. _____

**APPLICATION FOR TRANSFER OF WATER RIGHT
ATTACHMENT WSB:
TRANSFERRING WATER RIGHTS LEASED TO THE WATER SUPPLY BANK**

Approval of a transfer application will not impact the terms of a Water Supply Bank Lease Contract. Any transferred water right or portion of a water right that is leased to the Water Supply Bank (Bank) shall remain unused while the lease is active.

If the transfer proposes to relocate the place of use of an irrigation water right, and the relocated acres include land currently idled due to a Bank lease contract, the applicant is required to identify the areas that will be idled at the new place of use for the duration of the lease contract. The acres to be idled should be clearly identified on the map created for Attachment 7B of the transfer application. The applicant should confirm the map is attached when completing the table below. If the leased portion of the place of use is not proposed to be relocated, a map is not required.

A Bank lease contract shall remain in effect until it expires, a new lease proposal is processed to replace it, or the water right is released from the Bank through written confirmation issued by the Water Resource Board. If the proposed transfer is approved, the water right owner will be provided sufficient time to allow the lease contract to expire before beneficial use of water at the new place of use will be expected. Meanwhile, water rights leased to the Bank are protected from forfeiture for the duration of the lease contract.

Water right owners who would like to adjust the terms of their lease contracts can either submit a new lease proposal on an [Application to Lease a Water Right to the Water Supply Bank](#) form, or they can request early termination of their lease contracts by completing a [Request to Release a Water Right from the Water Supply Bank](#) form. If a water right is leased to the Bank, and it is currently being rented from the Bank, the lease cannot be reduced or terminated until the rental agreement concludes. A request to release a water right or to submit a new lease application should be sent to the Department's state office. To find out if there are any rentals associated with a leased water right, please call a Bank representative at the Department at 208-287-4800.

In the table below, please provide the requested information for any water right that is both proposed for transfer and leased to the Bank. The information needed to complete this table can be found in your Bank lease contract. A copy of your lease contract can be obtained using the 'Search Water Rights' option on the Department's internet page at www.idwr.idaho.gov or by contacting any Department office.
